Thomas Hardy Leahey, 2017-10-02 A History of Psychology places social economic and political forces of change alongside psychology's internal theoretical and empirical arguments illuminating how the external world has shaped psychology's development and in turn how the late twentieth century's psychology has shaped society Featuring extended treatment of important movements such as the Enlightenment and the Scientific Revolution the textbook approaches the material from an integrative rather than wholly linear perspective The text carefully examines how issues in psychology reflect and affect concepts that lie outside the field of psychology's technical concerns as a science and profession This new edition features expanded attention on psychoanalysis after its founding as well as new developments in cognitive science artificial intelligence and behavioral economics Throughout the book strengthens its exploration of psychological ideas and the cultures in which they developed and reinforces the connections between psychology modernism and postmodernism The textbook covers scientific applied and professional psychology and is appropriate for higher level undergraduate and graduate students

*Animal Intelligence* Edward Thorndike, 2017-11-30 *Animal Intelligence* is a consolidated record of Edward L Thorndike's theoretical and empirical contributions to the comparative psychology of learning Thorndike's approach is systematic and comprehensive experimentation using a variety of animals and tasks all within a laboratory setting When this book first appeared it set a compelling example and helped make the study of animal behavior very much an experimental laboratory science This landmark study in the investigation of animal intelligence illustrates Thorndike's thinking on the evolution of the mind It includes his formal statement of the influential law of effect which had a significant impact on other behaviorists Hull's law of primary reinforcement was closely related to the law of effect and Skinner acknowledged that the process of operant conditioning was probably that described in the law of effect The new introduction by Darryl Bruce is an in depth study of Thorndike's legacy to comparative psychology as well as a thorough retrospective review of *Animal Intelligence* He includes a biographical introduction of the behaviorist and then delves into his theories and work Among the topics Bruce covers with respect to Thorndike's studies are the nature of animal intelligence the laws of learning and connectionism implications for comparative psychology and relation to theories of other behaviorists *Animal Intelligence* is an intriguing analysis that will be of importance to psychologists and animal behaviorists

*The Homecoming Masquerade (Girls Wearing Black, #1)* Spencer Baum, 2014-08-24 In a posh suburb of the nation's capital at the most exclusive high school in the world the vampires who secretly run the government have created a game for America's daughters of privilege Show up to Homecoming in a black dress and you've entered yourself in a contest where the winner becomes a vampire and the loser becomes the winner's first victim Only the wealthiest most connected students can hope to win so when new girl Nicky Bloom wears a black dress to Homecoming everyone assumes she has a death wish They don't know that Nicky has her own agenda As the dance continues into the night they will find out that Nicky Bloom is far more than she seems
