The World Without Us By Alan Weisman:

The World Without Us Alan Weisman, 2008-08-05 A penetrating take on how our planet would respond without the relentless pressure of the human presence *Countdown* Alan Weisman, 2013-09-24 A powerful investigation into the chances for humanity's future from the author of the bestseller *The World Without Us* In his bestselling book *The World Without Us* Alan Weisman considered how the Earth could heal and even refill empty niches if relieved of humanity's constant pressures Behind that groundbreaking thought experiment was his hope that we would be inspired to find a way to add humans back to this vision of a restored healthy planet only in harmony not mortal combat with the rest of nature But with a million more of us every 4 1 2 days on a planet that's not getting any bigger and with our exhaust overheating the atmosphere and altering the chemistry of the oceans prospects for a sustainable human future seem ever more in doubt For this long awaited follow up book Weisman traveled to more than 20 countries to ask what experts agreed were probably the most important questions on Earth and also the hardest How many humans can the planet hold without capsizing How robust must the Earth's ecosystem be to assure our continued existence Can we know which other species are essential to our survival And how might we actually arrive at a stable optimum population and design an economy to allow genuine prosperity without endless growth Weisman visits an extraordinary range of the world's cultures religions nationalities tribes and political systems to learn what in their beliefs histories liturgies or current circumstances might suggest that sometimes it's in their own best interest to limit their growth The result is a landmark work of reporting devastating urgent and ultimately deeply hopeful By vividly detailing the burgeoning effects of our cumulative presence *Countdown* reveals what may be the fastest most acceptable practical and affordable way of returning our planet and our presence on it to balance Weisman again shows that he is one of the most provocative journalists at work today with a book whose message is so compelling that it will change how we see our lives and our destiny *Summary of Alan Weisman's The World Without Us* Everest Media, 2022-06-30T22:59:00Z Please note This is a companion version not the original book Sample Book Insights 1 The Biaowiea Puszcza is a forest in Poland that contains Europe's last remaining fragment of old growth lowland wilderness It was a Polish national park in 1921 but the Nazis invaded and took it over except for a pristine core that was left intact 2 The Puszcza is a pale copy of what Europe used to look like It is surprising how familiar it feels and how complete on some cellular level 3 The Polish forester Andrzej Bobiec was hired by the Polish national park service He was fired for protesting management plans that cut closer to the pristine core of the Puszcza In various international journals he blasted official policies that asserted that forests will die without our help 4 The Belovezhskaya Pushcha is the last remaining habitat of the wisent a species of European bison The forest is still growing but Belarus's iron curtain stands in the way of people and animals freely mixing **Powerful Prose** R. L. Victoria Pöhls, Mariane Utudji, 2021-10-01 What makes a reading experience powerful This volume brings together literary scholars linguists and empirical researchers who tackle the question by

investigating the effects and reader responses generated by selected extracts of literary prose The twelve contributions theorize this widely used but to date insufficiently studied notion and provide insights into the therefore still mysterious seeming power of literary fiction The collection explores a variety of stylistic as well as readerly and psychological features responsible for short and long term effects topics of great interest to those interested or specialized in literary studies and narratology cognitive stylistics empirical literary studies and reader response theory **ThirdWay**, 2008-03 Monthly current affairs magazine from a Christian perspective with a focus on politics society economics and culture

Methodologies of Legal Research Mark Van Hoecke, 2011-02-28 Until quite recently questions about methodology in legal research have been largely confined to understanding the role of doctrinal research as a scholarly discipline In turn this has involved asking questions not only about coverage but fundamentally questions about the identity of the discipline Is it mainly descriptive hermeneutical or normative Should it also be explanatory Legal scholarship has been torn between on the one hand grasping the expanding reality of law and its context and on the other reducing this complex whole to manageable proportions The purely internal analysis of a legal system isolated from any societal context remains an option and is still seen in the approach of the French academy but as law aims at ordering society and influencing human behaviour this approach is felt by many scholars to be insufficient Consequently many attempts have been made to conceive legal research differently Social scientific and comparative approaches have proven fruitful However does the introduction of other approaches leave merely a residue of legal doctrine to which pockets of social sciences can be added or should legal doctrine be merged with the social sciences What would such a broad interdisciplinary field look like and what would its methods be This book is an attempt to answer some of these questions **SALT Summaries** Stewart Brand, 2011-09-19 Condensed ideas about long term thinking summarized by Stewart Brand with Kevin Kelly Alexander Rose and Paul Saffo and a foreword by Brian Eno These are summaries of talks by Jared Diamond Craig Venter Bruce Sterling Jill Tarter Martin Rees Clay Shirky Niall Ferguson Jimmy Wales Mary Catherine Bateson Paul Hawken Vernor Vinge Ray Kurzweil Sam Harris Will Wright Orville Schell Nassim Taleb Michael Pollan Wade Davis Lera Boroditsky David Eagleman Richard Rhodes Paul Romer Matt Ridley and more SALT stands for Seminars About Long term Thinking The SALT talks are a monthly speaking series organized in San Francisco by The Long Now Foundation **Christ Among the Dragons** James Emery White, 2010-06-03 Christians today find themselves in new and strange cultural territory Sometimes we feel that the dangers are overwhelming Yet in his introduction James Emery White writes Unexplored territory does not always hold the peril of dragons it can also hold the promise of a new world In these pages he presents four themes that can take us to the core of faith and bring the unity we need as Christians to find our way truth orthodoxy culture and church Jacket **Before Humanity** Stefan Herbrechter, 2021-12-13 Before Humanity takes up the question of the post in the posthuman from the position of ancestrality Speculating about who or what comes after the human inevitably throws us back to our very beginnings The

before in Before Humanity in this context takes on two meanings 1 what happened before we apparently became human which translates into a critical reading of paleo anthropology as well as evolutionary narratives of hominization 2 living through the end of a certain humanist anthropocentric notion of humanity what tasks lie before us which provokes a critical reading of the Anthropocene and current narratives of geologization In other words Before Humanity investigates conceptualizations of humanity and asks whether we have ever been human and if not what could or maybe what should we have been

The Unconstructable Earth Frédéric Neyrat, 2018-10-16 Winner Grand Prize French Voices Award for Excellence in Publication and Translation

The Space Age is over Not at all A new planet has appeared Earth In the age of the Anthropocene the Earth is a post natural planet that can be remade at will controlled and managed thanks to the prowess of geoengineering This new imaginary is also accompanied by a new kind of power geopower that takes the entire Earth in its social biological and geophysical dimensions as an object of knowledge intervention and governmentality In short our rising awareness that we have destroyed our planet has simultaneously provided us not with remorse or resolve but with a new fantasy that the Anthropocene delivers an opportunity to remake our terrestrial environment thanks to the power of technology Such is the position we find ourselves in when proposals for reengineering the earth's ecosystems and geosystems are taken as the only politically feasible answer to ecological catastrophe Yet far from being merely the fruit of geo capitalism this new grand narrative of geopower has also been activated by theorists of the constructivist turn ecomodernist postenvironmentalist accelerationist who have likewise called into question the great divide between nature and culture With the collapse of this divide a cyborg hybrid flexible nature has been built an impoverished nature that does not exist without being performed by technologies that proliferate within the space of human needs and capitalist imperatives Underneath this performative vision resides a hidden anaturalism denying all otherness to nature and the Earth no longer by externalizing it as a thing to be dominated but by radically internalizing it as something to be digested Constructivist ecology thus finds itself in no position to confront the geoconstructivist project with its claim that there is no nature and its aim to replace Earth with Earth 2.0 Against both positions Neyrat stakes out the importance of the unconstructable Earth Against the fusional myth of technology over nature but without returning to the division between nature and culture he proposes an ecology of separation that acknowledges the wild subtractive capacity of nature Against the capitalist technocratic delusion of earth as a constructible object but equally against an organicism marked by unacknowledged traces of racism and sexism Neyrat shows what it means to appreciate Earth as an unsubstitutable becoming a trajectory that cannot be replicated in a laboratory Underway for billions of years withdrawing into the most distant past and the most inaccessible future Earth escapes the hubris of all who would remake and master it This remarkable book which will be of interest to those across the humanities natural sciences and social sciences from theorists to shapers of policy recasts the earth as a singular trajectory that invites humans to turn political ecology into a geopolitics

Readings in

the Anthropocene Sabine Wilke, Japhet Johnstone, 2017-09-21 Readings in the Anthropocene brings together scholars from German Studies and beyond to interpret the German tradition of the last two hundred years from a perspective that is mindful of the challenge posed by the concept of the Anthropocene This new age of man unofficially pronounced in 2000 holds that humans are becoming a geological force in shaping the Earth's future Among the biggest challenges facing our future are climate change accelerated species loss and a radical transformation of land use What are the historical philosophical cultural literary and artistic responses to this new concept The essays in this volume bring German culture to bear on what it means to live in the Anthropocene from a historical ethical and aesthetic perspective **Dark Pedagogy**

Jonas Andreassen Lysgaard, Stefan Bengtsson, Martin Hauberg-Lund Laugesen, 2019-06-28 Dark pedagogy explores how different perspectives can be incorporated into a darker understanding of environmental and sustainability education Drawing on the work of the classic horror author H P Lovecraft and new materialist insights of speculative realism the authors link Lovecraft's tales of the horrible to the current spectres of environmental degradation climate change and pollution In doing so they draw parallels between how humans have always related to the horrible things that are scaled beyond our understanding and how education can respond to an era of climate catastrophe in the age of the Anthropocene A new and darker understanding of environmental and sustainability education is thus developed using the tripartite reaction pattern of denial insanity and death to frame the narrative the book subsequently examines the specific challenges of potentials of developing education and pedagogy for an age of mass extinction This unflinching book will appeal to students and scholars of dark pedagogies as well as those interested in environment and sustainability education **The Best**

Buddhist Writing 2009 Melvin McLeod, 2009 A treasury of the most notable profound and thought provoking Buddhism inspired writing published in the last year The Best Buddhist Writing 2009 includes An interview with novelist Tom Robbins Guiding principles for a new ecospirituality from Thich Nhat Hanh Jack Kornfield on basic human goodness Pico Iyer's portrait of the Dalai Lama Olivia Ames Hoblitzelle on a couple's journey through Alzheimer's disease The Dzogchen Ponlop Rinpoche on the true enlightened nature of mind Wendy Johnson on bringing the beginner's mind to gardening A mindfulness practice from Pema Chodron to help us wake up to the world around us Joan Halifax on approaching death with fearlessness and compassion Peggy Rowe Ward and Larry Ward with stories meditations and exercises for experiencing love in a new and deeper way Natalie Goldberg on the art of writing personal memoir Dzigar Kongtrül on our search for happiness Sharon Salzberg on overcoming passion aggression and ignorance in our relationships Stephanie Kaza on making environmentalism a spiritual path not just a change in lifestyle Meshuga wisdom from Rabbi Rami Shapiro John Welwood on how we can use our relationships for profound spiritual growth And much more **The Embarrassment of Being Human** Benjamin Boysen, 2024-12-24 With the message that everything in a sense is alive thus allowing us to join forces with new politico ethical communities stretching across human and nonhuman realms the new materialisms have captivated the minds of many

academics artists and intellectuals by stressing that it is time to return to a premodern mindset and discard modernity and its concepts of secularization autonomy and finitude The Embarrassment of Being Human not only demonstrates how these magical materialisms are beset by grave theoretical and practical inconsistencies and self contradictions It also demonstrates how their demand for humans to step down and allow for an emancipation of things qualifies the new materialisms as a metaphysics of neoliberalism that reproduces and fortifies the self contradictions rampant in the current neoliberal hegemony While helping us to gain a comprehensive understanding of the tenets of the eerie ills of our epoch the critique of the new materialisms can furthermore inspire us to appreciate how the exact inversion of the new materialist complex amounts to a revitalization of the modern project A revitalization that is critical to think our epoch differently The Failures of Ethics John K. Roth, 2015-07-31 Defined by deliberation about the difference between right and wrong encouragement not to be indifferent toward that difference resistance against what is wrong and action in support of what is right ethics is civilization's keystone The Failures of Ethics concentrates on the multiple shortfalls and shortcomings of thought decision and action that tempt and incite us human beings to inflict incalculable harm Absent the overriding of moral sensibilities if not the collapse or collaboration of ethical traditions the Holocaust genocide and other mass atrocities could not have happened Although these catastrophes do not pronounce the death of ethics they show that ethics is vulnerable subject to misuse and perversion and that no simple reaffirmation of ethics as if nothing disastrous had happened will do Moral and religious authority has been fragmented and weakened by the accumulated ruins of history and the depersonalized advances of civilization that have taken us from a bloody twentieth century into an immensely problematic twenty first What nevertheless remain essential are spirited commitment and political will that embody the courage not to let go of the ethical but to persist for it in spite of humankind's self inflicted destructiveness Salvaging the fragmented condition of ethics this book shows how respect and honor for those who save lives and resist atrocity deepened attention to the dead and to death itself and appeals for human rights and renewed spiritual sensitivity confirm that ethics contains and remains an irreplaceable safeguard against its own failures **Event** Slavoj Žižek, 2014-01-30 Probably the most famous living philosopher Slavoj Žižek explores the concept of event in the second in this new series of easily digestible philosophy Agatha Christie's 4 50 from Paddington opens on a train from Scotland to London where Elspeth McGillicuddy on a way to visit her old friend Jane Marple sees a woman strangled in a compartment of a passing train the 4 50 from Paddington It all happens very fast and in a blurred vision so the police don't take Elspeth's report seriously as there is no evidence of wrongdoing only Miss Marple believes her story and starts to investigate This is an event at its purest and minimal something shocking that happens all of a sudden and interrupts the usual flow of things something that appears out of nowhere without discernible causes and whose ontological status is unclear an appearance without solid being as its foundation In Christie's novel the role of Miss Marple is precisely to de-eventalize the event to explain it away as an occurrence which fits the coordinates of

our normal reality A subject for which there is not yet an agreed upon definition within philosophy Slavoj i ek explores the terrain of this contestable term in a series of short chapters that examine everything from the event as political revolution and the rise of a new art form to the event as religious belief and falling in love Event is a mind blowing thrilling accessible book from arguably our greatest living cultural theorist and philosopher Slavoj i ek is a Slovenian philosopher and cultural critic The author of many books he has made contributions to political theory film theory and theoretical psychoanalysis

Technohumanism, Global Crises, and Education Kaustuv Roy,2022-04-27 This book argues that global crises such as the present Covid 19 pandemic are correlates of the contemporary thought regime that it calls technohumanism Taking up the pandemic as the central case in point the book shows how the basic assumptions of technohumanism encourage large scale dependencies and a consequent loss of endurance in the populace Next it shows that a form of recuperation can be pedagogically attempted by means of a psychoanalysis of thought which releases it from the humanist limits placed on it To do this it introduces the notion of a living unconscious as distinct from the Freudian Unconscious and argues that in the living unconscious there is no distinction between the prehuman and the posthuman and a posthumanist pedagogy can be constructed on the basis of an adequate transfer of prehuman dynamism *Autonomous Nature* Carolyn

Merchant,2015-08-27 *Autonomous Nature* investigates the history of nature as an active often unruly force in tension with nature as a rational logical order from ancient times to the Scientific Revolution of the seventeenth century Along with subsequent advances in mechanics hydrodynamics thermodynamics and electromagnetism nature came to be perceived as an orderly rational physical world that could be engineered controlled and managed *Autonomous Nature* focuses on the history of unpredictability why it was a problem for the ancient world through the Scientific Revolution and why it is a problem for today The work is set in the context of vignettes about unpredictable events such as the eruption of Mt Vesuvius the Bubonic Plague the Lisbon Earthquake and efforts to understand and predict the weather and natural disasters This book is an ideal text for courses on the environment environmental history history of science or the philosophy of science **Toktok Talkie**

Henschel, Joh R.,2015-12-01 With his penchant for nature science writing and photography the desert ecologist Dr Joh R Henschel could not help but document the conversations about the natural world with his friend Zophosis Moralesi a Toktokkie as beetly as can be The Toktok Talkie articles were first published as weekly newspaper columns between 2011 and 2013 and these are now collated in this book In it Joh reveals some of his musings about nature and his observations of peoples relationships to it He deftly interweaves the human defiance of nature symbolised by the Ancient Mariner with nature s many values and ultimate power of having the last word presented by a humble messenger the Toktokkie beetle Zophosis moralesi His first experience of the Namib in 1977 became love at first sight Since then he has been conducting research in the Namib and several deserts world wide reported in numerous scientific papers and technical documents After spending over three decades in Namibia Joh and his wife Theresa moved to Kimberley in South Africa in 2013 where he

joined the National Research Foundation to continue arid land research through the South African Environmental Observation Network SAEON

Event Slavoj Žižek, 2014-08-26 One of the most famous living philosophers provides a philosophical analysis of the meaning of events in this deeply interesting and provocative book *The Guardian* An event can be an occurrence that shatters ordinary life a radical political rupture a transformation of reality a religious belief the rise of a new art form or an intense experience such as falling in love Taking us on a trip that stops at different definitions of event Žižek addresses fundamental questions such as are all things connected How much are we agents of our own fates Which conditions must be met for us to perceive something as really existing In a world that's constantly changing is anything new really happening Drawing on references from Plato to arthouse cinema the Big Bang to Buddhism *Event* is a journey into philosophy at its most exciting and elementary
