**The Great Maya Droughts in Cultural Context** Gyles Iannone, 2014-03-15 In The Great Maya Droughts in Cultural Context contributors reject the popularized link between societal collapse and drought in Maya civilization arguing that a series of periodic collapses including the infamous Terminal Classic collapse AD 750 1050 were not caused solely by climate change related droughts but by a combination of other social political and environmental factors New and senior scholars of archaeology and environmental science explore the timing and intensity of droughts and provide a nuanced understanding of socio ecological dynamics with specific reference to what makes communities resilient or vulnerable when faced with environmental change Contributors recognize the existence of four droughts that correlate with periods of demographic and political decline and identify a variety of concurrent political and social issues They argue that these primary underlying factors were exacerbated by drought conditions and ultimately led to societal transitions that were by no means uniform across various sites and subregions They also deconstruct the concept of collapse itself although the line of Maya kings ended with the Terminal Classic collapse the Maya people and their civilization survived The Great Maya Droughts in Cultural Context offers new insights into the complicated series of events that impacted the decline of Maya

**Negotiating the Past in the Past** Norman Yoffee, 2022-08-16 Ralph Waldo Emerson once said that all history becomes subjective that in fact properly there is no history only biography Today Emerson's observation is hardly revolutionary for archaeologists it has become conventional wisdom that the present is a battleground where interpretations of the events and meanings of the past are constantly being disputed What were the major events Whose lives did these events impact and how Who were the key players What was their legacy We know all too well that the answers to these questions can vary considerably depending on what political social or personal agenda is driving the response Despite our keen eye for discerning historical spin doctors operating today it has been only in recent years that archaeologists have begun exploring in detail how the past was used in the past itself This volume of ten original works brings critical insight to this frequently overlooked dimension of earlier societies Drawing on the concepts of identity memory and landscape the contributors show how these points of entry can lead to substantially new accounts of how people understood their lives and why things changed as they did Chapters include the archaeologies of the eastern Mediterranean including Mesopotamia Iran Greece and Rome prehistoric Greece Achaemenid and Hellenistic Armenia Athens in the Roman period Nubia and Egypt medieval South India and northern Maya Quintana Roo The contributors show how and why in each society certain versions of the past were promoted while others were aggressively forgotten for the purpose of promoting innovation gaining political advantage or creating a new group identity Commentaries by leading scholars Lynn Meskell and Jack Davis blend with newer voices to create a unique set of essays that is diverse but interrelated exceptionally researched and novel in its perspectives

*and Healing from Antiquity to the Later Middle Ages* Peregrine Horden, 2023-05-31 The first part of this collection brings together a selection of Peregrine Horden's papers on the history of hospitals and related institutions of welfare provision from their origins in Late Antiquity to their medieval flourishing in Byzantium and the Islamic lands as well as in western Europe. The hospital is seen in a variety of original contexts from demography and family history to the history of music and the liturgy. The second part turns to the history of healing and medicine outside the hospital as well as within it. These studies cover a period from Hippocratic times to the Renaissance but with a particular focus on the Mediterranean region: Byzantine, Middle Eastern and Western in the Middle Ages.      **The Oxford Handbook of Late Antiquity** Scott Fitzgerald Johnson, 2015-11 The Oxford Handbook of Late Antiquity offers an innovative overview of a period c. 300–700 CE that has become increasingly central to scholarly debates over the history of western and Middle Eastern civilizations. This volume covers such pivotal events as the fall of Rome, the rise of Christianity, the origins of Islam, and the early formation of Byzantium and the European Middle Ages. These events are set in the context of widespread literary, artistic, cultural, and religious change during the period. The geographical scope of this Handbook is unparalleled among comparable surveys of Late Antiquity: Arabia, Egypt, Central Asia, and the Balkans all receive dedicated treatments, while the scope extends to the western kingdoms and North Africa in the West. Furthermore, from economic theory and slavery to Greek and Latin poetry, Syriac and Coptic literature, sites of religious devotion, and many others, this Handbook covers a wide range of topics that will appeal to scholars from a diverse array of disciplines. The Oxford Handbook of Late Antiquity engages the perennially valuable questions about the end of the ancient world and the beginning of the medieval while providing a much needed touchstone for the study of Late Antiquity itself.      Water on Sand Alan Mikhail, 2013-01-10 Making environmental history accessible to scholars of the Middle East and the history of the region accessible to environmental historians, *Water on Sand* opens up new fields of scholarly inquiry.      *In God's Path* Robert G. Hoyland, 2015 A groundbreaking work that delivers a fresh account of the Arab conquests, incorporating the latest research in Late Antique history.
