Theories Of Educational Leadership And Management:

Theories of Educational Leadership and Management Tony Bush, 2020-05-11 This fifth edition of Tony Bush's bestselling text explores the links between educational management theories and the main models of leadership and their application to policy and practice globally across varied educational contexts. This fully updated new edition is informed by an enhanced global perspective and expanded coverage of important contemporary issues including teacher leadership, professional learning communities, transformational leadership, instructional leadership, and a critical assessment of distributed leadership. This is essential reading for all teachers who aspire to management as well as for experienced leaders on Masters level courses and for those studying school management as part of education degrees.

Theories of Educational Leadership and Management Tony Bush, 2010-11-30 In this established text, Tony Bush presents the major theories of educational management and links them to contemporary policy and practice. Leadership continues to be one of the major criteria used to differentiate the models, but the author now makes clear links between educational management theories and the main models of leadership. The author applies the models to a range of international contexts, including both developed and developing countries. This relates to global interest in concepts of leadership and management and to an increasing recognition of the need to customize theory and practice to each context and culture rather than adopting a one size fits all approach. For the Fourth Edition, the essential conceptual models remain. New case study material has been added from the full range of education and non school settings from early years through to further and higher education. Each chapter now includes key words, summary, and end of chapter materials including issues for discussion. Key terms are defined in text for the non expert reader and all references and relevant key legislation details have been fully updated. This book is essential reading for all teachers who aspire to management as well as for experienced leaders on Masters level courses and for those studying school management as part of education studies degrees.

Mastering Theories of Educational Leadership and Management Donnie Adams, 2018-10-08 The field of Educational Leadership and Management originated and grew to maturity in the Western societies of the USA, UK, and Australia. However, since the mid 1990s, scholars in East Asia have asserted the need to ground leadership theories and practices in the local contexts in which school leaders practice. Mastering Theories of Educational Leadership and Management is one of the first volumes published which seeks to do this. The edited chapters illustrate and elaborate how perspectives on key concepts and theories of educational leadership are being interpreted and enacted in East Asian societies. By doing so, the book makes a valuable contribution which will hopefully reduce the gap between theories as explained by Western scholars and practices as enacted in East Asian societies.

Educational Leadership and Organizational Management Victor C.X. Wang, Bernice Bain, John Hope, Catherine A. Hansman, 2016-10-01 This book is intended for students leaders and managers who wish to explore the personal relevance and conceptual bases of educational leadership and organizational management and to develop their expertise in this field It is a book written for both scholars and practitioners The general public will also appreciate the accessible language in the book There are two goals in the experiential learning process One is to learn the specifics of a particular subject matter in this case educational leadership and organizational management The other is to learn about one's own strengths and weaknesses as a learner This book is focused on the analysis of prevalent theories and concepts and their application to the development of leadership and management skills and the knowledge and attitudes required to solve real world problems in the workplace For decades students have focused their studies of educational leadership and organizational management theories in classroom settings without actual opportunities to apply these theories in the workplace A profound and significant lesson learned in history is that we must follow the principle of integrating theory with practice unity of theory with practice Then we can follow the policy of walking on two legs an analogy made by the late Chinese chairman Mao Ze Dong
