and there are plenty of people telling us how it can be achieved The positive psychology movement indeed has established happiness as a scientific concept within everyone s grasp But is happiness really something we can actively aim for or is it simply a by product of how we live our lives more widely Dr Mick Power Professor of Clinical Psychology and Director of Clinical Programmes at the National University of Singapore provides a critical assessment of what happiness really means and the evidence for how it can be increased Arguing that negative emotions are as important to overall well being as the sunnier sides of our disposition the book examines many of the claims of the positive psychology movement including the relationship between happiness and physical health and argues that resilience adaptability in the face of adversity psychological flexibility and a sense of generativity and creativity are far more achievable as life goals This is a book which will fascinate anyone interested in positive psychology or anyone who has ever questioned the plethora of publications suggesting that blissful happiness is ten easy steps away Myths, Symbols and Legends of Solar System Bodies Rachel

Alexander,2014-11-04 This book is an amateur astronomer s guide to the mythology and symbolism associated with the

celestial bodies in the Solar System and even includes some of the legendary tales of people who had or have a connection with these objects It explores different cultures for example the Greco Roman and the Norse and different times and how stories were used to explain the worlds they saw above them You d be amazed how much of our world today reflects the myths and stories of these cultures Most amateur astronomers are familiar with the various Solar System objects but they will be only peripherally aware of what ancient cultures thought of these other worlds In fact the mythology of the planets challenges many twenty first century concepts and beliefs There are other books available on astromythology but this one focuses mostly on our own Solar System as opposed to the constellations and deep sky objects Alexander offers a new angle on timeless subjects and is exciting informative and dramatic as well as surprisingly relevant to everyday life Find out for yourself how our modern world is steeped in the bygone worlds of yesteryear *Inside the Whale* james sale,2013-02-19 On the 23rd July 2011 I collapsed in the car as my wife was driving me to visit my mother and brother in Essex I was taken to hospital and there for about three months with brief interludes I remained I had two major operations lasting over 5 hours each Two sarcomas were removed one the size of a grapefruit the other the size of an avocado both in my small intestine and one very dangerously placed Some 30% of my small intestines were removed and then for nearly five weeks I couldn t eat or even drink water I lost over 56 pounds in weight and became remarkably weak In the darkness the light of the Spirit shone and I felt the healing and knew from the revelation that was given me that I would leave that hospital for as my son Joseph subsequently said my mission was not yet done These poems then are the fruit of that experience I have been writing poems for over 45 years and if anything could death has deepened my sense of vocation around the magic and the healing power of words
