### Introduction

The teaching of anatomy through dissection had its roots in the medieval university. Early manuscripts from Salerno in the twelfth century included dissection manuals written to explain the dissection of a pig for teaching anatomy (Corner 1927), and human cadavers were certainly dissected for teaching purposes in the medical school at Bologna by the early fourteenth century as evidence by the dissection manual of Mondino de' Liuzzi, a member of the medical faculty there (Singer 1925). Anatomical demonstrations involving dissection were codified into university statutes in Italy in the fifteenth century, and by the sixteenth century, anatomy had become an important subject, and the demonstrations grew

in prominence. The first permanent anatomy theaters were not built until second half of the century, however, and they served a variety of purposes in addition to being venues for anatomical demonstrations. By the seventeenth century, anatomical demonstrations also occurred outside medical schools in a variety of spaces and before a variety of audiences.

### The Anatomical Demonstration

Anatomy did not take a formal place in the university curriculum until later in the sixteenth century. Earlier than that, rather than prescribe lectures on anatomy in the normal rotation of the curriculum and appoint chairs of anatomy to teach it, an annual anatomy lesson, a demonstration employing dissection of a human body, was used to teach the students. Despite this unique approach, anatomy was an important subject that permeated the concepts of medical theory and practice, not to mention surgery and even natural philosophy (Grendler 2002).

The anatomical demonstration followed a specific order first established by Mondino and in place well into the sixteenth century. This order accommodated the decay of the body by beginning with the parts that were corrupted first and then proceeding to other organs. As Mondino described it, the body was divided into three sections, often referred to as venters or bellies. The first, and lowest, venter included the organs in the
