Higginson, Charles F. von Gunten, Tatsuya Morita, 2021-07-15 This new edition provides the essential clinical guidance both for those embarking upon a career in palliative medicine and for those already established in the field A team of international experts here distil what every practitioner needs to know into a practical and reliable resource

Physical Activity and Rehabilitation in Life-threatening Illness Amy Litterini, Christopher Wilson, 2021-05-04 This book is a comprehensive summary of the recommendations for best practice and current evidence for physical activity and rehabilitation of functional deficits in individuals with end stage diseases While advances in technology have afforded us the opportunity to live longer lives it has also demanded an expansion of focus of medical interventions towards palliative care to enhance the quality of life Exercise and healthcare professionals must strive to broaden their perspectives to provide for the unique needs of these individuals and to successfully engage with them to achieve the most positive outcomes throughout the entire continuum of care Healthcare providers play a critical role in advocating for care to allow individuals to remain physically active for as long as possible even in the face of declining health Finally due to the increasing and progressively emergent healthcare utilization required by these individuals a significant cost burden is experienced by healthcare systems patients families and payers There is evidence of substantial protective effects of physical activity prevention safety and rehabilitative procedures to reduce hospital readmissions reduce length of stay and assist in avoiding unwarranted or unnecessary diagnostic tests or procedures Physical activity has been proven to have a substantial impact and protective effects on virtually all medical conditions During curative management but especially during transitional phases to palliative care other strategies need enhanced consideration to complement the existing plan of care and help to improve patient s

quality of life Ideally physical medicine would be at the forefront of allowing individuals to live their best life until the very end Physical Activity and Rehabilitation in Life threatening Illness is key reading for academics and policy makers in physical activity international exercise wellness and rehabilitation and related disciplines as well as research focused clinicians in settings where patients with advanced illness are frequently encountered *Hospice Palliative Home Care and Bereavement Support* Lorraine Holtslander, Shelley Peacock, Jill Bally, 2019-07-17 This book provides an unique resource for registered nurses working in hospice palliative care at home and for the community outside of acute care settings and also incorporates literature related to palliative care in acute health care settings as part of the overall services and supports required Very few resources exist which specifically address hospice palliative care in the home setting despite the fact that most palliative care occurs outside acute care settings and is primarily supported by unpaid family caregivers An overview of the concerns for individuals and families as well as specific nursing interventions from all ages would be an excellent support for nursing students and practicing registered nurses alike The book structure begins with a description of the goals and objectives of hospice palliative care and the nursing role in providing excellent supportive care Chapters include research findings and specifically research completed by the authors in the areas of pediatric palliative care palliative care for those with dementia and the needs of family caregivers in bereavement Interventions developed by the editors are provided in this book such as the Finding Balance Intervention for bereaved caregivers the Reclaiming Yourself tool for bereaved spouses of partners with dementia and The Keeping Hope Possible Toolkit for families of children with life threatening and life limiting illnesses The development and application of these theory based interventions are also highlighted Videos and vignettes written by family caregivers about what was helpful for them provide a patient and family centered approach div The book will benefit nursing students educators and practicing registered nurses by providing information theory and evidence from research **Children's Palliative Care: An International Case-Based Manual** Julia Downing, 2020-04-01 This manual enables individuals working in children s palliative care CPC globally to learn through engaging real world cases The aim is to provide a clinical case based resource that is globally relevant and accessible to those working in CPC Drawing on case histories from around the world that reflect key issues and elements of CPC it provides a practical approach grounded in experience It addresses multidisciplinary care in the management of children and their families discusses cases from an international perspective and shares examples from a variety of countries utilising cases across a range of ages and conditions demonstrating holistic care It represents the first case based manual on global CPC and is endorsed and promoted by the International Children s Palliative Care Network ICPCN Children s palliative care is a rapidly developing field both in the UK and internationally The provision of CPC varies considerably with provision often being insufficient and over 65% of countries having no recognised CPC service provision whatsoever As such while there are an estimated 21.6 million children who require palliative care in many areas of the world CPC is poor or non-existent and children are treated like little adults

without their distinctive needs being recognised or understood There is also a dearth of literature on CPC hence this clinical case based manual fills a gap in the market and is aimed at a global audience making it a unique text in the field

Interdisciplinary Pediatric Palliative Care Nazila Javadi-Pashaki,Zahra Taheri-Ezbarami,Somaye Pouy,Sachin Dwivedi,2024-12-19 Palliative care is one of the main rights of children with life limiting diseases and their families Despite this importance many of these children and their families around the world are deprived of this service and do not receive these services Among the reasons for not providing palliative care in many countries of the world according to literatures we can mention the lack of knowledge of the health care team about the principles of palliative care and the lack of necessary infrastructure This book will be written with the aim of improving the knowledge and empowerment of the treatment team in the field of the basics of supportive and palliative care for children and by increasing their knowledge it can help in providing these services
