**The Vedic Core of Human History** M. K. Agarwal,2013-12-23 The origin of world civilization can be traced to the Indus Valley cradle where brilliant and original thinkers made groundbreaking discoveries The history of these discoveries is recorded in the vast Sanskrit literature In this study author M K Agarwal explores the cultural and historical significance of the region He explores Indus Valley culture which encouraged creative thoughts opposed to the Abrahamic faiths which herded followers into dogmatic thinking He holds that these religions prospered because of their unfettered hatred of the Vedic Hindu Buddhist peoples who were demonized as pagans to be murdered tortured raped enslaved and robbed He also

considers the achievements of that culture such as the creation of the most affluent most scientifically advanced and most spiritual of all societies with archeological moorings that can be traced back to 8000 BC No other region can even come close to transforming people and culture like the Indus Valley but the worlds Vedic roots have been ignored shunned and covered up Uncover the history that has been lost and develop a deeper appreciation for the true cradle of human civilization with The Vedic Core of Human History

*The Writing in the Stars* Rodney Williamson, 2007-01-01 Born in Mexico City in 1914 writer poet and diplomat Octavio Paz won the Nobel Prize for Literature in 1990 eight years before his death in 1998 The Writing in the Stars explores Paz s life and ideas by establishing a dialogue between the structure and recurring images of his major poems and the ideas of Carl Jung Although other literary critics have pointed to Jungian concepts in Paz a comprehensive study on the subject has yet to be undertaken Rodney Williamson takes up this challenge adopting a Jungian perspective to explore successive phases of Paz s poetry Williamson illustrates how archetypal images infuse Paz s early poetry and his surrealist period and shows how the circular structure of Paz s longer poems such as Piedra de sol and Blanco are based on the Eastern sacred circle or mandala a major archetype of psychic wholeness in Jung He argues that a grasp of the psychological importance of Jung s archetypes is essential to understanding the various syntheses of creative truth and existence sought by Paz at different defining moments of his career as a poet The Writing in the Stars will prove fascinating to anyone interested in Latin American literature Jungian psychology or critical theory

Mysticism Bruno Borchert, 1994-01-01 Mystical experience is not really understood in our modern Western culture but we have a rich history and tradition that can be traced from remote ages to the present day It is a phenomenon common to all religions and races differing in manifestation but sharing a similar foundation 8212the realization from personal experience that all things are interdependent that the source is One The mystical experience is often brief immediate maybe mysterious 8212a last experience that brings all embracing emotion love into the bounds of concrete reality Bruno Borchert brings mysticism into sharp focus by exploring ideas and concepts from world religions and explaining Christian mystics in history in perspective and through art He takes us from Zoroaster to European alchemists explores the Hellenistic world the feminine world view and the experience of God shared by saints and well known mystics such as St Theresa and St Francis Modern approaches explored by psychologists like Jung and Maslow and the contemporary search for mystical love make this a necessary book for people who want to understand the spiritual path

**Phallic Worship: A Description of The Mysteries of The Sex Worship of The Ancients With The History of The Masculine Cross** Anonymous, Sex Worship has prevailed among all peoples of ancient times sometimes contemporaneous and often mixed with Star Serpent and Tree Worship The powers of nature were sexualised and endowed with the same feelings passions and performing the same functions as human beings Among the ancients whether the Sun the Serpent or the Phallic Emblem was worshipped the idea was the same the veneration of the generative principle Thus we find a close relationship between the various mythologies of the ancient

nations and by a comparison of the creeds ideas and symbols can see that they spring from the same source namely the worship of the forces and operations of nature the original of which was doubtless Sun worship It is not necessary to prove that in primitive times the Sun must have been worshipped under various names and venerated as the Creator Light Source of Life and the Giver of Food In the earliest times the worship of the generative power was of the most simple and pure character rude in manner primitive in form pure in idea the homage of man to the supreme power the Author of life Afterwards the worship became more depraved a religion of feeling sensuous bliss corrupted by a priesthood who were not slow to take advantage of this state of affairs and inculcated with it profligate and mysterious ceremonies union of gods with women religious prostitution and other degrading rites Thus it was not long before the emblems lost their pure and simple meaning and became licentious statues and debased objects Hence we have the depraved ceremonies at the worship of Bacchus who became not only the representative of the creative power but the God of pleasure and licentiousness The corrupted religion always found eager votaries willing to be captives to a pleasant bondage by the impulse of physical bliss as was the case in India and Egypt and among the Ph nicians Babylonians Jews and other nations Sex worship once personified became the supreme and governing deity enthroned as the ruling God over all dissent therefrom was impious and punished The priests of the worship compelled obedience monarchs complied to the prevailing faith and became willing devotees to the shrines of Isis and Venus on the one hand and of Bacchus and Priapus on the other by appealing to the most animating passion of nature

**Sound and Communication** Annette Wilke,Oliver Moebus,2011-01-28 In Hindu India both orality and sonality have enjoyed great cultural significance since earliest times They have a distinct influence on how people approach texts The importance of sound and its perception has led to rites models of cosmic order and abstract formulas Sound serves both to stimulate religious feelings and to give them a sensory form Starting from the perception and interpretation of sound the authors chart an unorthodox cultural history of India turning their attention to an important but often neglected aspect of daily religious life They provide a stimulating contribution to the study of cultural systems of perception that also adds new aspects to the debate on orality and literacy The audio samples originally included to the book as a music CD can be downloaded from this website under Supplementary Materials

History of Romania Susana Andea,2006 *Encyclopaedia of the History of Science, Technology, and Medicine in Non-Western Cultures* Helaine Selin,2013-11-11 The Encyclopaedia fills a gap in both the history of science and in cultural studies Reference works on other cultures tend either to omit science completely or pay little attention to it and those on the

history of science almost always start with the Greeks with perhaps a mention of the Islamic world as a translator of Greek scientific works The purpose of the Encyclopaedia is to bring together knowledge of many disparate fields in one place and to legitimize the study of other cultures science Our aim is not to claim the superiority of other cultures but to engage in a mutual exchange of ideas The Western academic divisions of science technology and medicine have been united in the Encyclopaedia because in ancient cultures these disciplines were connected This work contributes to redressing the balance in the number of reference works devoted to the study of Western science and encourages awareness of cultural diversity The Encyclopaedia is the first compilation of this sort and it is testimony both to the earlier Eurocentric view of academia as well as to the widened vision of today There is nothing that crosses disciplinary and geographic boundaries dealing with both scientific and philosophical issues to the extent that this work does xi PERSONAL NOTE FROM THE EDITOR Many years ago I taught African history at a secondary school in Central Africa
