Carbon Bernadette Bensaude-Vincent, Sacha Loeve, 2024-06-07 Carbon is much more than a chemical element it is a polymorphic entity with many faces at once natural cultural and social Ranging across ten million different compounds carbon has as many personas in nature as it has roles in human life on earth And yet it rarely makes the headlines as anything other than the villain of our fossil based economy feeding an addiction which is driving dangerous levels of consumption and international conflict and which left unchecked could lead to our demise as a species But the impact of CO on climate change only tells part of the story and to demonize carbon as an element which will bring about the downfall of humanity is to reduce it to a pale shadow of itself In this major new history of carbon Bernadette Bensaude Vincent and Sacha Loeve show that this omnipresent element is at the root of countless histories and adventures through time thanks to its extraordinary versatility Carbon has a long and prestigious CV its work and achievements extend far beyond the burning of fossil fuels The fourth most abundant element in the universe and the second most abundant element in the human body carbon is the chemical basis of all known life Carbon chemistry has a long history with applications ranging from jewellery to heating underpinning developments in metallurgy textiles pharmaceuticals electronics nanoscience and green technologies A biography of carbon transgresses the boundaries between chemical and social existence between nature and culture forcing us to abandon the simplified image of carbon as the anti hero of human civilization and enabling us to see instead the great diversity of carbon's modes of existence With scientific precision and literary flair Bensaude Vincent and Loeve unravel the surprising ways in which carbon has shaped our world showing how unrecognizable the earth would be without it Uncovering the many hidden lives of carbon allows us to view our own with fresh eyes

Reading Writing Interfaces Lori Emerson, 2014-06-01 Lori Emerson examines how interfaces from today's multitouch devices to yesterday's desktops from typewriters to Emily Dickinson's self bound fascicle volumes mediate between writer and text as well as between writer and reader Following the threads of experimental writing from the present into the past she shows how writers have long tested and transgressed technological boundaries Reading the means of

production as well as the creative works they produce Emerson demonstrates that technologies are more than mere tools and that the interface is not a neutral border between writer and machine but is in fact a collaborative creative space Reading Writing Interfaces begins with digital literature's defiance of the alleged invisibility of ubiquitous computing and multitouch in the early twenty first century and then looks back at the ideology of the user friendly graphical user interface that emerged along with the Apple Macintosh computer of the 1980s She considers poetic experiments with and against the strictures of the typewriter in the 1960s and 1970s and takes a fresh look at Emily Dickinson's self printing projects as a challenge to the coherence of the book Through archival research Emerson offers examples of how literary engagements with screen based and print based technologies have transformed reading and writing She reveals the ways in which writers from Emily Dickinson to Jason Nelson and Judd Morrissey work with and against media interfaces to undermine the assumed transparency of conventional literary practice

Gerber in this path-breaking study of British immigrants to the U.S. and Canada who wrote and received letters during the nineteenth century Scholars have long used immigrant letters as a lens to examine the experiences of immigrant groups and the communities they build in their new homelands Yet immigrants as individual letter writers have not received significant attention rather their letters are often used to add color to narratives informed by other types of sources *Authors of Their Lives* analyzes the cycle of correspondence between immigrants and their homelands paying particular attention to the role played by letters in reformulating relationships made vulnerable by separation Letters provided sources of continuity in lives disrupted by movement across vast spaces that disrupted personal identities which depend on continuity between past and present Gerber reveals how ordinary artisans farmers factory workers and housewives engaged in correspondence that lasted for years and addressed subjects of the most profound emotional and practical significance
