The Aesthetics of Solidarity Nichole M. Flores, 2021 Latinx Catholics have used Our Lady of Guadalupe as a symbol in democratic campaigns ranging from the United Farm Workers movement to the Chicano movement to the movement for just immigration reform In diverse ways these groups use Guadalupe s symbol and narrative to make claims about justice in society s basic structures law policy institutions for example while seeking to generate greater participation and representation in US democracy Yet Guadalupe is illegible within a liberal political framework that seeks to protect society s basic structures from religious encroachment by relegating religious speech practices and symbols to the realm of the background culture In response to this problem religious ethicists have argued for expansions of the liberal framework that would make religious language arguments and practices communities legible within a pluralistic society without capitulating to anti democratic modes of governance that undermine pluralism What remains unexplored is the way that the aesthetic dimensions of particular religious traditions can be engaged toward cultivating a more participatory democracy that invites substantive contributions to society s common life from religious people and communities Instead in conversation with political liberalism Latinx theological aesthetics and Catholic social thought **The Aesthetics of Solidarity** examines the use of particular religious symbols to make democratic claims and generate greater participation and presence in the life of US democracy After evaluating liberalism s capacity for constructive engagement with religion toward strengthening democratic participation the project employs Latinx theological aesthetics and Catholic social thought to offer a constructive framework for interpreting religious symbols in the context of a religiously pluralistic and participatory democratic life

Laurie Brink,2022-02-05 2023 Catholic Media Association First Place Award Faith and Science Building on the work of Teilhard de Chardin the New Cosmology integrates scientific facts and theories including discoveries about the expanding universe and evolution and proposes that creation is developing into greater complexity But how are we to understand concepts like original sin and redemption if creation isn t complete and humanity is still in process How does one retrofit religious tradition and Scripture into this scenario Is there room for the historical Jesus in the New Cosmology While a ready concern for all Christians this question has unique implications for women religious whose lives are centered on the person and mission of Jesus Christ How is a Catholic sister to understand her vows of poverty chastity and obedience in light of a cosmology in which the need for redemption and the role of Jesus are significantly redefined The Heavens Are Telling the Glory of God probes these questions and offers possible answers Beginning with the experiences of women religious and their encounter with the New Cosmology or Universe Story this book seeks to mediate among the various perspectives and proposes how informed and reflective engagement with science tradition and theology can bridge the generational divides and foster a spirituality that is both emergent and incarnational Access to online discussion and reflection questions is included *Wading Through Many Voices* Harold Recinos,2011-04-16

Broggi,2015-06-24 Diversity in the Structure of Christian Reasoning examines the effect of Christian commitments on rationality When Christians read scripture traditions supply concepts that shape what counts as normal good and true This book offers an account of how different communities produce divergent readings of the Bible It considers two examples from World Christianity first a Bakongo community in central Africa and then a Tamil bishop in southern India Each case displays a relation between tradition and reason that reconfigures the hermeneutical picture developed by Martin Heidegger and
