Lampignano, Leslie E. Kendrick, 2017-02-14 Master radiographic positioning and produce quality radiographs. Bontrager's Workbook for Textbook of Radiographic Positioning and Related Anatomy 9th Edition offers opportunities for application to enhance your understanding and retention. This companion Workbook supports and complements Lampignano and Kendrick's text with a wide variety of exercises including situational questions, laboratory activities, self evaluation tests, and film critique questions which describe an improperly positioned radiograph then ask what corrections need to be made to improve the image. A wide variety of exercises include questions on anatomy, positioning, critique, and image evaluation with answers at the end of the workbook to reinforce concepts and assess learning. Situational questions describe clinical scenarios then ask a related question that requires you to think through and apply positioning info to specific clinical examples. Chapter objectives provide a checklist for completing the workbook activities. Film critique questions describe an improperly positioned radiograph then ask what corrections need to be made to improve the image, preparing you to evaluate the quality of radiographs you take in the clinical setting. Laboratory exercises provide hands on experience performing radiographs using phantoms, evaluating the images, and practicing positioning. Self tests at the end of chapters help you assess your learning with multiple choice, labeling, short answer, matching, and true/false questions. Answers are provided on the Evolve site. NEW Updated content matches the revisions to the textbook, supporting and promoting understanding of complex concepts. NEW and UPDATED Stronger focus on computed and digital radiography with images from the newest equipment to accompany related questions prepares you for the boards and clinical success. **Comprehensive Textbook**
