

ANATOMY: ANATOMY OF THE BACK

Evals 6

With Love, Green Cuties.

Hey there, Doctor in the making! ☺

Before you begin, remember why you are here. Why do you want to become a Doctor? Why do you want to heal people? Think about how bad you want this. Should you be tempted to quit, to slack off, to give up, remember that people out there need you! ☺

It's gonna be hard, yeah. But the best part of this journey is that you are not alone. You have your friends, your family, and above all you have God with you. He placed you here, and He surely will carry you through this! ☺ Just hold on to Him ☺

As we begin, please know that this is a verryyyy long trans. This is because we have compiled over 7 past transes, ppt's from profs, snippets from Snell and Netters, a few info from past e's, we filled it with pictures, and we placed table to somehow facilitate learning better. ☺ We also used cad pics, xray's and CT scans para OBE.

This trans covers everything about the back and hopefully even some parts of the laboratory aspect. This includes the curvatures, the difference between the regions of the spine, the blood supply, clinical correlations, nerve supply, muscles with OINA, etc.

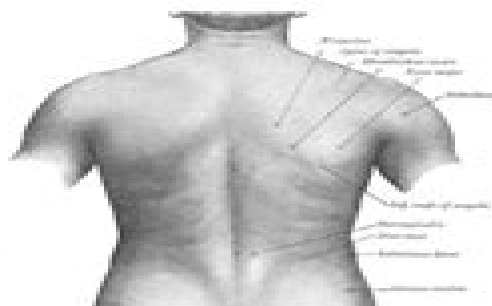

As information-filled as this trans may seem, we still highly encourage you to refer to your personal notes and other sources should we have missed some stuff.

God bless you! You can do it, Doc!

-Green Cuties (and no, di kami all girls. Mas marami lang talaga sila kaya ganito name nung group). HAHAA!

The Back

(yung former US president, si The Back Obama. Badumtss! Ok ang corny. HAHAAH)

- Found at:
 - Posterior area of the trunk
 - Inferior to the neck
 - Superior to the buttocks
- Attachments of the upper limbs (lower limbs are **actually attached to the pelvic girdle**)
- Spans deep from **spine** (bony structure) superficially to the **skin** surrounding the back

* But to facilitate this reviewer, let's start from the inside out. Parang pagbabago lang yan, it has to start from within. (ay life lesson daw hahaha!)

I. THE VERTEBRAL COLUMN

- Extends from the skull all the way to the pelvis
- Surrounds/protects the **spinal cord** and the associated nerves
- Supports the weight of head and the body
 - Transmits weight of the trunk to the lower limbs
- Plays a huge role on **posture**
- Point of attachment for ribs and muscles of the neck and back
- Has 4 curvatures (2 Lordosis and 2 Kyphosis)
 - LORDOSIS: concave posteriorly
 - KYPHOSIS: concave anteriorly
- Significant motion occurs between only the superior 25 vertebrae (7 cervical, 12 thoracic, 5 lumbar and 1 sacral)
- Flexible because it consists of:
 - Small bones
 - Vertebrae (separated by **intervertebral discs**)

In total, there are 33 vertebrae spanning the whole spine.

- SUPERIORLY: 24 individual vertebrae (separated by intervertebral discs)
- INFERIORLY: 9 fuse to form 2 composite bones
 - Sacrum (5)
 - Coccyx (4)
