

Thermo Scientific Nicolet iS50 FT-IR Spectrometer

The Materials Analysis Workstation

The Thermo Scientific™ Nicolet™ iS™50 FT-IR spectrometer uniquely combines multi-tasking capabilities and high performance in an affordable, optimized footprint system. Extensive upgrade options include a built-in ATR, an automated beamsplitter exchanger and Raman, NIR, TGA-IR and GC-IR modules.

The main goal of the busy analytical laboratory, whether working with polymers, rubbers, pharmaceuticals, forensics or any other materials, is answering specific questions. The Nicolet iS50 FT-IR spectrometer provides smarter tools – both in the instrument and in the software – to lead you to definitive answers.

The Nicolet iS50 system couples multiple sources, sampling stations and detection options through Touch Point one-touch setup and operation, especially when driven by the iS50 ATRC automated beamsplitter exchanger. Built-in tools leave open options, such as simultaneous installation of a sample compartment iS50 Raman module and the iS50 ATR multi-range, diamond sampling station.

All offerings you have come to know, like Thermo Scientific Smart Accessories™ and System Performance Verification, are supported on the Nicolet iS50.

In the most demanding laboratory situations, full validation is available along with hybridated tools like the iS50 GC-IR module and the TGA-IR accessory. The Thermo Scientific OMNIC™ software contains new tools such as the Mercury TGA and Mercury GC analysis routines, auto-reporting and the archiving of analysis results when you save your data.

Experience FT-IR beyond the ordinary with the Nicolet iS50 FT-IR spectrometer.
