Industrial Policy and the World Trade Organization Sherzod Shadikhodjaev,2018-11-08 Highlights what national governments should know to properly conduct their industrial policies under the multilateral trading system

Trade Policy in Multilevel Government Christian Freudlsperger,2020-04-11 Trade Policy in Multilevel Government investigates how multilevel polities organize openness in a globalizing political and economic environment In recent years the multilevel politics of trade caught a broader public s attention not least due to the Wallonian regional parliament s initial rejection of the EU Canada trade deal in 2016 In all multilevel polities competencies held by states and regions have increasingly become the subject of international rule setting This is particularly so in the field of trade which has progressively targeted so called behind the border regulatory barriers In their reaction to this deep trade agenda constituent units in different multilevel polities have shown widely varying degrees of openness to liberalizing their markets Why is that This book argues that domestic institutions and procedures of intergovernmental relations are the decisive factor Countering a widely held belief

among practitioners and analysts of trade policy that involving subcentral actors complicates trade negotiations it demonstrates that the more voice a multilevel polity affords its constituent units in trade policy making the less the latter have an incentive to eventually exit from emerging trade deals While in shared rule systems constituent unit governments are directly represented along the entirety of the policy cycle in self rule systems territorial representation is achieved merely indirectly Shared rule systems are hence more effective than self rule systems in organizing openness to trade The book tests its theory's explanatory power on the understudied case of international procurement liberalization in extensive studies of three systems of multilevel government Canada the European Union and the United States WTO Accessions and Trade Multilateralism Uri Dadush, Chiedu Osakwe, 2015-09-10 An examination of how WTO accession negotiations have expanded the reach of the multilateral trading system both geographically and conceptually **Small and Medium-Sized Enterprises in International Economic Law** Thilo Rensmann, 2017-06-09 International economic law with its traditional focus on large multinational enterprises is only slowly waking up to the new reality of small and medium sized enterprises SMEs entering the global marketplace In the wake of the digital revolution smaller companies now play an important role in the global economic landscape In 2015 the UN expressly called for SMEs to have greater access to international trade and investment and it is increasingly recognized that the integration of SMEs provides one of the keys to creating a more sustainable and inclusive global economy As SMEs increasingly permeate transnational supply chains so interactions between these companies and international economic law and policy proliferate **Small and Medium sized Enterprises in International Economic Law** offers the first comprehensive analysis of the interaction between SMEs and international economic law This book presents a broad international perspective gathering together contributions by leading experts from academia legal practice and international organizations It opens up a field of enquiry into this so far unexplored dynamic and provide a touchstone for future debate The analysis covers a broad spectrum of international trade and investment law focusing on issues of particular interest to SMEs such as trade in services government procurement and trade facilitation Diverse perspectives illuminate regional developments in particular within the EU and the implications of mega regional free trade agreements The essays also examine questions of legitimacy of global economic governance in particular concerns surrounding the threat posed to the interests of domestic SMEs by the growing liberalization of international trade and investment These essays constitute essential reading for practitioners and academics seeking to navigate a previously neglected trend in international economic law **The EU Deep Trade Agenda** Billy Alexis Melo Araujo, 2016 Offering a doctrinal analysis of the EU's trade policy this volume examines the provisions of a generation of new trade agreements in the broader context of EU foreign policy objectives *Public Procurement and the EU Competition Rules* Albert Sánchez Graells, 2015-06-25 Public procurement and competition law are both important fields of EU law and policy intimately intertwined in the creation of the internal market Hitherto their close connection has been noted but not closely examined

This work is the most comprehensive attempt to date to explain the many ways in which these fields often considered independent of one another interact and overlap in the creation of the internal market. This process of convergence between competition and public procurement law is particularly apparent in the 2014 Directives on public procurement which consolidate the principle of competition in terms very close to those advanced by the author in the first edition. This second edition builds upon this approach and continues to ask how competition law principles inform and condition public procurement rules and whether the latter in their revised form are adequate to ensure that competition is not distorted. The second edition also deepens the analysis of the market behaviour of the public buyer from a competition perspective. Proceeding through a careful assessment of the general rules of competition and public procurement, the book constantly tests the efficacy of these rules against a standard of the proper functioning of undistorted competition in the market for public procurement. It also traces the increasing relevance of competition considerations in the case law of the Court of Justice of the European Union and sets out criteria and recommendations to continue influencing the development of EU Economic Law.

The Legality of Bailouts and Buy Nationals Kamala Dawar, 2017-09-21. This book offers a well argued and insightful critical assessment of the shortcomings of international trade and competition rules in tackling interventionist State measures in the context of an economic crisis. Dawar offers an evidence rich account of the challenges that State protectionism creates for international trade liberalisation and for the protection of competition in international markets. Her insights will be particularly interesting in the context of current events leading to another surge of State economic interventionism both for academics and for policy makers with an interest in international trade.

Dr Albert Sanchez Graells, University of Bristol Law School. This book bursts the bubble of the self congratulatory attitude that existing institutions which were set up to discipline governments from a race to the bottom on economic policy worked well after the financial crisis. These institutions may have prevented tariff wars, a big achievement compared to the time of the Great Depression. But they went along with the subsidies and state aid that governments put in place after 2007. Such flexibility on economic policy is essential in turbulent times. But these institutions are undermined if flexibility comes with a race to the bottom that shifts money away from policies for the more marginalized sections of society. At a time when the left behinds are changing the political landscape of the world, Kamala's book debunks the myth of the success of existing institutions in containing the economic fallout of the global financial crisis. It gives a sobering warning of what might unfold when institutions deal with economic challenges by turning a blind eye to their own rules for checking unfair competition.

Dr Swati Dhingra, Senior Lecturer at the Department of Economics, London School of Economics. An impressive contribution to our understanding of the financial crisis, Dawar's reading of bailouts and buy national through the lens of competition law and government procurement law and policy is inspirational.
