## **The Yellow River The Problem Of Water In Modern China:**

*The Yellow River* David A. Pietz, 2015-01-05 Flowing through the heart of the North China Plain home to 200 million people the Yellow River sustains one of China's core regions Yet this vital water supply has become highly vulnerable in recent decades with potentially serious repercussions for China's economic social and political stability The Yellow River is an investigative expedition to the source of China's contemporary water crisis mapping the confluence of forces that have shaped the predicament that the world's most populous nation now faces in managing its water reserves Chinese governments have long struggled to maintain ecological stability along the Yellow River undertaking ambitious programs of canal and dike construction to mitigate the effects of recurrent droughts and floods But particularly during the Maoist years the North China Plain was radically re-engineered to utilize every drop of water for irrigation and hydroelectric generation As David A Pietz shows Maoist water management from 1949 to 1976 cast a long shadow over the reform period beginning in 1978 Rapid urban growth industrial expansion and agricultural intensification over the past three decades of China's economic boom have been realized on a water resource base that was acutely compromised with effects that have been more difficult and costly to overcome with each passing decade Chronicling this complex legacy The Yellow River provides important insight into how water challenges will affect China's course as a twenty first century global power *The SAGE Handbook of Contemporary China* Weiping Wu, Mark Frazier, 2018-07-09 The study of contemporary China constitutes a fascinating yet challenging area of scholarly inquiry Recent decades have brought dramatic changes to China's economy society and governance Analyzing such changes in the context of multiple disciplinary perspectives offers opportunities as well as challenges for scholars in the field known as contemporary China Studies The SAGE Handbook of Contemporary China is a two volume exploration of the transformations of contemporary China firmly grounded in the both disciplinary and China specific contexts Drawing on a range of scholarly approaches found in the social sciences and history an international team of contributors engage with the question of what a rapidly changing China means for the broader field of contemporary China studies and identify areas of promising future research Part 1 Context History Economy and the Environment Part 2 Economic Transformations Part 3 Politics and Government Part 4 China on the Global Stage Part 5 China's Foreign Policy Part 6 National and Nested Identities Part 7 Urbanization and Spatial Development Part 8 Poverty and Inequality Part 9 Social Change Part 10 Future Directions for Contemporary China Studies *When the Yellow River Floods* Hui-Lin Hsu, 2024-01-09 When the Yellow River Floods explores the relationship between environmental degradation hydraulic engineering and nation building in the context of Liu E's *The Travels of Lao Can* This book contributes to the field by providing a unique perspective on modern Chinese literary history that goes beyond conventional narratives that focus solely on political and cultural factors The main areas covered include the role of water management in literary nation building and the connections between the novel's various themes such as river engineering medical and political discourses national

sentiment and landscape description The book is targeted toward scholars and students of Chinese literature history and environmental studies as well as those interested in the intersections between literature nation building and environmental challenges By offering a comprehensive and material based analysis of The Travels of Lao Can this book broadens the understanding of nation building in early twentieth century China highlighting the impact of environmental crises and hydraulics on the formation of national literature and consciousness The book provides a new perspective on the environmental roots of modern Chinese literature making it an essential read for those seeking to understand the complex interplay between literature the environment and national identity in China      **The Yellow River** David A. Pietz,2015-01-05

In the Maoist years the North China Plain was re engineered to use every drop of water for irrigation and hydroelectricity As David Pietz shows China s urban growth industrial expansion and agricultural intensification rested on compromised water resources with effects that cast a long shadow over China s future course as a global power      *China's Water Pollution Problems* Claudio O. Delang,2016-03-31

Water pollution is one of the most serious problems plaguing China today with millions of citizens drinking water unfit for consumption These abysmal conditions have fuelled increasing social discontent as people become more concerned by the need to address the pressing issues of water pollution scarcity and waste management This book describes how and why China has ended up in such a dire situation what the government is doing to address the problem and the difficulties encountered in attempting to reduce pollution The analysis is based on both gray literature newspaper articles NGO reports Chinese government information and on academic studies The gray literature gives a voice to those who suffer from the pollution their advocates and government officers and allows the reader to better grasp the conditions on the ground and the impact of the air pollution among the people in different areas in China The academic literature adds a theoretical perspective and brings these different case studies into a broader context This book will be of great interest to students of environmental pollution and contemporary Chinese studies looking for an introduction to the topic as well as researchers looking for an analysis of China s environmental problems      **How Maoism Was Made** Aaron William Moore,Jennifer Altehenger,2024-12-26

How Maoism Was Made features new scholarship on the early years after the Chinese Communist revolution showing how ordinary people in China built socialism through their contributions to industry science and the arts      Perspectives on Environmental History in East Asia Ts'ui-jung Liu,Micah Muscolino,2021-02-23

This edited volume engages with some of the most dynamic themes in current research on East Asian environmental history including agricultural science war and the environment imperial forestry oceanic history and the history of energy Chapters in this book supply an overview of environmental history as a rapidly expanding field continuing to generate valuable insights into the mutually constitutive relationship between human societies and the biophysical environment The book is divided into three parts Part I consists of three chapters related to land use while Part II includes five chapters that focus on water a topic of perennial concern among environmental historians of East Asia especially as it

relates to irrigation food production and marine fisheries Part III consists of two chapters discussing the impact of new technologies on air quality in addition to the history of energy in East Asia which has emerged as an important area of inquiry at the intersection between both environmental history and the history of science and technology Perspectives on Environmental History in East Asia Changes in the Land Water and Air will appeal to students and scholars of East Asian studies environmental history and environmental sciences The Nature of Disaster in China Chris Courtney,2018-02-15 In 1931 China suffered a catastrophic flood that claimed millions of lives This was neither a natural nor human made disaster Rather it was created by an interaction between the environment and society Regular inundation had long been an integral feature of the ecology and culture of the middle Yangzi yet by the modern era floods had become humanitarian catastrophes Courtney describes how the ecological and economic effects of the 1931 flood pulse caused widespread famine and epidemics He takes readers into the inundated streets of Wuhan describing the terrifying and disorientating sensory environment He explains why locals believed that an angry Dragon King was causing the flood and explores how Japanese invasion and war with the Communists inhibited both official relief efforts and refugee coping strategies This innovative study offers the first in depth analysis of the 1931 flood and charts the evolution of one of China s most persistent environmental problems *Historical Dictionary of the Chinese Environment* Lawrence R. Sullivan,Nancy Liu-Sullivan,2019-10-08 The largest emitter of green house gases since 2007 and top polluter of the increasingly stressed Pacific Ocean the People s Republic of China is both a major contributor to environmental degradation and a leading contender to mitigate and stabilize global environmental conditions Reviewing the history of the PRC from the periods of central economic planning 1953 1978 followed by the single minded pursuit of economic growth and mass consumption beginning in 1978 1979 to the adoption of a more balanced approach stressing environmental protection and restoration beginning in the 1990s Historical Dictionary of the Chinese Environment documents both the enormous damage to the country s natural environment and the dramatic attempts by the Chinese government and environmental non government organizations ENGOs at environmental amelioration and restoration Historical Dictionary of the Chinese Environment contains a chronology an introduction appendixes and an extensive bibliography The dictionary section has over 200 cross referenced entries on environmental degradation including air and water pollution deforestation desertification and resource depletion while efforts at amelioration and restoration include river and waterway clean ups reforestation and desert control restoration of fisheries creation of national nature reserves along with energy conservation and development of renewables such as solar and wind power This book is an excellent resource for students researchers and anyone wanting to know more about the Chinese Environment Dikes and Society in Rural China: The Jiangnan Plain, 1788-2010s Jiayan Zhang,2025-08-04 To feed an ever growing population in a water rich region the people of the Jiangnan Plain in Central China constantly built dikes and polders As China s political system changed dramatically from 1788 to the 2010s the

governance of Jiangnan's dikes and polders also changed moving from indirect supervision by the state to direct management. This shift has dramatically improved the security of the dike systems and has had a profound impact on the Jiangnan people's lives. Based on rarely used local gazetteers and newly available archival materials, this book uses a multidimensional interactive approach to explore water control and state-society relations in rural China over the past three centuries.

**Water Supply in a Mega-City** Michael Webber, Jon Barnett, Brian Finlayson, 2018-11-30. With the increasing threat of depleted and contaminated water supplies around the world, this book provides a timely and much-needed analysis of how cities should manage this precious resource. Integrating the environmental, economic, political, and socio-cultural dimensions of water management, the authors outline how future mega-city systems can maintain a high quality of life for its residents.

Water Management in the Yellow River Basin of China Charles Greer, 2014-07-03. Throughout history, the Yellow River or Huang Ho has repeatedly broken through its levees to rampage over the densely populated North China Plain. In spite of its importance as the major river of China, little has been written on the Yellow River and its management. Charles Greer fills this gap with his comprehensive and thoroughly researched book. This work deals with the technological problems faced by the Chinese in taming the destructive river and also focuses on cultural attitudes that have governed the Chinese response to nature. For example, water control was not highly regarded by the Taoists who preferred to let nature take its course, but the Buddhists sought to harness the river against devastating floods and also to benefit their crops. Greer traces water use and management in the Yellow River Basin through Chinese history and discusses early Western interest in the flood problem and Soviet assistance in Yellow River development. He analyzes traditional methods of control as well as newer strategies and their implications. The author of this book is one of a small number of social scientists able to master the original Chinese language historical materials necessary to this undertaking. He has also examined Chinese water management methods first hand as part of a delegation of water management specialists in 1976. In addition to geographers and conservationists, Chinese scholars will find this book valuable because of the axial role the control of the Yellow River plays in the fundamental economic health of the People's Republic of China. Water management engineers will find much useful comparative material.

**Historical Dictionary of the People's Republic of China** Lawrence R. Sullivan, 2016-08-03. When the Chinese Communist Party (CCP) assumed power in October 1949, China was one of the poorest nations in the world and so weak it had been conquered in the late 1930s and early 1940s by its neighbor Japan, a country one-tenth its size. More than five decades later, the People's Republic of China (PRC) is an emerging economic, political, and major military power with the world's fastest growing economy and largest population (1.35 billion in 2015). A member of the United Nations Security Council since the early 1970s and a nuclear power, China wields enormous influence in the world community while at home, what was once a nation of largely poverty-stricken peasants and urban areas with little to no industry has been transformed into an increasingly urbanized society with a growing middle class and an industrial and service sector that leads the world in such

industries as steel and textiles while becoming a major player in computers and telecommunications All the while the country has remained under the tight political control of a one party system dominated by the Chinese Communist Party that despite periods of intense political conflict and turmoil governs China with a membership in 2014 of 88 million people the largest single organization on earth This third edition of Historical Dictionary of the People's Republic of China contains a chronology an introduction appendixes and an extensive bibliography The dictionary section has over 700 cross referenced entries on important personalities politics economy foreign relations religion and culture This book is an excellent access point for students researchers and anyone wanting to know more about China

**Famine Relief in Warlord China** Pierre

Fuller, 2021-03-01 Famine Relief in Warlord China is a reexamination of disaster responses during the greatest ecological crisis of the pre Nationalist Chinese republic In 1920 1921 drought and ensuing famine devastated more than 300 counties in five northern provinces leading to some 500 000 deaths Long credited to international intervention the relief effort Pierre Fuller shows actually began from within Chinese social circles Indigenous action from the household to the national level modeled after Qing era relief protocol sustained the lives of millions of the destitute in Beijing in the surrounding districts of Zhili Hebei Province and along the migrant and refugee trail in Manchuria all before joint foreign Chinese international relief groups became a force of any significance Using district gazetteers stele inscriptions and the era's vibrant Chinese press Fuller reveals how a hybrid civic sphere of military authorities working with the public mobilized aid and coordinated migrant movement within stricken communities and across military domains Ultimately the book's spotlight on disaster governance in northern China in 1920 offers new insights into the social landscape just before the region's descent over the next decade into incessant warfare political struggle and finally the normalization of disaster itself

Water, Technology and the Nation-State Filippo Menga, Erik Swyngedouw, 2018-05-15 Just as space territory and society can be socially and politically co constructed so can water and thus the construction of hydraulic infrastructures can be mobilised by politicians to consolidate their grip on power while nurturing their own vision of what the nation is or should become This book delves into the complex and often hidden connection between water technological advancement and the nation state addressing two major questions First the arguments deployed consider how water as a resource can be ideologically constructed imagined and framed to create and reinforce a national identity and secondly how the idea of a nation state can and is materially co constituted out of the material infrastructure through which water is harnessed and channelled The book consists of 13 theoretical and empirical interdisciplinary chapters covering four continents The case studies cover a diverse range of geographical areas and countries including China Cyprus Egypt Ethiopia France Nepal and Thailand and together illustrate that the meaning and rationale behind water infrastructures goes well beyond the control and regulation of water resources as it becomes central in the unfolding of power dynamics across time and space

**Blue Skies over Wuhan** Yun

Liu, 2025-08-01 China is one of the world's largest industrial polluters and balancing the environmental concerns of citizens

the demands of industry and the interests of the nation is a complex challenge Blue Skies over Wuhan uses Hubei Province particularly its sprawling industrial capital Wuhan City as a case study of growing environmental awareness in China in the 1970s and 80s Yun Liu painstakingly sifts through a wealth of incident records to explore the evolution of environmental protection policy Reports document repeated sectoral conflicts in this early system of crisis management when measures to contain industrial emissions largely failed because of inadequate policy implementation Nonetheless the attention that Blue Skies over Wuhan gives to newly uncovered evidence reveals a symbiotic relationship between communities and state actors that shaped the trajectory of environmental governance from an agenda dominated by economic growth priorities to a more mature state led approach

**Landscape Change and Resource Utilization in East Asia** Ts'ui-jung Liu,Andrea Janku,David Pietz,2018-05-15 Covering the ancient period through to the 21st century this book examines how landscapes have changed across East Asia over time Featuring examples of a variety of landscapes from the riverine and agricultural to the urban and aesthetic this books thus presents a comprehensive review of East Asian environmental history The eleven chapters written by an international team of leading scholars provide analysis of a wide range of spatial temporal and thematic considerations Seeking to use the concept of landscape to evaluate the opportunities and constraints faced by East Asian communities it also explores the relationship between landscape transformation and human agency In so doing it aims to survey the current methodology and scholarship in the field and demonstrate a new approach which encompasses socio economic and cultural history as well as GIS based geographical studies Providing an in depth examination of landscape change across the sub regions of China and Japan this book will be useful to students and scholars of Asian History and Environmental Studies

**Flowing Progress** Stefan Dorondel,Luminita Gatejel,2025-08-15 Flowing Progress Transforming the Danube Through Infrastructure focuses on how different political regimes and forms of governance have imagined and technologically transformed the most international river in the world Multidisciplinary and drawing on methodologies of history anthropology of infrastructure and science technology and society this collection explores the tensions between the river and its natural pulses the humans that populate its floodplains state agencies and infrastructure The book engages the concept of disturbance to point out the circular and spiraling dynamics between hydrological processes and technopolitical and economic practices Disturbance denotes a specific type of long term dynamic between human attempts to control the Danube the material systems they implemented to achieve these goals and the agency of the river that both enabled the functioning of infrastructure and the breakdown of such arrangements It draws particular attention to the concerted efforts to contain and optimize the Danube s flow adding layer after layer of dams channels and pipes that could potentially escalate the power of a leashed river Taking a longer historical perspective from the sixteenth century until today the volume provides a variety of relevant case studies and local contexts in the Ottoman and Habsburg empires and their successor states Austria Hungary Bulgaria Romania and Serbia which show different ways of how humans have imagined and coped with this mighty

river     **Anxiety Aesthetics** Jennifer Dorothy Lee, 2024-02-06 Anxiety Aesthetics is the first book to consider a prehistory of contemporaneity in China through the emergent creative practices in the aftermath of the Mao era. Arguing that socialist residues underwrite contemporary Chinese art, complicating its theorization through Maoism, Jennifer Dorothy Lee traces a selection of historical events and controversies in late 1970s and early 1980s Beijing. Lee offers a fresh critical frame for doing symptomatic readings of protest ephemera and artistic interventions in the Beijing Spring social movement of 1978-80, while exploring the rhetoric of heated debates waged in institutional contexts prior to the 85 New Wave. Lee demonstrates how socialist aesthetic theories and structures continued to shape young artists' engagement with both space and selfhood and occupied the minds of figures looking to reform the nation. In magnifying this fleeting moment, Lee provides a new historical foundation for the unprecedented global exposure of contemporary Chinese art today.     Yangzi Waters: Transforming the Water Regime of the Jiangnan Plain in Late Imperial China Yan Gao, 2022-01-17 This book centers on the changes of polders and investigates the complex hydro-social relationships of the Jiangnan Plain in late imperial China. Once a hydraulic frontier where local communities managed the polders, the Jiangnan Plain became a state-led hydro-electric powerhouse by the mid-twentieth century. Through meticulous historical analysis, this book shows how water politics, cultural practice, and ecology interplayed and transformed the landscape and waterscape of the plain from a long-term perspective. By touching on topics such as religious beliefs, ethnic tension, and militarization, the author reveals a plain in between nature and culture that has never been fully examined before.
