Terrazas,2010-04-16 Many aspects of Nature Biology or even from Society have become part of the techniques and algorithms used in computer science or they have been used to enhance or hybridize several techniques through the inclusion of advanced evolution cooperation or biologically based additions The previous NCSO workshops were held in Granada Spain 2006 Acireale Italy 2007 and in Tenerife Spain 2008 As in the previous editions NCSO 2010 held in Granada Spain was conceived as a forum for the latest ideas and the state of the art research related to nature inspired cooperative strategies The contributions collected in this book cover topics including nature inspired techniques like Genetic Algorithms Evolutionary Algorithms Ant and Bee Colonies Swarm Intelligence approaches Neural Networks several Cooperation Models Structures and Strategies Agents Models Social Interactions as well as new algorithms based on the behaviour of fireflies or bats *Nature Inspired Cooperative Strategies for Optimization (NCSO 2007)* Natalio Krasnogor,Vincenzo Nicosia,Mario Pavone,David Alejandro Pelta,2008-06-03 Biological and natural processes have been a continuous source of inspiration for the sciences and engineering For instance the work of Wiener in cybernetics was influenced by feedback control processes observable in biological systems McCulloch and Pitts description of the artificial neuron was instigated by biological observations of neural mechanisms the idea of survival of the fittest inspired the field of evolutionary algorithms and similarly artificial immune systems ant colony optimisation automated self assembling programming membrane computing etc also have their roots in natural phenomena The second International Workshop on Nature Inspired Cooperative Strategies for Optimization NCSO was held in Acireale Italy during November 8 10 2007 The aim for NCSO 2007 was to provide a forum where the latest ideas and state of the art research related to cooperative strategies for problem solving arising from Nature could be discussed The contributions collected in this book were strictly peer reviewed by at least three members of the international programme committee to whom we are indebted for their support and assistance The topics covered by the contributions include several well established nature inspired techniques like Genetic Algorithms Ant Colonies Artificial Immune Systems Evolutionary Robotics Evolvable Systems Membrane Computing Quantum Computing Software Self Assembly Swarm Intelligence etc **Biologically-Inspired Collaborative Computing** Mike Hinchey,Anastasia Pagnoni,Franz J. Rammig,Hartmut Schmeck,2008-07-09 Look deep into nature and you will understand everything better advised Albert Einstein In recent years the research communities in Computer Science Engineering and other disciplines have taken this message to heart and a relatively new field of biologically inspired computing has been born Inspiration is being drawn from nature from the behaviors of colonies of ants of swarms of bees and even the human body This new paradigm in computing takes many simple autonomous objects or agents and lets them jointly perform a complex task without having the need for centralized control In this paradigm these simple objects interact locally with their environment using simple rules Applications include optimization algorithms communications networks scheduling and decision making supply chain management and robotics to name just a few There are many disciplines involved in making such systems work

from artificial intelligence to energy aware systems Often these disciplines have their own field of focus have their own conferences or only deal with specialized s problems e g swarm intelligence biologically inspired computation sensor networks The Second IFIP Conference on Biologically Inspired Collaborative Computing aims to bridge this separation of the scientific community and bring together researchers in the fields of Organic Computing Autonomic Computing Self Organizing Systems Pervasive Computing and related areas We are very pleased to have two very important keynote presentations Swarm Robotics The Coordination of Robots via Swarm Intelligence Principles by Marco Dorigo Universit Libre de Bruxelles Belgium of which an abstract is included in this volume
