and functions of street violence in a modern European city Commonly perceived as the senseless outcome of social disintegration in urban contexts public violence appears here as a meaningful strategy to settle conflicts informally Making use of Antwerp police records Vrints shows that the prevailing discourse on public violence does not pass the test of empirical facts The presumed correlation between the occurrence of public violence and the decline of neighbourhood life must even be reversed to some extent The nature of public violence paradoxically points to the crucial importance of neighbourhood networks     *Sociale wetenschappen* ,1972
