treats the politics of federalism systematically and accessibly making it indispensable to all students and scholars of American politics Chosen as one of Choice's Outstanding Academic Titles for 2012 **Governing Environment** Sanjay Sharma, 2016 This book comparatively analyses the federal policies and financing of India and Canada It examines whether federalism as a system of governance is better suited to deal with environmental questions It operates from the assumption that federalism can provide an effective solution to the emerging concerns of the environment because it essentially provides a model of disaggregated governance without any extensive and intrusive mark of hierarchy It presents a uniquely exploration of environmental governance from this hitherto under researched perspective and simultaneously in order to provide a better conceptual understanding examines the different theories of federalism and modes of distribution of powers authorities and functions Given their symmetrical federal experiences India and Canada naturally qualify as the domain of study with both being known as twin federal nations Issues of environment have been factorised and classified according to their critical significance in terms of policy choices The combinatorial structure has been evaluated in terms of better federal management of environment In the process many new dimensions of federalism and environment have emerged which may contribute to the critical mass of knowledge on the subject This book makes a departure from the general mono construction of the environment as a restricted unit of knowledge available only to a specialist Broadly following an interdisciplinary logic of formation of idea this study is highly relevant in generating a new perspective on environmental research It defines environment as a system which requires careful redrafting and reworking of three structures of relationships namely between man and environment between resource community and the state and between inter governmental contestations

provides a new in depth treatment of shared rule a crucial but so far largely neglected dimension of federalism and multilevel governance He discusses shared rule s conceptual evolution and defines three different meanings commonly ascribed to it shared rule as horizontal cooperation centralization or bottom up influence seeking An original expert survey conducted among 38 federalism scholars in 11 countries is used to measure actual regional government influence over national decisions Drawing on a wide range of literature from lobbying and political parties to power sharing and secessionism the author then investigates the emergence and impact of shared rule thus understood The evidence presented includes qualitative case studies on Belgium Canada Germany Spain Switzerland and the US as well as quantitative cross sectional analyses at regional and national level Mueller shows that shared rule has the potential to become the holy grail of territorial politics in that it satisfies both those wanting greater unity and uniformity of policy making as well as those desiring greater regional autonomy and recognition of diversity Building on the conceptual and empirical groundwork laid by the Regional Authority Index he takes us further and deeper still into the mechanics of territorial contestation cooperation and cohesion Transformations in Governance is a major academic book series from Oxford University Press It is designed to accommodate the impressive growth of research in comparative politics international relations public policy federalism and environmental and urban studies concerned with the dispersion of authority from central states to supranational institutions subnational governments and public private networks It brings together work that advances our understanding of the organization causes and consequences of multilevel and complex governance The series is selective containing annually a small number of books of exceptionally high quality by leading and emerging scholars The series is edited by Liesbet Hooghe and Gary Marks of the University of North Carolina Chapel Hill and Walter Mattli of the University of Oxford

empires nations and how they relate to nation states and empires and the right of secession highlighting the importance of the fact that this was written in to the Soviet constitution It examines the attitude of successive Soviet leaders towards nationalities and the changing attitudes of nationalists towards the Soviet Union Overall it demonstrates that the Soviet attitude to nationalities and federal units was complicated wrestling in a similar way to many other states with difficult questions of how ethno cultural justice can best be delivered in a political unit which is bigger than the national state
