RECENT PRAISE FOR MARY With aplomb raw impetuosity and astonishing frankness Mary MacLane has what it takes to ignite the fiercest of today's feminists Her first book is a train hurtling through the dust of a frozen world L Express One of the most fascinatingly self involved personalities of the 20th century The Age Her diaries ignited a national uproar ushering in a new era for women's voices Her elegant ambitious embrace of full disclosure had opened a door to what was possible for women The Atlantic In a pre soundbite age she already knew how to draw blood in one direct sentence and the sun of the wide bright world has come to shine on her again The Awl Her hunger for life still jumps over to the reader today Der Spiegel Her voice carries far The author became her own work of art through writing Neue Zürcher Zeitung Incandescent language her work is a visionary feminist manifesto of astonishing modernity Le Monde Check marymaclane.com for exclusive content news previews Quality paperback Petrarca Press 377 pages petrarcapress.com

The World in Your Head Steven M. Lehar, 2003-01-30 The World In Your Head A Gestalt View of the Mechanism of Conscious Experience represents a bold assault on one of the greatest unsolved mysteries in science the nature of consciousness and the human mind Rather than examining the brain and nervous system to see what they tell us about the mind this book begins with an examination of conscious experience to see what it can tell us about the brain Through this

analysis the first and most obvious observation is that consciousness appears as a volumetric spatial void containing colored objects and surfaces This reveals that the representation in the brain takes the form of an explicit volumetric spatial model of external reality Therefore the world we see around us is not the real world itself but merely a miniature virtual reality replica of that world in an internal representation In fact the phenomena of dreams and hallucinations clearly demonstrate the capacity of the brain to construct complete virtual worlds even in the absence of sensory input Perception is somewhat like a guided hallucination based on sensory stimulation This insight allows us to examine the world of visual experience not as scientists exploring the external world but as perceptual scientists examining a rich and complex internal representation This unique approach to investigating mental function has implications in a wide variety of related fields including the nature of language and abstract thought and motor control and behavior It also has implications to the world of music art and dance showing how the patterns of regularity and periodicity in space and time apparent in those aesthetic domains reflect the periodic basis set of the underlying harmonic resonance representation in the brain [The World in Miniature;: V. 3](#)
