The World Since 1945 P. M. H. Bell, Mark Gilbert, 2016-11-03 A masterly synthesis of the history of the contemporary world The World Since 1945 offers the ideal introduction to the events of the period between the end of the Second World War and the present day P M H Bell and Mark Gilbert balance a clear narrative with in depth analysis to guide the reader through the aftermath of the Second World War the Cold War decolonization D tente and the Arab Israeli Conflict up to the on going ethnic strife and political instability of the 21st century The new edition has been thoroughly revised to fully reflect developments in the history and historiography of the post war world and features five new chapters on the post Cold War world covering topics including The rise and fall of American hegemony The decline of Europe The rise of Asia Political Islam as a global force The role of human rights The World Since 1945 challenges us to better understand what happened and why

in the post war period and shows the ways in which the past continues to exercise a profound influence on the present It is essential reading for any student of contemporary history **The World Since 1945** Wayne C. McWilliams, Harry Piotrowski, 1990 **Outer Space Development, International Relations and Space Law** Edythe Weeks, 2013-02-21 It is the eve of outer space development but few people are aware of this In the absence of awareness people cannot prepare for the opportunities that will arise and so the vast wealth likely to flow to Earth from outer space will cause ever greater inequality and instability in our already unequal and unstable world This book is a call to educators to factor equality and diversity into the process of outer space development by creating a widespread movement to teach outer space development studies to all students especially those who study social and behavioral sciences In calling for this the author is also putting out a call to visionary thinkers to increase public awareness that outer space is already in the process of being developed Her objective is to provide a pedagogical approach aimed at mending the knowledge gap If we fail in this objective we are more likely than ever before to witness ever widening gaps of social and financial inequality The first question that will arise as we embark on this process of course will be Why outer space development People often ask where the money will come from to develop outer space Platinum group metals such as iridium and osmium and various other valuable untapped natural resources have been discovered in abundant quantities and are likely to be mined by companies The discovery of natural resources has sparked development projects in the past These historical patterns of human behavior are occurring again today as companies speed up the process of private spaceship development A myriad of space laws and policies are already in place to support space commercialization Recently the 2010 NASA Authorization Act and various other laws and policies initiated by the US government have placed on the agenda plans to build advanced space transportation systems to privatize spacecraft development to create commercial space habitats space stations and space settlements to initiate commercial space mining to investigate spacecraft trajectory optimization for landing on near Earth asteroids to engage in commercial spaceport construction and interstellar interplanetary international telecommunications and to launch space exploration missions to near Earth asteroids the Moon Mars and Mars s moons US initiatives have in the past been mirrored by the international community and we can expect to see similar patterns arising on a global scale indeed as this book will demonstrate they already are The global community is experiencing economic recession natural disasters lack of opportunity employment anxiety failing K 12 programs widening inequality gaps uprisings revolutions revolts unmet educational goals and a general failure to uplift inspire and provide meaningful opportunities for significant portions of our population People need something that will allow them to focus anew their talents energies abilities and gifts and use this bleak climate as an opportunity for positive change Outer space development is emerging as an answer to this state of crisis The question is To whom will the benefits accrue Many strategic decisions have already been taken regarding space development of which the global general public is unaware Once legal rights to space resources are granted only those with the capital to take

advantage of new laws and policies will be in a position to profit from the new space industries Only those who are in a position to know about outer space development will be in position to take advantage of the opportunities It is important to remember that the global general public has for several decades been paying the start up costs for space exploration research science and technology It is not too late to factor in equality before an infrastructure of inequality is forever with us as we venture to establish the final frontier
