Theorizing Revolutions Warwick St In European Philosophy:

Theorizing Modernity Peter Wagner, 2001-03-20 This book argues that sociology has lost its ability to provide critical diagnoses of the present human condition because sociology has stopped considering the philosophical requirements of social enquiry The book attempts to restore that ability by retrieving some of the key questions that sociologists tend to gloss over inescapability and attainability The book identifies five key questions in which issues of inescapability and attainability emerge These are the questions of the certainty of our knowledge the viability of our politics the continuity of our selves the accessibility of the past and the transparency of the future The book demonstrates how these questions are addressed in different forms and by different intellectual Modern Movements in European Philosophy Richard Kearney, 1995-01-15 In this now classic textbook Richard Kearney surveys the work of nineteen of this century's most influential European thinkers The second edition has a new chapter devoted to Julia Kristeva whose work in the fields of semiotics and psychoanalytic theory has made a significant contribution to recent continental thought The British Study of Politics in the Twentieth Century Jack Hayward, Brian Barry, Archie Brown, 2003-05-01 The distinctive strength of political science in Britain is revealed in this indispensable guide to modern British scholarship in the field As well as charting the development of the discipline the essays examine the innovative contributions to the study of nationalism totalitarianism and authoritarianism and the influential British approach to international relations The fourteen distinguished authors have provided a major contribution to our understanding of the contemporary state of political science Encountering the Nigerian State W. Adebani, E. Obadare, 2010-07-05 This volume advances extant reflections on the state constituted as the Ur Power in society particularly in Africa It analyzes how various agents within the Nigerian society encounter the state ranging from the most routine form of contact to the spectacular While many recent collections have reheated the old paradigms of the perils of federalism corruption ethnicity etc our focus here is on encounter that is the nuance and complexity of how the state shapes society and vice versa Through this we depart from the standard state versus society approach that proves so limiting in explaining the African political landscape **The Oxford Handbook of the History of Physics** Jed Z. Buchwald, Robert Fox, 2013-10 This Oxford Handbook brings together contributions by leading authorities on key areas of the history of physics since the seventeenth century In a single volume it offers a comprehensive introduction to scholarly contributions that have tended to be dispersed in journals and books not easily accessible to the student or general reader British Books, 1906 The Political Thought of John Holloway Alfonso García Vela, Alberto Bonnet, 2023-08-16 This book provides renewed reflection and critical discussion on John Holloway's political and theoretical thought Two decades ago in *Change the World without Taking Power* Holloway set out on a path that he followed a decade later in *Crack Capitalism* and continues to walk today with his new book *Hope in Hopeless Times* The contributions in this volume critically analyze his innovative attempt to rethink the meaning and dynamics of revolution in the conditions of contemporary capitalism More than ten years after the

publication of *Crack Capitalism* this volume aims to question Holloway's attempt as well as his theoretical foundations in his original rereading of Marxism and Critical Theory and their relations with the characteristics adopted by the anti-capitalist struggles during the last two decades. Its authors from different geographies, traditions, and scientific disciplines establish throughout its pages a fruitful dialogue convened by Holloway's innovative ideas.

Representing Electrons Theodore Arabatzis, 2006

Both a history and a metahistory, *Representing Electrons* focuses on the development of various theoretical representations of electrons from the late 1890s to 1925 and the methodological problems associated with writing about unobservable scientific entities. Using the electron or rather its representation as a historical actor, Theodore Arabatzis illustrates the emergence and gradual consolidation of its representation in physics, its career throughout old quantum theory, and its appropriation and reinterpretation by chemists. As Arabatzis develops this novel biographical approach, he portrays scientific representations as partly autonomous agents with lives of their own. Furthermore, he argues that the considerable variance in the representation of the electron does not undermine its stable identity or existence. Raising philosophical issues of contentious debate in the history and philosophy of science, namely scientific realism and meaning change, Arabatzis addresses the history of the electron across disciplines, integrating historical narrative with philosophical analysis in a book that will be a touchstone for historians and philosophers of science and scientists alike.

Political Economy as Theodicy David L. Blaney, 2024-03-05

Political Economy as Theodicy Progress. *Suffering and Denial* proposes that political economics operates within a theological symbolic order that dictates modern sociopolitical and economic life as a whole. This book revisits the work of key figures in the history of political economy and economic thought, primarily Adam Smith, Bernard Mandeville, David Hume, Thomas Malthus, W. Stanley Jevons, Alfred Marshall, and John Bates Clark. *Theodicy* is a constitutive element of an international political economy (IPE) that often disavows moral evil while it conversely redefines such evil as an actual good within economic life. Beginning with the Enlightenment thinkers and continuing through to the modern neoclassical economists, this book traces the initial emergence of a natural theological basis for political economic thinking and concludes with a discussion of its application in modern IPE. Relying upon a postcolonial framework, the author seeks to provincialize economics, creating space for alternative modes of being and doing. This book will appeal to scholars and advanced students of IPE, political theology, international relations, and postcolonial studies.

Tipping Point for Advanced Capitalism D.W. Livingstone, 2023-09-07T00:00:00Z

Tipping Point for Advanced Capitalism is a pathbreaking study of the changing class makeup of the Canadian, other G7, and Nordic labour forces since the 1980s, documenting especially the rise of non-managerial professional employees. The book provides unprecedented tracking of the links between employment classes and higher levels of class consciousness, including the often hidden political consciousness of corporate capitalists as well as the extent of oppositional and revolutionary consciousness among non-managerial workers. The large differences exposed

between class conscious capitalists and these non managerial workers on issues of poverty reduction and global warming reveal the strategic roles these key class agents play in actions to defend or transform advanced capitalism The most concerted evidence based study to bring class back into grasping the intimately linked ecological economic and political crises we now face

Ether and Modernity Jaume Navarro, 2018-09-05 Ether and Modernity offers a snapshot of the status of an epistemic object the ether or aether in the early twentieth century The contributed papers show that the ether was often regarded as one of the objects of modernity hand in hand with the electron radioactivity or X rays and not simply as the stubborn residue of an old fashioned long discarded science The prestige and authority of scientists and popularisers like Oliver Lodge and Arthur Eddington in Britain Phillip Lenard in Germany or Dayton C Miller in the USA was instrumental in the preservation defence or even re emergence of the ether in the 1920s Moreover the consolidation of wireless communications and radio broadcasting indeed a very modern technology brought the ether into audiences that would otherwise never have heard about such an esoteric entity The ether also played a pivotal role among some artists in the early twentieth century the values of modernism found in the complexities and contradictions of modern physics such as wireless action or wave particle puzzles a fertile ground for the development of new artistic languages in literature as much as in the pictorial and performing arts Essays on the intellectual foundations of Umberto Boccioni's art the linguistic techniques of Lodge and Ernst Mach's considerations on aesthetics and physics witness to the imbricate relationship between the ether and modernism Last but not least the ether played a fundamental part in the resurgence of modern spiritualism in the aftermath of the Great War This book examines the complex array of meanings strategies and milieus that enabled the ether to remain an active part in scientific and cultural debates well into the 1930s but not beyond This portrait may be easily regarded as the swan song of an epistemic object that was soon to fade away as shown by Paul Dirac's unsuccessful attempt to resuscitate some kind of aether in 1951 with which this book finishes

Making 20th Century Science Stephen G. Brush, Ariel Segal, 2015 Historically the scientific method has been said to require proposing a theory making a prediction of something not already known testing the prediction and giving up the theory or substantially changing it if it fails the test A theory that leads to several successful predictions is more likely to be accepted than one that only explains what is already known but not understood This process is widely treated as the conventional method of achieving scientific progress and was used throughout the twentieth century as the standard route to discovery and experimentation But does science really work this way In Making 20th Century Science Stephen G Brush discusses this question as it relates to the development of science throughout the last century Answering this question requires both a philosophically and historically scientific approach and Brush blends the two in order to take a close look at how scientific methodology has developed Several cases from the history of modern physical and biological science are examined including Mendeleev's Periodic Law Kekule's structure for benzene the light quantum hypothesis quantum mechanics chromosome theory and natural selection In general it is found that

theories are accepted for a combination of successful predictions and better explanations of old facts Making 20th Century Science is a large scale historical look at the implementation of the scientific method and how scientific theories come to be accepted

New Cultural Studies Clare Birchall, Gary Hall, 2006-01-01 New Cultural Studies is both an introductory reference work and an original study which explores new directions and territories for cultural studies A new generation has begun to emerge from the shadow of the Birmingham School It is a generation whose whole education has been shaped by theory and who frequently turn to it as a means to think through some of the issues and current problems in contemporary culture and cultural studies In a period when departments which were once hotbeds of high theory are returning to more sociological and social science oriented modes of research and 9 11 and the war in Iraq especially have helped create a sense of post theoretical political urgency which leaves little time for the elitist Eurocentric textual concerns of Theory theoretical approaches to the study of culture have for many of this generation never seemed so important or so vital New Cultural Studies explores theory s past present and most especially future role in cultural studies It does so by providing an authoritative and accessible guide for students and teachers alike to the most innovative members of this new generation the thinkers and theories currently influencing new work in cultural studies Agamben Badiou Deleuze Derrida Hardt and Negri Kittler Laclau Levinas and iek the new territories currently being mapped out across the intersections of cultural studies and cultural theory anti capitalism ethics the posthumanities post Marxism and the transnational

Classical Marxism in an Age of Capitalist Crisis William Briggs, 2019-03-14 Will capitalism survive forever Capitalism has always lived in and with crisis Wars revolutions economic depression and repeated recessions the threat of nuclear annihilation and ecological disaster have all failed to break the dominance of this economic and political system Challenging the predominance of capitalism in a world fraught with inequalities this book returns to classical Marxism to reaffirm its relevance It explores the contradictions within capitalism as well as explains why Marxism has been unable to mount a sustained challenge to capitalism In order to explore concrete alternatives in a period of increasing capitalist globalisation and crisis it goes on to present perspectives by which theory and practice might be reunited to building independent political and organisational structures A search for something better this volume will be an engaging read for scholars and researchers of politics especially political theory and political economy economics and sociology

Posthuman Glossary Rosi Braidotti, Maria Hlavajova, 2018-02-22 If art science and the humanities have shared one thing it was their common engagement with constructions and representations of the human Under the pressure of new contemporary concerns however we are experiencing a posthuman condition the combination of new developments such as the neoliberal economics of global capitalism migration technological advances environmental destruction on a mass scale the perpetual war on terror and extensive security systems with a troublesome reiteration of old unresolved problems that mean the concept of the human as we had previously known it has undergone dramatic transformations The Posthuman Glossary is a volume providing an

outline of the critical terms of posthumanity in present day artistic and intellectual work It builds on the broad thematic topics of Anthropocene Capitalocene eco sophies digital activism algorithmic cultures and security and the inhuman It outlines potential artistic intellectual and activist itineraries of working through the complex reality of the posthuman condition and creates an understanding of the altered meanings of art vis vis critical present day developments It bridges missing links across disciplines terminologies constituencies and critical communities This original work will unlock the terms of the posthuman for students and researchers alike The SAGE Handbook of Marxism Beverley Skeggs, Sara R. Farris, Alberto Toscano, Svenja Bromberg, 2021-11-17 The past decade has witnessed a resurgence of interest in Marxism both within and without the academy Marxian frameworks concepts and categories continue to be narratively relevant to the features and events of contemporary capitalism Most crucially an attention to shifting cultural conditions has lead contemporary researchers to re confront some classical and essential Marxist concepts as well as elaborating new critical frameworks for the analysis of capitalism today The SAGE Handbook of Marxism showcases this cutting edge of today s Marxism It advances the debate with essays that rigorously map and renew the concepts that have provided the groundwork and main currents for Marxist theory and showcases interventions that set the agenda for Marxist research in the 21st century A rigorous and challenging collection of scholarship this book contains a stunning range of contributions from contemporary academics writers and theorists from around the world and across disciplines invaluable to scholars and graduate students alike Part 1 Reworking the critique of political economy Part 2 Forms of domination subjects of struggle Part 3 Political perspectives Part 4 Philosophical dimensions Part 5 Land and existence Part 6 Domains Part 7 Inquiries and debates *Bookseller and the Stationery Trades' Journal* ,1886 **The Bookseller** ,1909 Official organ of the book trade of the United Kingdom
