*Germany and Eastern Europe*, 2023-08-14 The opening up and subsequent tearing down of the Berlin Wall in 1989 effectively ended a historically unique period for Europe that had drastically changed its face over a period of fifty years and redefined in all sorts of ways what was meant by East and West For Germany in particular this radical change meant much more than unification of the divided country although initially this process seemed to consume all of the country's energies and emotions While the period of the Cold War saw the emergence of a Federal Republic distinctly Western in orientation the coming down of the Iron Curtain meant that Germany's relationship with its traditional neighbours to the East and the South East which had been essentially frozen or redefined in different ways for the two German states by the Cold War had to be rediscovered This volume which brings together scholars in German Studies from the United States Germany and other European countries examines the history of the relationship between Germany and Eastern Europe and the opportunities presented by the changes of the 1990's drawing particular attention to the interaction between the willingness of German and its Eastern neighbours to work for political and economic integration on the one hand and the cultural and social problems that stem from old prejudices and unresolved disputes left over from the Second World War on the other

Sosulski, 2017-03-02 In 1767 more than a century before Germany was incorporated as a modern nation state the city of Hamburg chartered the first Deutsches Nationaltheater What can it have meant for a German playhouse to have been a national theater and what did that imply about the way these theaters operated Michael Sosulski contends that the idea of German nationhood not only existed prior to the Napoleonic Wars but was decisive in shaping cultural production in the last third of the eighteenth century operating not on the level of popular consciousness but instead within representational practices and institutions Grounding his study in a Foucauldian understanding of emergent technologies of the self Sosulski connects the increasing performance of body discipline by professional actors soldiers and schoolchildren to the growing interest in German national identity The idea of a German cultural nation gradually emerged as a conceptual force through the work of an influential series of literary intellectuals and advocates of a national theater including G E Lessing and Friedrich Schiller Sosulski combines fresh readings of canonical and lesser known dramas with analysis of eighteenth century theories of nationhood and evolving acting theories to show that the very lack of a strong national consciousness in the late eighteenth century actually spurred the emergence of the German Nationaltheater which were conceived in the spirit of the Enlightenment as educational institutions Since for Germans nationality was a performed identity theater emerged as an ideal space in which to imagine that nation
