African Traditional Medicine: Autonomy and Informed Consent Peter Ikechukwu Osuji, 2014-07-18 This book focuses on informed consent in African Traditional Medicine ATM ATM forms a large portion of the healthcare systems in Africa WHO statistics show that as much as 80% of the population in

Africa uses traditional medicine for primary health care. With such a large constituency it follows that ATM and its practices should receive more attention in bioethics. By comparing the ethics of care approach with the ATM approach to Relational Autonomy In Consent RAIC the authors argue that the ATM focus on consent based on consensus constitutes a legitimate informed consent. This book is distinctive insofar as it employs the ethics of care as a hermeneutic to interpret ATM. The analysis examines the ethics of care movement in Western bioethics to explore its relational approach to informed consent. Additionally, this is the first known study that discusses healthcare ethics committees in ATM.

Healing Plants of Nigeria Anselm Adodo, Maurice M. Iwu, 2020-03-17

Healing Plants of Nigeria Ethnomedicine and Therapeutic Applications offers comprehensive information on the use of herbal medicines in West Africa. Combining an evidence-based ethnobotanical perspective with a pharmacological and pharmaceutical approach to phytomedicine, the book bridges the gap between the study of herbal plants, pharmacological properties, and active compounds for the development of clinical drugs and community-oriented approaches emphasising local use. It demonstrates how the framework of African traditional medicine can be preserved in a contemporary clinical context. The book outlines the history and beliefs surrounding the traditional use of herbs by the local population alongside their application in contemporary phytotherapy in Nigeria and West Africa. It features a critical assessment of the scientific rationale behind the use of these plants in ethnomedicine and offers a composite catalogue of phytotherapeutic and wellness agents detailing the safety profile, efficacy, and scientific integrity of plants used to treat diseases and optimise health. Features: An ethnobotanical survey containing over 200 full-colour photographs of Nigerian and West African plants. A unique combination of ethnobotany and pharmacognosy bridging the divide between pharmaceutical and community-oriented approaches to herbal medicine research. Contextual discussion of the therapeutic potential of Nigerian herbal medicine. Offers a template which can be used to separate the superstitious aspects of ethnomedicine from culturally inherited deposits of knowledge. A handbook for herbal and natural medicine practitioners.
