Decentralization and Governance Capacity Evrim Tan, 2018-11-27 It is widely assumed that the relationship between governance capacity and decentralization determines the success in governance but how does this relationship function is largely contested Does decentralization lead to an improvement in governance capacities or are certain capacities preconditioned in order for decentralization to lead better governance Relying on an empirical study of Turkish provincial municipalities the book argues success in decentralization is strongly influenced by the socioeconomic conditions in the province and to a lesser extent by the local government s capacity The book provides a novel approach to capacity building practices and decentralization reforms by suggesting that the relationship between decentralization and governance capacity should be addressed not only on the organizational but also on the developmental level In this way the book proposes asymmetrical decentralization according to socio economic development at subnational level for better governance outcomes

Devolution and Localism in England David M. Smith, Enid Wistrich, 2016-04-22 Combining historical and policy study with empirical research from a qualitative study of regional elites this book offers an original and timely insight into the progress of devolution of governance in England With particular interest in how governments have tried and continue to engage English people in sub national democratic processes while dealing with the realities of governance it uses in depth interviews with key figures from three English regions to get the inside view of how these processes are seen by the regional

and local political administrative business and voluntary sector elites who have to make policies work in practice Tracing the development of decentralisation policies through regional policies up to and including the general election in 2010 and the radical shift away from regionalism to localism by the new Coalition Government thereafter the authors look in detail at some of the key policies of the incumbent Coalition Government such as City Regions and Localism and their implementation Finally they consider the implications of the existing situation and speculate on possible issues for the future The Ashgate Research Companion to Planning Theory Patsy Healey, 2016-11-03 At a time of potentially radical changes in the ways in which humans interact with their environments through financial environmental and or social crises the raison d'être of spatial planning faces significant conceptual and empirical challenges This Companion presents a multidimensional collection of critical narratives of conceptual challenges for spatial planning The authors draw on various disciplinary traditions and theoretical frames to explore different ways of conceptualising spatial planning and the challenges it faces Through problematising planning itself the values which underpin planning and theory practice relations contributions make visible the limits of established planning theories and illustrate how by thinking about new issues or about issues in new ways spatial planning might be advanced both theoretically and practically There cannot be definitive answers to the conceptual challenges posed but the authors in this collection provoke critical questions and debates over important issues for spatial planning and its future A key question is not so much what planning theory is but what might planning theory do in times of uncertainty and complexity An underlying rationale is that planning theory and practice are intrinsically connected The Companion is presented in three linked parts issues which arise from an interactive understanding of the relations between planning ideas and the political institutional contexts in which such ideas are put to work key concepts in current theorising from mainly poststructuralist perspectives and what discussion on complexity may offer planning theory and practice

2012-2013 UNCG Graduate School Bulletin, Metropolitan Resilience in a Time of Economic Turmoil Michael A. Pagano, 2013-12-15 Cities counties school districts and other local governments have suffered a long lasting period of fiscal challenges since the beginning of the Great Recession Metropolitan governments continue to adjust to the new normal of sharply lower property values consumer sales and personal income Contributors to this volume include elected officials academics key people in city administrations and other nationally recognized experts who discuss solutions to the urban problems created by the Great Recession Metropolitan Resilience in a

Time of Economic Turmoil looks at the capacity of local governments to mobilize resources efficiently and effectively as well as the overall effects of the long term economic downturn on quality of life. Introducing the reader to the fiscal effects of the Great Recession on cities, the book examines the initial fraying and subsequent mending of the social safety net, the opportunities for pursuing economic development strategies, the challenges of inter jurisdictional cooperation and the legacy costs of pension liabilities and infrastructure decay. Contributors are Phil Ashton, Raphael Bostic, Richard Feiock, Rachel A. Gordon, Rebecca Hendrick, Geoffrey J. D. Hewings, David Merriman, Richard Nathan, Michael A. Pagano, Breeze Richardson, Annette Steinacker, Nik Theodore, Rachel Weber, and Margaret Weir. *Community Development and Public Administration Theory* Ashley E. Nickels, Jason D. Rivera, 2018-04-17. The concept of community development is often misunderstood, holding different meanings across different academic disciplines. Moreover, the concept of community development has been historically abstracted, not only in the way the concept has been conceptualized in academic studies but also by the way in which practitioners use the term in the vernacular. Departing from traditional definitions of community development, this volume applies the New Public Service (NPS) perspective of Public Administration to community development to illustrate how public administrators and public managers can engage in community development planning and implementation that results in more equitable and sustainable long term outcomes. This book will be of interest to practitioners and researchers in public administration, management, public administration theory, community development, economic development, urban sociology, urban politics, and urban planning. *Reconstructing Urban Regime Theory* Mickey Lauria, 1997. Providing a robust conceptual framework, urban regime theory has, despite its cited shortcomings, gained a dominant position in the literature on local politics. In addition to its recent use in contexts outside the United States and in comparative cross national research, *Reconstructing Urban Regime Theory* presents a challenging argument for the need to reconceptualize urban regime's middle level abstractions by interpreting it through the higher level abstractions of regulationist theory. The contributors propose stronger conceptual linkages between local agents and institutions, regime transformation, and the restructuring of urban space. The blend of empirical and case study provides an excellent mix of theory and practice. **Taking English Planning Law Seriously** Maria Lee, Carolyn Abbot, 2022-10-24. Planning is at the heart of the response to many of the significant challenges of our time, from the climate and environmental crises to social and economic inequalities. It is embedded in, as well as partially constituting, our democratic systems so that the challenges of democratic decision making in a complex society cannot be avoided when thinking about planning. Planning law raises some of the most fundamental questions faced by legal scholars, from the legitimacy of authority to the relationship between public and private rights and interests. And yet, planning law has been relatively neglected by legal scholars. The objective of *Taking English Planning Law Seriously* is to create space for planning law scholarship in all of its variety and for curiosity about law in all its complexity. The chapters reflect this diversity and complexity, covering a range of the objects of planning from housing to

energy to highways and a multiplicity of planning tasks and tools from compulsory purchase to contracting to planning inquiries
