Theism Atheism And Big Bang Cosmology:

Theism, Atheism, and Big Bang Cosmology William Lane Craig, 1995 Two philosophers take opposing viewpoints to debate the fundamental question of whether the Big Bang was created by God or whether it occurred according to scientific theory

Theism, Atheism, and Big Bang Cosmology, 1993 Two philosophers take opposing viewpoints to debate the fundamental question of whether the Big Bang was created by God or whether it occurred according to scientific theory

God and Time Gregory E. Ganssle, David M. Woodruff, 2002 This is a collection of previously unpublished essays written by leading philosophers about God's relation to time The essays have been selected to represent current debates between those who believe God to be atemporal and those who do not

The Kalam Cosmological Argument, Volume 1 Paul Copan, William Lane Craig, 2017-11-16 Did the universe begin to exist If so did it have a cause Or could it have come into existence uncaused from nothing These questions are taken up by the medieval though recently revived kalam cosmological argument which has arguably been the most discussed philosophical argument for God's existence in recent decades The kalam's line of reasoning maintains that the series of past events cannot be infinite but rather is finite Since the universe could not have come into being uncaused there must be a transcendent cause of the universe's beginning a conclusion supportive of theism This anthology on the philosophical arguments for the finitude of the past asks Is an infinite series of past events metaphysically possible Should actual infinities be restricted to theoretical mathematics or can an actual infinite exist in the concrete world These essays by kalam proponents and detractors engage in lively debate about the nature of infinity and its conundrums about frequently used kalam argument paradoxes of Tristram Shandy the Grim Reaper and Hilbert's Hotel and about the infinity of the future

Collected Works, Volume I Adolf Grünbaum, 2013-07-16 Adolf Grünbaum is one of the giants of 20th century philosophy of science This volume is the first of three collecting his most essential and highly influential work The essays collected in this first volume focus on three related areas They discuss scientific rationality the problem of what it takes for a theory to be called scientific and ask whether it is plausible to draw a clear distinction between science and non science as was famously proposed by Karl Popper They delve into the debate between determinism and indeterminism in both science and in the humanities Grünbaum defends the position of the Humane Determinist which then leads to a thorough criticism of the current theological approaches to ethics and morality where Grünbaum defends an explicit Secular Humanism as well as of prominent theistic interpretations of twentieth century physical cosmologies The second volume is devoted to Grünbaum's writings on the Philosophy of Physics and Space Time and the third to his lectures on the Philosophy of Psychology and Psychoanalysis including his 1985 Gifford Lectures which are to be published for the first time

Analytic Philosophy of Religion James Franklin Harris, 2013-03-14 When Gene Long editor of Kluwer's Handbook of Contemporary Philosophy of Religion Series first invited me to write the volume on Analytic Philosophy of Religion I accepted with great enthusiasm My only explanation for that enthusiasm now is that I was younger

and more naive at the time Soon after starting work on the volume my enthusiasm was dampened by the daunting magnitude of the task I began as a sprinter and quickly settled into the pace of a long distance runner Although I considered myself well read in the subject I soon discovered that I had a great deal of research to do to be confident that I had considered all of the major contributions to the various discussions issues and of religion As I read more and more problems found within analytic philosophy books and articles I realized that I had rushed into a territory already well trodden by the angels I am greatly impressed by the sophistication and subtlety of philosophical argument that characterize the different debates in contemporary analytic philosophy of religion This volume covers a vast amount of material I have endeavored to provide the fairest possible reading of different authors and in cases where I include my own critical evaluations and develop my own positions I have endeavored to provide the strongest possible interpretations of the positions I criticize Science & Christianity Richard F. Carlson,2000-08-31 Six contributors here debate the relative merits of four distinct conceptions of the relationship between Christianity and science today Views range from a strict creationist posture to full fledged partnership Edited by Richard F Carlson **What Can We Really Know?** David R. Andersen,Angus J.L. Menuge,2023-06-13 Today it is not uncommon to get the impression that our claims to know are either doomed before they begin or that they have a status that approaches certainty The pendulum seems to swing from one end to the other with our educational institutions too often perpetuating both depending on the person being asked Yet the question of how and if our claims to know are really justified remains central Is knowledge a purely social construct without any objective basis as many claim Or if we do have some basis to believe some of our claims are we justified in holding those claims with an attitude of certainty as others in today's environment seem to imply And what role do our quick judgments play in those claims From the tenor of our public debates one could easily be left with the suspicion that either we can't know anything or that whatever the present state of knowledge is shouldn't be questioned **What Can We Really Know** The Strengths and Limits of Human Understanding aims to bring some balance to the topic and argues that while we do have reason to believe that a great many of our claims are justified it is also true that much of what passes for knowledge is a social product and therefore vulnerable to future revision Exploring how knowledge can be understood how far science can take us and what its limitations might be and the status of some of the most recent arguments for God's existence it will be suggested that a healthy dose of humility should be reincorporated in our public and private debates **What Caused the Big Bang?** Rem B. Edwards,2021-07-26 This book critically explores answers to the big question What produced our universe around fifteen billion years ago in a Big Bang It critiques contemporary atheistic cosmologies including Steady State Oscillationism Big Fizz Big Divide and Big Accident that affirm the eternity and self sufficiency of the universe without God This study defends and revises Process Theology and arguments for God's existence from the universe's life supporting order and contingent existence **New Proofs for the Existence of God** Robert J. Spitzer,2010-07-27 With the incredible popularity of recent books championing agnosticism or

atheism many people might never know that such books almost completely ignore the considerable evidence for theism uncovered in both physics and philosophy over the past four decades *New Proofs for the Existence of God* responds to these glaring omissions From universal space time asymmetry to cosmic coincidences to the intelligibility of reality Robert Spitzer tackles a wealth of evidence He considers string theory quantum cosmology mathematical thoughts on infinity and much more This fascinating and stunning collection of evidence provides solid grounding for reasonable and responsible belief in a super intelligent transcendent creative power standing at the origins of our universe
