Theoretical Perspectives On Cognitive Aging:

Theoretical Perspectives on Cognitive Aging Timothy A. Salthouse, 1991 First Published in 1991 Routledge is an imprint of Taylor Francis an informa company

Theoretical Perspectives on Cognitive Aging Timothy A. Salthouse, 2016-03-23 The phenomenon of age related cognitive decline has long been controversial both in terms of mere existence and with respect to how it is explained Some researchers have dismissed it as an artifact of declining health or lower levels of education and others have attributed it to general changes occurring in the external environment Still other interpretations have been based on the use it or lose it principle known as the Disuse Hypothesis or on the idea that there are qualitative differences in either the structure or the process of cognition across the adult years Perhaps the most popular approach at present relies on the information processing perspective and attempts to identify the critical processing component most responsible for age related differences in cognition The primary purposes of this book are first to review the evidence of age related differences in cognitive functioning and then to evaluate the major explanations proposed to account for the negative relations between age and cognition that have been established Included is a discussion of theoretical dimensions and levels of scientific theorizing assumed to be helpful in understanding and evaluating alternative perspectives on cognitive aging The various perspectives are then covered in detail and analyzed The text concludes with observations about the progress that has been made in explaining cognitive aging phenomena plus recommendations for research practices that might contribute to greater progress in the future

A Theory of Cognitive Aging T. Salthouse, 2000-04-01 Over a half century of research has documented the fact that people of different ages perform at different levels on a variety of tests of cognitive functioning and yet there are still no comprehensive theories to account for these phenomena A Theory of Cognitive Aging is intended to begin intellectual discussion in this area by identifying major issues of controversy and proposing a particular theoretical interpretation based on the notion that the rate of processing information slows down with increased age Although still quite preliminary the theoretical perspective is demonstrated to provide a plausible account for age related differences in functioning on measures of memory spatial ability and reasoning The book has four aims To advocate a more explicitly theoretical approach to research in the area of cognitive aging To outline three important dimensions along which it is argued that any theory of cognitive aging phenomena must take a position To evaluate empirical evidence relevant to specific positions along those dimensions To summarize the major concepts of the current theory and to describe its application to selected findings in the research literature

Handbook of Theories of Aging, Second Edition Merrill Silverstein PhD, Vern L. Bengtson PhD, Norella Putney PhD, Daphna Gans PhD, 2008-10-27 The field of gerontology has often been criticized for being data rich but theory poor The editors of this book address this issue by stressing the importance of theory in gerontology While the previous edition focused on multidisciplinary approaches to aging theory this new edition provides cross disciplinary integrative explanations of aging theory The contributors of this text have reached

beyond traditional disciplinary boundaries to partner with researchers in adjacent fields in studying aging and age related phenomena This edition of the Handbook consists of 39 chapters written by 67 internationally recognized experts in the field of aging It is organized in seven sections reflecting the major theoretical developments in gerontology over the past 10 years Special Features Comprehensive coverage of aging theory focusing on the biological psychological and social aspects of aging A section dedicated to discussing how aging theory informs public policy A concluding chapter summarizing the major themes of aging and offering predictions about the future of theory development Required reading for graduate students and post doctoral fellows this textbook represents the current status of theoretical development in the study of aging

Consumer Behavior over the Life Course George P. Moschis,2019-01-31 This book examines consumer behavior using the life course paradigm a multidisciplinary framework for studying people s lives structural contexts and social change It contributes to marketing research by providing new insights into the study of consumer behavior and illustrating how to apply the life course paradigm s concepts and theoretical perspectives to study consumer topics in an innovative way Although a growing number of marketing researchers either implicitly or explicitly subscribe to life course perspectives for studying a variety of consumer behaviors their efforts have been limited due to a lack of theories and methods that would help them study consumers over the lifecycle When studying consumers over their lifespan researchers examine differences in the consumer behaviors of various age groups e g children baby boomers elderly etc or family life stages e g bachelors full

nesters empty nesters etc inferring that consumer behavior changes over time or linking consumption behaviors to previous experiences and future expectations Such efforts however have yet to benefit from an interdisciplinary research approach This book fills this gap in consumer research by informing readers about the differences between some of the most commonly used models for studying consumers over their lifespan and the life course paradigm and providing implications for research public policy and marketing practice Presenting applications of the life course approach in such research topics as decision making maladaptive behaviors e g compulsive buying binge eating consumer well being and cognitive decline this book is beneficial for students scholars professors practitioners and policy makers in consumer behavior consumer research consumer psychology and marketing research
