Literary Variety and the Writing of History in Britain's Long Twelfth Century Jacqueline M. Burek, 2023 A survey of the different literary forms adopted by history writers after the Conquest exploring why and for what effects they were used Histories of Britain composed during the twelfth century renaissance display a remarkable amount of literary variety Latin varietas Furthermore British historians writing after the Norman Conquest often draw attention to the differing forms of their texts But why would historians of this period associate literary variety with the work of history writing Drawing on theories of literary variety found in classical and medieval rhetoric this book traces how British writers came to believe that varietas could help them construct comprehensive continuous accounts of Britain's past It shows how Latin prose historians such as William of Malmesbury Henry of Huntingdon and Geoffrey of Monmouth filled their texts with a diverse array of literary forms which they carefully selected and ordered in accordance with their broader historiographical aims The pronounced literary variety of these influential histories inspired some Middle English verse chroniclers including Laamon and Robert Mannyng to adopt similar principles in their vernacular poetry By uncovering the rhetorical and historiographical theories beneath their literary variety this book provides a new framework for interpreting the stylistic and organizational choices of medieval historians Neo-Latin Commentaries and the Management of Knowledge in the Late Middle Ages and the Early Modern Period (1400-1700) Karl A. E. Enenkel, Karl Enenkel, Henk Nellen, 2013 This book sheds light on the various ways in which classical authors and the Bible were commented on by neo Latin writers between 1400 and 1700

The Oxford History of Classical Reception in English Literature Rita Copeland, 2016-01-28 The Oxford History of Classical Reception in English Literature OHCREL is designed to offer a comprehensive investigation of the numerous and diverse ways in which literary texts of the classical world have

stimulated responses and refashioning by English writers Covering the full range of English literature from the early Middle Ages to the present day OHCREL both synthesizes existing scholarship and presents cutting edge new research employing an international team of expert contributors for each of the five volumes OHCREL endeavours to interrogate rather than inertly reiterate conventional assumptions about literary periods the processes of canon formation and the relations between literary and non literary discourse It conceives of reception as a complex process of dialogic exchange and rather than offering large cultural generalizations it engages in close critical analysis of literary texts It explores in detail the ways in which English writers engagement with classical literature casts as much light on the classical originals as it does on the English writers own cultural context This first volume and fourth to appear in the series covers the years c 800 1558 and surveys the reception and transformation of classical literary culture in England from the Anglo Saxon period up to the Henrician era Chapters on the classics in the medieval curriculum the trivium and quadrivium medieval libraries and medieval mythography provide context for medieval reception The reception of specific classical authors and traditions is represented in chapters on Virgil Ovid Lucan Statius the matter of Troy Boethius moral philosophy historiography biblical epics English learning in the twelfth century and the role of antiquity in medieval alliterative poetry The medieval section includes coverage of Chaucer Gower and Lydgate while the part of the volume dedicated to the later period explores early English humanism humanist education and libraries in the Henrician era and includes chapters that focus on the classicism of Skelton Douglas Wyatt and Surrey
