A Brief Atlas of Lighthouses at the End of the World José Luis González Macías, 2024-04-02 A unique illustrated exploration of our favorite oceanic beacons and their haunted histories There is something beautiful and wild in the impossible architecture of lighthouses These precariously perched structures have been the homes and workplaces of keepers whose romantic guardianship has saved countless lives from cruel seas While that way of life may have faded away as the lights go out and the buildings crumble we still have their stories This collection of more than thirty tales spans the heights and depths of human experience the blind lighthouse keeper tending a light in the Arctic Circle the intrepid young woman saving ships from wreck beginning at just age twelve the desperate plight of a crew cut off for forty days with meager supplies the lighthouse haunted by the clacking sound of a long passed keeper s ghostly typewriter Interweaving literary inspiration and elements from Jules Verne Virginia Woolf and Edgar Allan Poe and accompanied by beautiful illustrations nautical charts maps architectural plans and curious facts these illuminating stories will transport the reader in a book as full of wonder as the far flung lighthouses themselves

QUIRKY STORIES AND A LITERARY APPROACH Fascinating stories and anecdotes about each lighthouse include such features as notable inhabitants Virginia Woolf tantalizing on site discoveries Edgar Allen Poe s unfinished writings and weird twists such as a never before seen species made extinct by a lighthouse keeper s cat Tibbles UNIQUELY ILLUSTRATED The gorgeous pointillistic full page illustrations equally beautiful location maps and detailed building diagrams make this a distinctive celebration of these fascinating structures and their places in the world

United States. Coast Guard,1950 **Historically Famous Lighthouses CG-232 (Illustrations)** United States Coast Guard,2015-04-03 Example in this ebook Under the supervision of the United States Coast Guard there are today some 158 manned lighthouses in the nation Another 60 are cared for by other Coast Guard units in the general area There are hundreds of other lights of varied description that are operated automatically And as technology improves more and more lighthouses are being operated without a full time crew Indeed many of the isolated lighthouses described in this booklet are scheduled for automation In the course of our history as a nation and before that as British colonies we have built hundreds of lighthouses some of which still stand though now inactive having been sold for private residential or other use Many have been rebuilt and not a few have succumbed to the ravages of time The history of our lighthouses thus parallels the history of our nation Since 1716 when the Province of Massachusetts built Boston Light scarcely a year has passed that has not seen a new light structure erected somewhere along our sea coasts on our navigable rivers or along our lake shores To tell the story of these lighthouses would be a major undertaking These stories of some of them however have been selected chiefly for their historical interest Others have been included because their unique locations or types of construction are of more than usual interest The lighthouse typifies maritime safety As part of our early coastal defense system they played a major role in important Coast Guard duties related to military readiness Additionally the light s strategic locations along our coasts aided another early Coast Guard function law enforcement by making it possible for cutters to judge their distances from the coast and so prevent smuggling operations within the three mile limit The stories of 56 lighthouses have been told here The stories of hundreds of others of equal interest could have been included had space permitted The oldest lighthouse described is the Boston Light built in 1716 The newest in this booklet is Buzzards Bay Light which is located some five miles off the Massachusetts coast replacing a lightship that had been there for many years The distance these lights are visible has been given in the geographical range The theoretical visibility of a light in clear weather depends upon two factors the height of the light above water and its intensity The height controls what is known as the geographic range while the intensity controls what is known as the luminous range As a rule for the principal lights the luminous range is greater than the geographic and the distance from which such lights are visible is limited by the earth s curvature only Under some atmospheric conditions the glare or loom of these lights and occasionally the light itself may be visible far beyond the computed geographic range On the other hand and unfortunately more frequently these distances may be lessened by fog rain snow haze or smoke To be continue in this ebook *Lighthouse Encyclopedia* Ray Jones,2013-08-20 A wealth of facts and history fill this beautifully designed armchair and reference book This single volume packed with full color and vintage photos contains everything a lighthouse lover or maritime historian wants to know about lighthouse history changing technologies lighthouse keepers and the lenses themselves A detailed index of more than 150 lighthouses around the world offers quick and easy access to basic information know the height age elevation optic type and status for every lighthouse An appendix listing lighthouse groups
