Roberts,1999-01-28 Clear and accessible this book is the first qualitative analysis of the complex conversations that occur between breast cancer patients and their oncologists Roberts focuses on discussions about possible avenues of treatment and shows them to be an active and mutual collaboration of information on the one hand and a subtle delineation of the roles of expert and novice on the other Her work highlights how doctors achieve a delicate balance between promoting one particular treatment option while not guaranteeing a cure Anthropological Linguistics ,1994 **The ^ALinguistic Individual**

Barbara Johnstone,1996-06-27 Linguists usually discuss language or dialects in terms of groups of speakers Believing that

patterns can be seen more clearly in the group than the individual researchers often present group scores with no indication of the variation within the group Even though linguists acknowledge that no two individuals speak alike few study individual variation and voice Barbara Johnstone makes a case for the individual s importance and idiosyncrasies in language and linguistics Using theoretical arguments and discourse analysis along with linguistic examples from a variety of speakers and settings Johnstone illustrates how speakers draw on linguistic models associated with class ethnicity gender and region among others to construct an individual voice In doing so Johnstone shows that certain important questions in sociolinguistics and pragmatics can only be answered with reference to individual speakers Johnstone s study is important both for the understanding of speech as expressive of self and for the study of variation and mechanisms of linguistic choice and change

The Language of Turn and Sequence Cecilia E. Ford, Barbara A. Fox, Sandra A. Thompson, 2002-02-28 This collection of previously unpublished cutting edge research discusses the conversation analysis CA approach to understanding language use CA is the dominant theory for analyzing the social use of language and is concerned with the description of how speakers engage in conversation and other forms of social interaction involving language Its proponents are not only linguists but sociologists and anthropologists as well The unifying theme of these chapters is the intersection of practice and form through the construction of turns and sequences

Language in Time Peter Auer, Elizabeth Couper-Kuhlen, Frank Müller, 1999 The authors here promote the reintroduction of temporality into the description and analysis of spoken interaction They argue that spoken words are in fact temporal objects and that unless linguists consider how they are delivered within the context of time they will not capture the full meaning of situated language use Their approach is rigorously empirical with analyses of English German and Italian rhythm all grounded in sequences of actual talk in interaction
