How to Survive the Apocalypse Robert Joustra, Alissa Wilkinson, 2016-05-20 Incisive insights into contemporary pop culture and its apocalyptic bent The world is going to hell So begins this book pointing to the prevalence of apocalypse cataclysmic destruction and nightmarish end of the world scenarios in contemporary entertainment In *How to Survive the Apocalypse* Robert Joustra and Alissa Wilkinson examine a number of popular stories from the Cylons in *Battlestar Galactica* to the purging of innocence in *Game of Thrones* to the hordes of zombies in *The Walking Dead* and argue that such apocalyptic stories reveal a lot about us here and now about how we conceive of our life together including some of our deepest tensions and anxieties Besides analyzing the dystopian shift in popular culture Joustra and Wilkinson also suggest how Christians can live faithfully and with integrity in such a cultural context

Age of Deception Jon R. Lindsay, 2025-10-15 At the heart of cybersecurity lies a paradox Cooperation makes conflict possible In *Age of Deception* Jon R Lindsay shows that widespread trust in cyberspace enables espionage and subversion While such acts of secret statecraft have long been part of global politics digital systems have dramatically expanded their scope and scale Yet success in secret statecraft hinges less on sophisticated technology than on political context To make sense of this Lindsay offers a general theory of intelligence performance the analogue to military performance in battle that explains why spies and hackers alike depend on clandestine organizations and vulnerable institutions Through cases spanning codebreaking at Bletchley Park during WWII to the weaponization of pagers by Israel in 2024 he traces both continuity and change in secret statecraft Along

the way he explains why popular assumptions about cyber warfare are profoundly misleading. Offense does not simply dominate defense for example because the same digital complexity that expands opportunities for deception also creates potential for self deception and counterdeception. Provocative and persuasive. Age of Deception offers crucial insights into the future of secret statecraft in cyberspace and beyond.

Imagining Disarmament, Enchanting International Relations

Matthew Breay Bolton, 2019-06-25. This book explores the global politics of disarmament through emerging international relations IR theories of discourse and imagination. Each chapter reflects on an aspect of contemporary activism on weapons through an analogous story from literary tradition. Shahrazade, convenor of the 1001 Nights, offers a potent metaphor for the humanitarian advocacy seeking to moderate the behaviour of violent people. The author reads Don Quixote in Cambodia's minefields, reflects on Lysistrata at Greenham Common and considers how tropes in *The Tempest* were enrolled in both Pacific nuclear testing and efforts to resist it. The book draws on ethnographic fieldwork in communities affected by weapons and disarmament advocacy at the UN and calls for a re-enchantment of IR alive to affect ritual and myth.

Barack Obama and the Arab Spring Ahmed Y. Zohny, 2021-06-22. In *Barack Obama and the Arab Spring: A Successful Balancing Act of Foreign Policy and Diplomacy*, Ahmed Zohny develops a well-blended marriage of history and political theories of U.S. foreign policy, diplomacy, public diplomacy and national security. In this interdisciplinary research, he uses data and findings from both the Arabic and English languages by genealogically examining President Obama's foreign policy and diplomacy in response to the chronology of the unfolding events of the 2011 Arab Spring in Tunisia, Egypt, Libya, Syria, Bahrain and Yemen. President Obama and his top diplomats' performances in response to each country's events are assessed critically, analyzed and compared to one another in terms of the U.S. bilateral relations with each country, U.S. national interests and her strategic goals in the Middle East region. The findings of this research indicate that President Obama's foreign policy and public diplomacy toward the Arab Spring proved to be a successful balancing act, prudent and in the best national interests of the United States in the Middle East.

Why We Fight Christopher Blattman, 2022-04-19. *Why We Fight* reflects Blattman's expertise in economics, political science and history. Blattman is a great storyteller with important insights for us all. Richard H. Thaler, winner of the Nobel Memorial Prize in Economic Sciences and coauthor of *Nudge*, engaging and profound. This deeply searching book explains the true origins of warfare and it illustrates the ways that despite some contrary appearances, human beings are capable of great goodness. Nicholas A. Christakis, author of *Blueprint: The Evolutionary Origins of a Good Society*. Why did Russia attack Ukraine? Will China invade Taiwan and launch WWII? Why has the number of civil wars reached their highest level in decades? Why are so many cities in the Americas plagued with violence? And finally, what can any of us do about it? It feels like we're surrounded by violence. Each conflict seems unique and insoluble. With a reason for every war and a war for every reason, what hope is there for peace? Fortunately, it's simpler than that. *Why We Fight* boils down decades of economics, political science, psychology and real-world interventions, giving us some counterintuitive answers to

the question of war The first is that most of the time we don't fight Around the world there are millions of hostile rivalries yet only a fraction erupt into violence Most enemies loathe one another in peace The reason is simple war is too costly to fight It's the worst way to settle our differences In those rare instances when fighting ensues that means we have to ask ourselves What kept rivals from the normal grudging compromise The answer is always the same It's because a society or its leaders ignored those costs of war or were willing to pay them Why We Fight shows that there are just five ways this happens From warring states to street gangs ethnic groups and religious sects to political factions Christopher Blattman shows that there are five reasons why violent conflict occasionally wins over compromise Through Blattman's time studying Medellin Chicago Liberia Northern Ireland and more we learn the common logics driving vainglorious monarchs dictators mobs pilots football hooligans ancient peoples and fanatics Why We Fight shows that war isn't a series of errors accidents and emotions gone awry There are underlying strategic ideological and institutional forces that are too often overlooked So how to get to peace Blattman shows that societies are surprisingly good at interrupting and ending violence when they want to even gangs do it The best peacemakers tackle the five reasons shifting incentives away from violence and getting rivals back to dealmaking And they do so through tinkering not transformation Realistic and optimistic this is a book that lends new meaning to the adage Give peace a chance

The Time of Global Politics Christopher McIntosh,2023-12-07 How can we better relate and respond to the political times we inhabit Temporal relationships play a central role in the questions at the heart of global politics but political commentators and observers focus almost exclusively on the past as a means of predicting and preparing for the future Christopher McIntosh argues that although past events are meaningful for

our collective future the present remains vitally important McIntosh emphasises the importance of the present as a conceptual resource and analytical category for thinking about international politics The present he suggests places an orientation toward difference and a recognition of the human limits of understanding alongside an emphasis on process and change This book will shift current thinking about prediction and better enable the use of knowledge about international politics to meaningfully and positively intervene in present day concerns
