

C58/J MOUSE STRAIN : HEALTH CHARACTERISTICS

They have a short lifespan of around one year due to their extremely high incidence of tumor development and leukemia, with leukemia affecting 97% of individuals. Leukemia arises from endogenous expression of a murine leukemia virus, with the number of cells infected in each individual increasing as a function of age.

C58/J mice express the mutant allele (Chain 1) of the Interleukin 3 receptor alpha chain in their bone marrow cells, making these cells insensitive to this important cytokine, thereby causing difficulty in the production of sufficient hematopoietic cells.

Mice of this strain were reported as not susceptible to obesity.

They exhibit intermediate susceptibility to the development of atherosclerosis when placed on an atherogenic diet.

A Natural History of the Brown Mouse Lemur Sylvia Atsalis, 2015-09-30 This text can be used for any undergraduate

or graduate course with a primate behavior or primate ecology component It can also be used as supplemental reading for any advanced animal behavior class There are very few books that address the biology of nocturnal primates There are even fewer that delve with any detail regarding the behavior of specific species These animals are difficult to follow Their diminutive size the thickness of the vegetation and their nocturnal habits make the study of their habits a demanding task Through a trial of patience Sylvia Atsalis has undertaken this task Here she provides an in depth view at the life and behavioral patterns of these tiny primates A Natural History of the Brown Mouse Lemur provides the most complete look at the behavior and ecology of mouse lemurs *The Physiological Genomics of the Critically Ill Mouse* Can Ince, 2012-12-06

The physiological genomics of the cardiovascular system studies the relationship between gene and physiological dysfunction It is a rapidly developing area of research and distinguishes itself from other areas of molecular medicine by its highly integrative nature In this multidisciplinary area of the physiological sciences there is interaction between gene structure and physiological cardiovascular function as well as interactions between the different organs and their physiological compartments The mouse has played a central role in the study of genomics due to the detailed knowledge of the mouse genome and the wide availability of genetically modified mice In the past the mouse had mainly been used in the area of immunology and molecular biology and physiological interest in the mouse was scarce As more insight has come into the structural genomics of the mouse however it has become increasingly important to understand the relation between gene and physiological function With this in mind we have been organizing the Amsterdam Mouse Symposia to bring together different disciplines interested in the molecular basis of cardiovascular function see J of Clinical and Exp Pharmacology and Physiol 2002 29 A69 A102 for the proceedings of the 3 Amsterdam Mouse Symposium and Basic Research in Cardiol 2000 95 492 535 for the proceedings of the 2 symposium *The Mouse in Biomedical Research* Henry L. Lehman, Ute Radespiel, Elke Zimmermann, 2016-04-07 The dwarf and mouse lemurs of Madagascar are two very species rich lemur genera yet there is a relative paucity of information on this primate family in published literature In this first ever treatment of the Cheirogaleidae international experts are brought together to review and integrate our current knowledge of the behaviour physiology ecology genetics and biogeography of these species A wide range of direct and indirect research methods that are

currently used to study these cryptic nocturnal solitary foragers are described By uniting often disparate research on captive and free ranging taxa and synthesising recent methodological advances this book provides new insights that will encourage further studies of this fascinating primate family This synthesis will provide an incentive for more integrative studies of the Cheirogaleidae in captivity and in the wild enabling the impacts of deforestation and other factors to be identified and directions for future conservation efforts to be established American Book Publishing Record ,2001 *ILAR News* ,1972
