Theodori Prisciani Euporiston Additamentis Pseudo Theodoreis:

A History of Medicine: Roman medicine Plinio Prioreschi, 1996 **Traditional Magic Spells for Protection and Healing** Claude Lecouteux, 2017-11-07 An in depth collection of ancient spells and magic practices drawn from rare and newly discovered texts Presents more than 600 magical prescriptions for healing and protection from both pagan and Christian sources Examines the practice of diagnosing illness through magic and explores ancient beliefs about curses and other evil spells and about devils demons and ghosts Includes spells from the heavily guarded gypsy tradition of magic and healing drawn from newly discovered materials Since the beginning of history people have sought remedies for the many ills that have beset them from illnesses afflicting the body to threats posed by evil and hostile individuals In many folk healing and pagan traditions it was believed that one must gain the assistance of the guardian spirit of a healing plant or substance through prayers or offerings before its chemical properties would be effective The Church decried these spells and practices as pagan superstition but did not seek to exterminate these beliefs instead transferring the responsibility for their healing powers to the apostles and saints Drawing on his extensive knowledge of ancient texts Claude Lecouteux presents more than 600 magical prescriptions from both pagan and Christian sources from the last 2 000 years covering everything from abscesses and shingles to curses and healing animals He examines the practice of diagnosing illness through magic and looks at the origins of disease according to the evolving beliefs of magic practitioners over the centuries He explores ancient beliefs about curses and about devils demons and ghosts and provides an in depth look at protection magic including protection of health animals and cultivated land protection against curses witchcraft bad weather and beasts protection of a home and protection while traveling He includes spells from the heavily guarded gypsy tradition of magic and healing drawn from newly discovered materials collected by two Romanian ethnologists who lived and traveled with gypsies in Transylvania in the mid 19th century The author also reproduces rare texts on magic healing from the 14th and 15th centuries Revealing the vitality of these practices in the remoter areas of Eastern Europe Lecouteux shows how the influence of this pagan worldview is still detectable in the work of modern folk healers in France and Scandinavia He also shows how the condemnation of unorthodox methods of healing has not vanished from the contemporary world the medieval legislation against healing by wizards and bonesetters is echoed in modern health codes that challenge the authority of naturopaths and faith healers **The Medicina Plinii** Yvette Hunt, 2019-10-01 This book presents the first ever English translation of the *Medicina Plinii* one of the most influential books of applied medicine and self medication in Late Antiquity and the Middle Ages The work which predates AD 400 was created as a quick reference work for travellers and became and remained highly influential as witnessed by frequent references to it and by various later adaptations Only the rise of scientific medicine and pharmacology led to its demise and confinement in a small corner of specialist studies It presents more than 1 150 healing methods and recipes mainly adapted from the encyclopedic *Natural History* of Pliny the Elder arranged from the patient s

head to foot in order that readers could quickly find treatments for their diseases The *Medicina Plinii* is of dual interest to present day scholarship The book is a monument for the practical application of classical knowledge which has recently found lively interest in the history of science and medicine At the same time the *Medicina Plinii* provides a fascinating insight into the realities of the world of Late Antiquity and into the anxieties of the people living in the vast Roman empire This book will be of particular interest to scholars and advanced students in the History of Science and Medicine along with a wider audience interested in medicine and in life in the Roman world

Writing the Early Medieval West Elina Screen, Charles

West, 2018-05-03 Far from the oral society it was once assumed to have been early medieval Europe was fundamentally shaped by the written word This book offers a pioneering collection of fresh and innovative studies on a wide range of topics each one representing cutting edge scholarship and collectively setting the field on a new footing Concentrating on the role of writing in mediating early medieval knowledge of the past on the importance of surviving manuscripts as clues to the circulation of ideas and political and cultural creativity and on the role that texts of different kinds played both in supporting and in subverting established power relations these essays represent a milestone in studies of the early medieval written word

Public Baths and Bathing

Habits in Late Antiquity Sadi Maréchal, 2020-01-20 In this book Sadi Maréchal examines the survival transformation and eventual decline of Roman public baths and bathing habits in Italy North Africa and Palestine during Late Antiquity Through the analysis of archaeological remains ancient literature inscriptions and papyri the continued importance of bathhouses as social hubs within the urban fabric is demonstrated thus radically altering common misconceptions of their decline through the rise of Christianity and elite seclusion Persistent ideas about health and hygiene as well as perpetuating ideas of civic self esteem drove people to build restore and praise these focal points of daily life when other classical buildings were left to crumble

Anglo-Saxon Emotions Alice Jorgensen, Frances McCormack, Jonathan Wilcox, 2016-04-15 Research into the emotions is beginning to gain momentum in Anglo Saxon studies In order to integrate early medieval Britain into the wider scholarly research into the history of emotions a major theme in other fields and a key field in interdisciplinary studies this volume brings together established scholars who have already made significant contributions to the study of Anglo Saxon mental and emotional life with younger scholars The volume presents a tight focus on emotion rather than psychological life more generally on Anglo Saxon England and on language and literature with contrasting approaches that will open up debate The volume considers a range of methodologies and theoretical perspectives examines the interplay of emotion and textuality explores how emotion is conveyed through gesture interrogates emotions in religious devotional literature and considers the place of emotion in heroic culture Each chapter asks questions about what is culturally distinctive about emotion in Anglo Saxon England and what interpretative moves have to be made to read emotion in Old English texts as well as considering how ideas about and representations of emotion might relate to lived experience Taken together the essays in this collection

indicate the current state of the field and preview important work to come By exploring methodologies and materials for the study of Anglo Saxon emotions particularly focusing on Old English language and literature it will both stimulate further study within the discipline and make a distinctive contribution to the wider interdisciplinary conversation about emotions

Medicine and Markets in the Graeco-Roman World and Beyond Rebecca Flemming, Laurence Totelin, 2020-01-01 For almost half a century Vivian Nutton has been a leading figure in the study of ancient and less ancient medicine The field itself has been revolutionised over that time In this volume distinguished colleagues and former students develop in his honour key themes of his ground breaking scholarship Spanning from the Bronze Age to the Digital Age involving the cult of Artemis and the corpuscular theories of Asclepiades of Bithynia the medicinal uses of beavers and the cost of health care and wet nursing case histories remedy exchange and the medical repercussions of political assassination this book has at its centre the pluralism and diversity of the ancient medical marketplace The lively interplay between choice and competition unity and division communication and debate so notable in Vivian Nutton's foundational vision of the world of classical medicine is richly examined across these pages Theodori Prisciani Euporiston libri III Theodorus Priscianus, Valentin Rose, 1894

Introduction to the History of Science George Sarton, 1927 **Encyclopedia of Ancient Natural Scientists** Paul T. Keyser, Georgia L. Irby-Massie, 2008-11-19 The Encyclopedia of Ancient Natural Scientists is the first comprehensive English language work to provide a survey of all ancient natural science from its beginnings through the end of Late Antiquity A team of over 100 of the world's experts in the field have compiled this Encyclopedia including entries which are not mentioned in any other reference work resulting in a unique and hugely ambitious resource which will prove indispensable for anyone seeking the details of the history of ancient science Additional features include a Glossary Gazetteer and Time Line The Glossary explains many Greek or Latin terms difficult to translate whilst the Gazetteer describes the many locales from which scientists came The Time Line shows the rapid rise in the practice of science in the 5th century BCE and rapid decline after Hadrian due to the centralization of Roman power with consequent loss of a context within which science could flourish

Embodiments of Will Michael Frampton, 2008 This book examines the two chief anatomical and physiological embodiment theories of voluntary animal motion which I call the cardiosinew and cerebroneuromuscular theories of motion from the time of Aristotle 384 322 B C to that of Mondino d'Ald 1326 The study of animal motion commenced with the ancient Greek natural scientist Aristotle who wrote the monograph On the motion of animals *De motu animalium* Subsequent inquiries into voluntary animal motion may be found in a variety of Greek Latin and Arabic compendia commentaries and encyclopedias throughout the ancient and medieval periods The motion of animals was considered relevant to natural philosophers and theologians investigating the nature of the soul and to physicians seeking to discover the causes of disorders of voluntary movement such as epilepsy and tetany The book fills a gap in the scholarly literature concerned with pre modern studies of the anatomical and physiological mechanisms of will and bodily movement The accompanying photographs of my own

Anger in the Sagas of Icelanders George C. Manning,2025-07-04 George C Manning examines the presentation of anger in the slendingas gur Sagas of Icelanders and associated slendinga ttir Tales of Icelanders a remarkable Old Norse Icelandic corpus of texts written down in the thirteenth and fourteenth centuries that detail conflicts and feuds of Icelanders during the late ninth tenth and early eleventh centuries It first shows how various unqualified involuntary somatic responses facial expressions and bodily movements frequently indicate angry experience in the sagas before arguing that anger s mode of expression is contingent on a character s sociocultural identity Through close analysis of how five groups of characters men women elderly men berserkir raging warriors and sovereign figures exhibit anger the book demonstrates that these different character groups experience and express emotion in different ways in accordance with strict social rules they adhere to different emotive scripts to use Sif R khar sd ttir s term Importantly the book shows through analysis of how these identities experience anger that emotions institute and uphold gender configurations its primary focus therefore is the nexus between anger and gender Manning argues that anger is seen as a weakness for most male characters while female characters elderly men berserkir and sovereign figures can exhibit anger without opprobrium and often use it to their advantage It demonstrates how anger plays a key role in establishing or resolving narrative tensions in the sagas and deepens our understanding of the Old Norse Icelandic terms that saga authors use to communicate anger The work the first book length investigation of anger in the Sagas of Icelanders thus functions as a major intervention into the fields of both emotion and gender studies in medieval literature *The Frontiers of Ancient Science* Brooke Holmes,Klaus-Dietrich

Fischer,2015-03-30 Our understanding of science mathematics and medicine today can be deeply enriched by studying the historical roots of these areas of inquiry in the ancient Near East and Mediterranean The fields of ancient science and mathematics have in recent years witnessed remarkable growth The present volume brings together contributions from more than thirty of the most important scholars working in these fields in the United States and Europe in honor of the eminent historian of ancient science and medicine Heinrich von Staden Professor Emeritus of Classics and History of Science at the Institute of Advanced Study and William Lampson Professor Emeritus of Classics and Comparative Literature at Yale University The papers range widely from Mesopotamia to Ancient Greece and Rome from the first millennium B C to the early medieval period and from mathematics to philosophy mechanics to medicine representing both a wide diversity of national traditions and the cutting edge of the international scholarly community *Catalogue of Printed Books* British Museum. Department of Printed Books,1903 **The 'cursus laborum' of Roman Women** Anna Tatarkiewicz,2023-03-09

This book assesses a narrow but vital and so far understudied part of Roman women s lives puberty preparation for pregnancy pregnancy and childbirth Bringing together for the first time the material and textual sources for this key life

stage it describes the scientific educational medical and emotional aspects of the journey towards motherhood The first half of the book considers the situation a Roman girl would find herself in when it came to preparing for children Sources document the elementary sexual education offered at the time and society's knowledge of reproductive health We see how Roman women had recourse to medical advice but also turned to religion and magic in their preparations for childbirth The second half of the book follows the different stages of pregnancy and labour As well as the often documented examples of joyous expectation and realisation of progeny there are also family tragedies young girls dying prematurely stillbirth death in childbirth and death during confinement Finally the book considers the social change that childbirth wrought on the mother not just the new baby in many ways it was also a mother who was in the process of being conceived and brought into the world

Medical Latin in the Roman Empire D. R. Langslow, 2000-06-08 Despite the ubiquitous importance of medicine in Roman literature philosophy and social history the language of Latin medical texts has not been properly studied This book presents the first systematic account of a part of this large rich field Concentrating on texts of high medicine written in educated even literary Latin Professor Langslow offers a detailed linguistic profile of the medical terminology of Celsus and Scribonius Largus first century AD and Theodorus Priscianus and Cassius Felix fifth century AD with frequent comparisons with their respective near contemporaries The linguistic focus is on vocabulary and word formation and the book thus addresses the large question of the possible and the preferred means of extending the vocabulary in Latin at the beginning and end of the Empire Some syntactic issues including word order and nominalization are also discussed and sections on the sociolinguistic background and stylistic features consider the question to what extent we may speak of medical Latin in the strong sense as the language of a group and draw comparisons and contrasts between ancient and modern technical languages

Taste and the Ancient Senses Kelli C. Rudolph, 2017-07-31 Olives bread meat and wine it is deceptively easy to evoke ancient Greece and Rome through a few items of food and drink But how were their tastes different from ours How did they understand the sense of taste itself in relation to their own bodies and to other modes of sensory experience This volume the first of its kind to explore the ancient sense of taste draws on the literature philosophy history and archaeology of Greco Roman antiquity to provide answers to these central questions By surveying and probing the literary and material remains from the Archaic period to late antiquity contributors investigate the cultural and intellectual development towards attitudes and theories about taste These specially commissioned chapters also open a window onto ancient thinking about perception and the body Importantly these authors go beyond exploring the functional significance of taste to uncover its value and meaning in the actions thoughts and words of the Greeks and Romans Taste and the Ancient Senses presents a full range of interpretative approaches to the gustatory sense and provides an indispensable resource for students and scholars of classical antiquity and sensory studies

Magic in Apuleius' 'Apologia' Leonardo Costantini, 2019-01-14 Despite the growing interest in Apuleius Apologia or Pro se de magia a speech he delivered in AD 158 159 to defend himself against the

charge of being a magus the only comprehensive study on this speech and magic to date is that by Adam Abt 1908 The aim of this volume is to shed new light on the extent to which Apuleius speech reveals his own knowledge of magic and on the implications of the dangerous allegations brought against Apuleius By analysing the Apologia sequentially the author does not only reassess Abt s analysis but proposes a new reconstruction of the prosecution s case arguing that it is heavily distorted by Apuleius Since ancient magic is the main topic of this speech an extensive discussion of the topic is provided offering a new semantic taxonomy of magus and its cognates Finally this volume also explores Apuleius forensic techniques and the Platonic ideology underpinning his speech It is proposed that a Platonising reasoning distinguishing between higher and lower concepts lies at the core of Apuleius rhetorical strategy and that Apuleius aims to charm the judge the audience and ultimately his readers with the irresistible power of his arguments
