The World's Water 2006-2007 Peter H. Gleick, Gary H. Wolff, Heather Cooley, Meena Palaniappan, Andrea Samulon, Emily Lee, Jason Morrison, David Katz, 2013-03-05 Produced biennially The World's Water provides a timely examination of the key issues surrounding freshwater resources and their use Each new volume identifies and explains the most significant current trends worldwide and offers the best data available on a variety of water related topics The 2006 2007 volume features overview chapters on Water and terrorism Business risks of water Water and ecosystems Floods and droughts Desalination Environmental justice and water The book contains an updated chronology of global conflicts associated with water as well as an assessment of recent water conferences including the 4th World Water Forum It also offers a brief review of issues surrounding the use of bottled water and the possible existence of water on Mars From one of the world's leading authorities on water issues The World's Water is the most comprehensive and up to date source of information and analysis on

freshwater resources and the political economic scientific and technological issues associated with them **Water Resources** Shimon C. Anisfeld, 2011-01-03 In this concise introduction to water resources Shimon Anisfeld explores the fundamental interactions between humans and water including drinking sanitation irrigation and power production The book familiarizes students with the current water crisis and with approaches for managing this essential resource more effectively in a time of rapid environmental and social change Anisfeld addresses both human and ecological problems including scarcity pollution disease flooding conflicts over water and degradation of aquatic ecosystems For inquiring students of any level Water Resources provides a comprehensive one volume guide to a complex but vital field of study Water in North American Environmental History Martin V. Melosi, 2022-06-07 Water in North American Environmental History offers 25

cases studies that explore the range of uses and perceptions of water throughout Canadian Mexican and United States history Water has served a myriad of purposes historically as human sustenance agricultural irrigation sanitation fire protection military defense power generation transportation and much more Water and its uses provide an excellent entrance into the study of humans and the environment not only because water is a vital resource for life but also because water as a medium is so intimately woven into the everyday experiences of humans and into society's economic political and social fabric A North American perspective is not representative of the world's water use but it is an area with a linked history and many overlapping human and environmental features and concerns With a continental perspective the book explores many disparate topics without being confined to the history and experiences of just one country The chapters are short but descriptive and departure points for what they tell us about the human experience in dealing with water and the environmental implications of water use The text leads students to consider water in relation to society and to the past The book will be of interest to students of environmental history geography and the environmental sciences **New South**

**African Review 1** Doreen Atkinson, Prishani Naidoo, Devan Pillay, Roger Southall, 2010-11-01 Is South Africa on a long term

decline The New South African Review revives the tradition of critical analytical scholarship developed by the South African Review in the 1970s and 1980s Accessible to a wide readership and drawing upon authors from well beyond academia its objective is to be informative discursive and at times downright provocative It seeks to provide contemporary comment and engage with current controversies The first volume in the series 2010 Development or Decline ranges widely across the implications of the international crisis for the economy the threats to our fragile ecology of present economic strategies through to the state of the ANC and the public service issues around service delivery migration HIV Aids land reform crime the sexual behaviour of our youth and much more Posing the provocative question of whether South Africa is embarking upon a long term decline the volume simultaneously argues the potential for a society premised upon social equality social coherence and sustainability This collection will appeal to both national and international audiences interested in engaging with the multiple dilemmas and challenges facing contemporary South Africa Gary Bryner, The Historical Dictionary of Environmentalism strategically skips across issues concepts time organizations and cultures not with any pretense of producing a definitive dictionary but rather with the aim of producing an inclusive wide ranging and global history of environmentalism This is done through a chronology a list of acronyms and abbreviations an introductory essay and over 300 cross referenced dictionary entries **The A to Z of Environmentalism** Peter Dauvergne, 2009-09-02 Environmentalism involves hundreds of international environmental groups thousands of national groups and tens of thousands of local ones It also includes hundreds of international agreements hundreds of national environmental agencies and countless environmental sections in other organizations from those in multinational corporations to ones in regional and international organizations Such environmental concepts as sustainable development the precautionary principle corporate social responsibility and eco labeling percolate from all of these sources Every year new ideas refinements policies institutions markets and problems continue to enter into environmental debates and discourses making it nearly impossible to keep abreast of the changes constantly taking place The A to Z of Environmentalism is a paperback edition of the Historical Dictionary of Environmentalism It strategically skips across issues concepts time organizations and cultures not with any pretense of producing a definitive dictionary but rather with the aim of producing an inclusive wide ranging and global history of environmentalism This goal is accomplished through a chronology an introductory essay and over 300 cross referenced dictionary entries *Historical Dictionary of Environmentalism* Peter Dauvergne, 2016-09-09 To capture the diversity within environmentalism this dictionary takes a global tack with a focus on ideas events institutions initiatives and green movements since the 1960s It strives to avoid a common error in many histories of environmentalism to exaggerate the input of the wealthy countries of Europe and North America and understate the influence of Africa Asia South and Central America and the Polar Regions It aims as well for a more comprehensive analysis than most histories of the modern environmental movement understanding environmentalism as emerging not only from grassroots and formal

nongovernmental associations but also from corporate governmental and intergovernmental organizations and initiatives This assumes the ideas and energy infusing environmentalism with political purpose arise from hundreds of thousands of sources from corporate boardrooms to bureaucratic policies to international negotiations to activists Thus environmentalists are not only indigenous people blocking a logging road Greenpeace activists protesting a seal hunt or green candidates contesting an election an equal or larger number of environmentalists are working within the Japanese bureaucracy to implement environmental policies within the World Bank to assess the environmental impacts of loans within Wal Mart to green its purchasing practices or within intergovernmental forums to negotiate international environmental agreements This second edition of Historical Dictionary of Environmentalism contains a chronology an introduction and an extensive bibliography The dictionary section has over 300 cross referenced entries on important events issues organizations ideas and people shaping the direction of environmentalism worldwide This book is an excellent access point for students researchers and anyone wanting to know more about environmentalism

**The World's Water** Peter H. Gleick, 2014 Produced biennially The World's Water is the most comprehensive and up to date source of information and analysis on freshwater resources Each new volume examines critical global trends and offers the best data available on a variety of topics related to water Volume 8 features chapters on hydraulic fracturing fracking water footprints sustainable water jobs and desalination financing among other timely issues Water briefs provide concise updates on topics including the Dead Sea and the role of water in the Syrian conflict The World's Water is coauthored by MacArthur genius Peter H Gleick and his colleagues at the

world renowned Pacific Institute Since the first volume was published in 1998 the series has become an indispensable resource for professionals in government agencies and nongovernmental organizations researchers students and anyone concerned with water and its use     Unquenchable Robert Jerome Glennon,2010-09-23 Robert Glennon captures the irony and tragedy of America s water crisis in a book that is both frightening and wickedly comical He proposes market based solutions that value water as both a commodity and a fundamental human right One truth runs throughout this book only when we recognize water s worth will we begin to conserve it From the publisher     Our Global Environment Anne Nadakavukaren,2011-02-28 The crucial interdependence between humans and their environment is explored and illuminated in this revealing overview of the major environmental issues facing society in the twenty first century With attention to detail and cogent language the author describes how human health and well being are inextricably bound up in the web of interrelationships that characterize life on this planet The presentation combines an overall ecological concern with specific elements related to personal and community health giving readers a clear sense of how todays environmental issues directly impact their own lives New to the seventh edition is a chapter on clean energy alternatives that evaluates the long term potential of the most promising renewable energy technologies as well as short term strategies to increase energy efficiency The discussion of global climate change has been significantly updated to reflect the latest assessments of the Intergovernmental Panel on Climate Change with regard to evidence of global warming mitigation strategies and adaptation measures as well as an up to date summary of ongoing international efforts to negotiate binding treaties that would produce meaningful reductions in greenhouse gases Our Global Environment is widely praised by students and faculty for its clear compelling presentation Abundant photographs and illustrations highlight salient issues and clarify trends while boxed inserts in every chapter contain timely examples of general concepts presented in the chapters     *Floodplains* Jeffrey J. Opperman,Peter B. Moyle,Eric W. Larsen,Joan L. Florsheim,Amber D. Manfree,2017-09-05 Introduction to temperate floodplains Hydrology Floodplain and geomorphology Biogeochemistry Ecology introduction Floodplain forests Primary and secondary production Fish and other vertebrates Ecosystem services and floodplain reconciliation Floodplains as green infrastructure Case studies of floodplain management and reconciliation Central Valley floodplains introduction and history Central Valley floodplains today Reconciling Central Valley floodplains Conclusions managing temperate floodplains for multiple benefits     **Water Resources Management in Ethiopia** Helmut Kloos,Worku Legesse,2010 Sub Saharan Africa the poorest region worldwide has only recently begun to fully address the issues of meeting the water needs of its rapidly growing population to reduce the deepening poverty besetting the region and to accelerate economic growth The Nile Basin characterized by sharp spatial and temporal variations in water resources and including countries with different economies social and political structures and capacities illustrates the challenges of developing and managing the waters of the Nile River and its tributaries lakes and wetlands equitably among its 10 riparian countries Ethiopia the major source of the Nile

but one of the poorest countries in the Nile Basin has recently begun to implement plans to harness more Nile water through hydroelectric and irrigation development both for national use and for transboundary development as part of the Nile Basin Initiative. The Ethiopian government and communities by using different management approaches and resources are trying to boost water energy and food production, strengthen conservation efforts and mitigate potential repercussions of water resources development. These initiatives and programs have not been comprehensively examined. In this study, the editors address these and other issues surrounding water resources management in all economic and water sectors in Ethiopia within the setting of the Nile Basin, the first comprehensive treatment of this subject. The wide scope of this book is consistent with the tenets of integrated water resources management which demand that all water uses be managed in an integrated fashion for optimum and sustainable benefits to all water users both humans and ecosystems. This book reveals the impacts of various resource management approaches and practices in Ethiopia and the Nile Basin. Specifically, it examines how deforestation and prevailing land use practices have exacerbated soil aridity and flood events, why irrigated agriculture and hydropower development have caused floodplain degradation, livelihood hardships and water related diseases, where industrial and agricultural development is increasingly polluting water resources, how household water supplies can be obtained through rainwater harvesting and the dependence on hydropower reduced through alternative energy sources, and how misguided government policies have impeded efforts to deal with these and other challenges. Results reveal dynamic interrelationships between these processes and identify the human and environmental driving forces which must be understood in effective integrated water resources management. Another unique contribution of this book is the examination of the role of government and communities in managing water resources in Ethiopia. Results show that the top down approach used by the socialist Derg government in soil and water conservation and social programs exacerbated water problems and reduced community participation. Moreover, the failure of its economic program reduced agricultural production, increasing dependency on relief food and further impeding community initiatives in soil and water conservation activities. Many elements of central planning persist in spite of the decentralization drive by the current government, but there is evidence that integration of the top down and bottom up approaches to water resources management is necessary and feasible to strengthen and up scale programs to the national level. The book identifies a number of customary water and soil management practices and institutions that may strengthen especially community based rainwater harvesting, small scale irrigation, reforestation, soil and water conservation and flood control efforts. This is an important book for researchers and students of resources management, rural development, hydrology and African studies.

Economic Growth and Environmental Regulation Tim Swanson, Tun Lin, 2009-12-04. This volume assembles a group of eminent scholars to look at the problem of growth and environment from the perspective of environmental regulation. The questions addressed are: How does economic growth interact with regulation and what are the best approaches to regulation in use today? The context for

the volume is the current situation in China where twenty years of rapid growth have created a situation in which there are both demands for environmental regulation and needs for choosing a future development path The advent of A Macro Environmental Strategy for China presents an opportunity to ask how and why China should introduce regulation into its management of its development The volume includes contributions from leading Chinese experts and established environmental economists from other countries including Timo Goeschl Ben Groom and Andreas Kontoleon The volume looks at both the demand side of environmental regulation and the supply side The demand side of regulatory intervention examines how regulation operates to supplement existing resource allocation mechanisms via effective demand aggregation and implementation mechanisms The supply side of regulation examines how regulation operates to guide industrial growth down particular pathways in the pursuit of managed development Both sides of environmental regulation involve the important issue of implementation and enforcement This volume will be of most value to academics and scholars of environmental economics growth economics the Chinese economy and policy makers of environmental regulations
