Information Systems Foundations: Constructing and Criticising Shirley Gregor, Dennis N. Hart, 2005-06-01 Papers presented at the second biennial Information Systems Foundations Constructing and Criticising Workshop held at The Australian National University in Canberra from 16-17 July 2004. The focus of the workshop was as for the first in the series: the foundations of Information Systems as an academic discipline. The particular emphasis was on the adequacy and completeness of theoretical underpinnings and the research methods employed. Using Grounded Theory Research Methods Cheryl Tatano Beck, 2025-09-29 This practical text introduces and compares all the different varieties of grounded theory for researchers new to the methodology from across the health and social sciences. Grounded theory is a complex research methodology further complicated by the existence of a number of different variations. Method slurring is a common problem and this thoughtful textbook enables readers to understand and use grounded theory correctly with chapters focusing on Barney Glaser's Grounded Theory, Anselm Strauss and Juliet Corbin's Grounded Theory, Leonard Schatzman and Barbara Bowers' Dimensional Analysis, Kathy Charmaz's Constructivist Grounded Theory, Adele Clarke's Situational Analysis. It includes a comparison of first and second generation grounded theory approaches and includes an interdisciplinary selection of examples. Each chapter includes tips for researchers' activities and a summary highlighting the strengths and limitations of the grounded theory approach in question. This text is an essential read for researchers with an interest in grounded theory or advanced students taking qualitative research methods courses. **The Sage Handbook of Health Psychology**

Katherine Brown, Cecilia Cheng, Martin Hagger, Kyra Hamilton, Stephen Sutton, 2025-06-07 The field of health psychology has undergone transformative growth and development over the past 20 years. This two-volume set captures the evolution of the field, providing a comprehensive and up-to-date reference for researchers, practitioners, and students. Each volume delves into critical aspects of health psychology from foundational theories and methods to practical applications and interventions. This set is essential reading for those seeking to understand and apply health psychology principles to improve health and wellbeing outcomes. Volume One: Contexts, Theory, and Methods in Health Psychology. The Sage Handbook of Health Psychology, 2e. Holton, Isabelle Walsh, 2016-02-19 Classic Grounded Theory Applications With Qualitative and Quantitative Data provides practical how to guidance for doing grounded theory GT using the classic approach articulated by Barney Glaser The authors emphasize the philosophical flexibility of classic GT as a full package approach that can be applied to any study and any type of data where the goal is to discover and generate a conceptually integrated theory Drawing on the experiences of novice researchers who have participated in GT troubleshooting seminars the book provides step by step guidance on undertaking a research study that stays true to the classic GT practice paradigm *Grounded Theory* Melanie Birks, Jane Mills, 2022-11-29 The student focused guide to grounded theory this book takes you step by step through the whole research process from creating a research proposal to sharing your findings Packed with tools to help you understand how grounded theory can be applied at each stage of your research project the book includes Interactive activities and critical thinking questions in every chapter so you can put your knowledge into practice Case studies written by a wide variety of researchers so you can learn how to navigate real world research from people who have been in your shoes Templates and checklists to help guide your writing and ensure you don't miss a step in the research process Clear accessible and applied this book will help you get to grips with the philosophy of grounded theory understand the nuts and bolts of designing and carrying out your research project and manage any hurdles along the way Explore the accompanying online resources which include PowerPoint slides additional templates and weblinks to videos and journal articles relevant to the key concepts in each chapter **Handbook of Research Methods for Tourism and Hospitality Management** Robin Nunkoo, 2018-07-27 As research in tourism and hospitality reaches maturity a growing number of methodological approaches are being utilized and in addition this

knowledge is dispersed across a wide range of journals. Consequently, there is a broad and multidisciplinary community of tourism and hospitality researchers whom, at present, need to look widely for support on methods. In this volume, researchers fulfil a pressing need by clearly presenting methodological issues within tourism and hospitality research alongside particular methods and share their experiences of what works, what does not work, and where challenges and innovations lie. **The SAGE Handbook of Grounded Theory** Antony Bryant, Kathy Charmaz, 2010-02-11. This Handbook gives a comprehensive overview of the theory and practice of grounded theory, taking into account the many attempts to revise and refine Glaser and Strauss' original formulation. Research Methods and Methodologies in Education Robert Coe, Michael Waring, Larry V Hedges, Laura Day Ashley, 2021-04-14. Your 1 resource for carrying out educational research as part of postgraduate study. High quality educational research requires careful consideration of every aspect of the process. This all-encompassing textbook, written by leading international experts, gives you a considered overview of principles that underpin research and key qualitative, quantitative, and mixed methods for research design, data collection, and analysis. This third edition includes four new chapters: Disseminating your research, Data science and computational research methods, Observational methods, Analysis of variance ANOVA. Plus a new Research essentials feature that highlights key must-haves or misconceptions relating to each methodological approach, research design, or analytical tool discussed. This is essential reading for postgraduate students on education courses and early career researchers looking to sharpen their research practice.

Qualitative Research Methodologies for Occupational Science and Occupational Therapy Shoba Nayar, Mandy Stanley, 2023-11-09. This comprehensive text provides a practical introduction to the range of qualitative methodologies and methods being used by occupational science and occupational therapy researchers today, enabling readers to produce and critique high quality qualitative research themselves. Showcasing a diverse range of qualitative research from both academic scholarship and the wider community of health professionals, each chapter combines both foundational knowledge and therapeutic applications. Importantly, the book lucidly explains the synergy between research problem, choice of methodology, and methods. It also fosters a best practice approach, ensuring that qualitative research is epistemologically sound while reflecting the values and beliefs of the diverse communities within which research is conducted. This new edition, featuring an international range of authors, also addresses new and cutting edge research methodologies including Indigenous methodologies, netnography, the visual arts, and Big data. It is the ideal textbook for any student, practitioner, or researcher of occupational science and occupational therapy. Cultural Psychology Uwe Wolfradt, Lars Allolio-Näcke, Paul Sebastian Ruppel, 2024-12-17. The introductory book presents the current state of cultural psychology in terms of theoretical approaches and methods comprehensively. It also demonstrates how deeply it is anchored in various fields of action. Cultural psychology is an interdisciplinary field of research that aims less to objectively and causally explain human behavior and experience but rather seeks to understand psychological phenomena in their respective sociocultural context. In doing so, it

follows a theoretical understanding of humans as actively acting beings Compared to the prevailing nomothetic oriented psychology it emphasizes different theoretical and methodological approaches particularly highlighting intentionality meaning structuring and ultimately the cultural aspects of human existence Cultural psychology incorporates both hermeneutic approaches from psychology philosophy sociology and ethnology as well as qualitative methods for studying human behavior and experience *Handbook of Qualitative Research Methodologies in Workplace Contexts* Joanna Crossman,2021-02-26 This comprehensive Handbook explores both traditional and contemporary interpretations of qualitative research in the workplace examining a variety of foundational and innovative qualitative methodological approaches *Reflexive Methodology* Mats Alvesson,Kaj Sköldbberg,2017-10-23 Praise for the Second Edition In opposition to most literature on how to conduct good social science research which is either empirically oriented or gives priority to theoretical and philosophical considerations which tends to make empirical research look odd or irrelevant this volume on Reflexive Methodology explicitly turns towards a consideration of the perceptual cognitive theoretical linguistic political and cultural circumstances as backdrop of data interpretation and research design It showed up to be the most important and informative resource and a source of enlightenment to my lecture on methodology at our institute I can highly recommend the volume to lecturers and students alike Professor Sabine Troeger Geography Institute Library University of Bonn Reflexivity is an essential part of the research process Mats Alvesson and Kaj Sköldbberg make explicit the links between techniques used in empirical research and different research traditions giving a theoretically informed approach to qualitative research The authors provide balanced reviews and critiques of the major schools of grounded theory ethnography hermeneutics critical theory postmodernism and poststructuralism discourse analysis genealogy and feminism Useful reading for students and researchers across the social sciences The first edition established itself as a ground breaking success providing researchers with an invaluable guide to a central problem in research methodology namely how to put field research and interpretations in perspective paying attention to the interpretive political and rhetorical nature of empirical research The second edition introduced a new chapter on positivism social constructionism and critical realism and offered new conclusions on the applications of methodology This third edition of Reflexive Methodology provides further updates on new research including neorealism and illustrations and applications of reflexive methodology in formulating research strategies that build on the acclaimed and successful previous editions *The Critical Turn in Tourism Studies* Irena Ateljevic,Annette Pritchard,Nigel Morgan,2007-03-15 New approaches to tourism study demonstrate a notable critical turn a shift in thought that emphasises interpretative and critical modes of tourism inquiry The chapters in this volume reflect this emerging critical school of tourism studies and represent a coordinated effort of tourism scholars whose work engages innovative research methodologies Since such work has been dispersed across a variety of tourism related and other research fields this book responds to a pressing need to consolidate recent advances in a single text Adopting a broad

definition of criticality the contributors seek to find fresh ways of theorising tourism by locating the phenomenon in its wider political economic cultural and social contexts The collection addresses the power relations underpinning the production of academic knowledge presents a range of qualitative data collection methods which confront the field's dominant post-positivist approaches foregrounds the emotional dynamics of research relations and explores the personal the political and the situated nature of research journeys The book has been divided into two parts with the essays in the first part establishing a context specific framework for engaging philosophical and theoretical debates in contemporary tourism enquiry The second set of essays then present discuss and critique specific methodologies research techniques methods of interpretation and writing strategies all of which are in some sense illustrative of critical tourism research Contributors range from postgraduate students to established academics and are drawn from both the geopolitical margins and the powerbases of the tourism academy Their various relationships with the English speaking academy thus range from relative outsider to well positioned insider and as a result their essays are reflective of a range of locations within the complexly spun web of academic power relations and social divisions

Professional Empowerment in the Software Industry through Experience-Driven Shared Tacit Knowledge Hui Chen, Miguel Baptista Nunes, 2023-05-19 This book addresses the identification and classification of knowledge acquired through experience that results from engaging in professional activities within the software industry As a result of this study the book presents an ontology of such professional activities that require and enable the acquisition of experience and that in turn are the basis for tacit knowledge creation The rationale behind the creation of such an ontology was based on the need to externalize this tacit knowledge and then record such externalizations so that these can be shared and disseminated within and across organizations The book discusses the very concise manner in which experienced software development practitioners in China understand the nature and value of experience in the SW industry effectively communicate with other stakeholders in the software development process are able and motivated to actively engage with continuous professional development are able to share knowledge with peers and the profession at large and effectively work on projects and exhibit a sound professional attitude both internally to their own company and externally to customers partners and even competitors The book also discusses the ontology and the qualitative process that are generated by bridging two extremely topical aspects of practice in the software industry namely employability skills and competencies The book is of interest to academics in the areas of knowledge management and information systems as well as human resources practitioners concerned with selection and development and knowledge and information professionals in software organizations

The Roots and Uses of Marketing Knowledge Terry Smith, 2020-01-20 Marketing theory is often developed in isolation not collaboration theoretical perspectives sometimes are ignorant of the diversity of marketing practice In The roots and uses of marketing knowledge a critical inquiry into the theory and practice of marketing the author engages with the vital conversation about how marketing knowledge is created

disseminated and consumed looking beyond the traditional reification of practice in theory and verification of theory in practice The ontology of this work is anchored in subjective individual meaning the epistemological stance assumes that this meaning is socially constructed Consequently rich empirical data grounded in the context of experiential evidence is extracted from a comprehensive range of marketing constituencies academics practitioners managers consultants authors lecturers and students In its examination of the polarities hybridity and iterative flow of marketing knowledge creation and consumption this text posits a cohesive argument for a theory practice bipartite fusion not dichotomy adding valuable insights into the textual contextual and pedagogical representations of marketing knowledge The history and future of marketing knowledge is examined with the aid of instructive illustrations and insightful first hand experience Drawing on extensive qualitative research from a broad range of influential producers and vital consumers Dr Smith presents a relevant exciting marketing knowledge framework which will be a vital resource for academics students and practitioners
