The Rarest Bird in the World Vernon R. L Head, 2016-03-15 Part detective story part love affair and pure adventure storytelling at its best a celebration of the thrill of exploration and the lure of wild places during the search for the elusive Nechisar Nightjar In 1990 a group of Cambridge scientists arrived at the Plains of Nechisar in Ethiopia On that expedition they collected more than two dozen specimens saw more than three hundred species of birds and a plethora of rare butterflies dragonflies reptiles mammals and plants As they were gathering up their findings a wing of an unidentified bird was packed into a brown paper bag It was to become the most famous wing in the world This wing would set the world of science aflutter Experts were mystified The wing was entirely unique It was like nothing they had ever seen before Could a new species be named based on just one wing After much discussion a new species was announced Nechisar Nightjar or Camprimulgus Solala which means only wing And so birdwatchers like Vernon began to dream Twenty two years later he

joins an expedition of four to find this rarest bird in the world In this gem of nature writing Vernon captivates and enchants as he recounts the searches by spotlight through the Ethiopian plains and allows the reader to mediate on nature exploration our need for wild places and the human compulsion to name things The Rarest Bird in the World is a celebration of a certain way of seeing the world and will bring out the explorer in everyone who reads it

RSPB Everyday Guide to British Wildlife Charlie Elder, 2025-05-22 This informative and engaging guide for beginner wildlife watchers and nature enthusiasts describes the mammals reptiles amphibians fish and insects commonly seen in the British Isles Do you know the difference between a hare and a rabbit And could you tell a grasshopper from a cricket or a porpoise from a dolphin A companion to our popular photographic bird guide The RSPB Everyday Guide to British Wildlife will help you identify more than 100 of our most common and widespread species from the back garden and town centre to the countryside and coast Species accounts include friendly text written by Charlie Elder beautiful colour photos fun facts and top tips to help you identify crucial species characteristics while you're out and about The easy to use layout helps beginners quickly find what they are looking for and the book also includes practical advice and information on a range of fascinating topics including wildlife ponds gardening for pollinators and rockpool residents Richly detailed and accessible this helpful guide is a perfect introduction for anyone keen to get outside and learn more about the extraordinary range of wildlife we can see in Britain

Extinct Birds Julian P. Hume, 2017-08-24 A comprehensive review of the hundreds of bird species that have become extinct over the last 1 000 years of habitat degradation over hunting and rat introduction Extinct Birds has become the standard text on this subject covering both familiar icons of extinction as well as more obscure birds some known from just one specimen or from travellers tales This second edition is expanded to include dozens of new species as more are constantly added to the list either through extinction or through new subfossil discoveries The book is the result of decades of research into literature and museum drawers as well as caves and subfossil deposits which often reveal birds long gone that disappeared without ever being recorded by scientists while they lived From Great Auks Carolina Parakeets and Dodos to the amazing yet almost completely vanished bird radiations of Hawaii and New Zealand via rafts of extinction in the Pacific and elsewhere this book is both a sumptuous reference and astounding testament to humanity's devastating impact on wildlife

Field Guide to Invasive Plants and Animals in Britain Olaf Booy, Max Wade, Helen Roy, 2015-04-23 This field guide will enable the identification of a range of invasive plants and animals now found in Britain The impact of invasive organisms is second only to habitat loss as a threat to biodiversity and yet despite increasing ecological awareness people remain largely unaware of these plants and animals and their potentially devastating impact Although most biological introductions fail many prove successful and these can prove disastrous for native fauna and flora Though these species are of particular concern to conservationists there has previously been no unified guide devoted to their recognition This book will act both as an ID guide appealing to the amateur naturalist and as an important tool for ecologists and land managers attempting to

tackle the problem posed by invasive species Robins and Chats Peter Clement, 2016-01-28 This authoritative handbook part of the Helm Identification Guides series looks in detail at the world's 170 species of robins and chats. This large family of small passerines was formerly considered to be part of the thrush family Turdidae but is now usually treated as a separate family Muscicapidae together with the Old World flycatchers. The vast majority of species are Eurasian or African with only a handful of species straying into the New World or Australasia. The Australian Robins although superficially similar have long been regarded as a separate family. Robins and chats are a diverse family comprising both highly colourful and visible species such as the robin chats of Africa as well as some of the most skulking and elusive birds such as the shortwings of Asia. Many chats such as the well known Nightingale are renowned songsters and a good number are highly sought after by world listers for their extreme rarity or simply because they are hard to see. This book discusses the identification and habits of these birds on a species by species basis bringing together the very latest research with accurate range maps more than 600 stunning colour photographs that illustrate age and racial plumage differences and 64 superb colour plates by the internationally renowned artist Chris Rose. This authoritative and sumptuous book will be an essential purchase for all chat enthusiasts and will become the standard reference on the subject for many years to come Facing Extinction Paul F. Donald, N. J. Collar, Stuart Marsden, Deborah J. Pain, 2013 Almost two hundred species of birds have become extinct in the past 400 years and a similar number today are in imminent danger of following them. The world's conservationists are leading the fight to prevent the demise of these remaining critically endangered birds with a fair degree of success. This new book examines the process and issues concerning extinction: how and why it happens and what can be done about it. Whilst man is to blame for many of the causes such as persecution and habitat loss, species have become extinct on a regular basis since life began. After several thought provoking introductory chapters the book showcases about 20 species on the brink of extinction from around the world and describes the work that is being undertaken to save them. Some are success stories but a few are not. This is a subject close to the hearts of all birders and ornithologists and this book written by a team of leading conservationists will strike a chord in most of them Europe's Alpine Flowers Bob Gibbons, 2025-06-24 An authoritative photographic guide to Europe's spectacular Alpine flora. Europe's Alpine Flowers covers the flowering plants and conifers that occur regularly on mountains and in Arctic areas north of a line that runs from the Pyrenees to Southern Romania. For many botanists and gardeners the alpine flora is the best it gets. There are many species adapted to a harsh climate of extreme winter cold and strong winds including some of our most beautiful rock plants such as gentians, saxifrages and crocuses. These also include subtle and rare flowers that require care to discover and identify. With outstanding photographs and concise text that covers key features, this guide enables confident identification in the field. Covers the plants most likely to be seen above an elevation of 1 000 metres concentrating on plants confined to high mountain areas of Europe and to the Arctic. More than 1 800 color photographs illustrating almost 1 800 species. Concise descriptive species accounts including details of habitat altitudinal

range flowering period and distribution Features easy to use text with minimal botanical jargon and illustrations of essential biological terms With sections on flower identification the alpine and Arctic environments and their habitats and the best places to see alpine flowers Comprehensive index including synonyms Facing extinction: the world's rarest birds and the race to save them Paul F.
