Theory and Method in Religious Studies Frank Whaling, 2012-10-25 This paperback edition contains selected articles from the original clothbound editions of Contemporary Approaches to The Study of Religion Vol I The Humanities Vol II The Social Sciences Religion and Reason 27 28

Theory and Method in the Study of Religion , 2013-09-26 Theory and Method are two words that cause considerable consternation in the academic study of religion Although everyone claims to be aware of and to engage them the fact of the matter is that they remain poorly understood Some see the terms as irritants that get in the way of data interpretation and translation Others may invoke them sporadically to appear in vogue but then return quickly and myopically to their material and with little concern for the larger issues that such terms raise To contribute to these debates the present volume reproduces select articles from Method and Theory in the Study of Religion MTSR from the first 25 volumes of the journal and allows a group of younger scholars to introduce and review them asking if the issues raised are still relevant to the field Contributors include Matt Sheedy Robert A Segal James B Apple Neil McMullin Rebekka King Russell McCutcheon Craig Martin Donal Wiebe Emma Cohen Robert N McCauley E Thomas Lawson Steven Engler Mark Q Gardiner Bruce Lincoln Sarah E Rollens Burton Mack Yasmin Merchant Herb Bergh Jennifer Hall Darlene Juschka Ella Paldam and Armin Geertz

Interreligious Comparisons in Religious Studies and Theology Perry Schmidt-Leukel, Andreas Nehring, 2016-07-14 Can religions be compared For decades the discipline of religious studies was based on the assumption that they can Postmodern and postcolonial reflections however raised significant doubts In social and cultural studies the investigation of the particular often took precedence over a comparative perspective Interreligious Comparisons in Religious Studies and Theology questions whether religious studies can survive if it ceases to be comparative religion Can it do justice to a globalized world if it is limited on the specific and turns a blind eye on the general While comparative approaches have come under strong pressure in religious studies they have started flourishing in Theology Comparative theology practices interfaith dialogue by means of comparative research This volume asks whether theology and religious studies are able to mutually benefit from their critical and constructive reflections Can postcolonial criticism of neutrality and objectivity in religious studies create new links with the decidedly perspectival approach of comparative theology In this collection scholars from theology and religious studies discuss the methodology of interreligious comparison in the light of recent doubts and current objections Together with the contributors Perry Schmidt Leukel and Andreas Nehring argue that after decades of critique interreligious comparison deserves to be reconsidered reconstructed and reintroduced

Method and Theory in the Study of Religion: Working Papers from Hannover Steffen Führding, 2017-07-03 Since the downfall of the phenomenology of religion as the leading paradigm in the study of religion in the 1960s theoretical and methodological discussions surrounding the nature and identity of the study of religion as an academic discipline have proliferated The essays included in this volume approach these debates from a variety of angles Based on a series of talks

held at the University of Hannover over the last few years the essays are intended to be understood as diagnostic works in progress and thus as working papers all of which strive to point out important problems and perspectives in the field of theories and methodology and to draw attention to the future of the discipline Using developments in Hanover as a launch pad the volume forms the basis for further insights into the direction of the study of religion as a discipline at large

Methodology in Religious Studies Arvind Sharma,2012-02-01 Methodology in Religious Studies assesses the impact of women s studies on the various methods employed in studying religion Since its inception in the 1860s the study of religion as an academic discipline has evolved over time ranging from the classically historical to the boldly hermeneutical The women s studies movement has since the 1980s become part and parcel of the intellectual landscape of our times and the study of religion has become increasingly influenced by it What are the implications of this new development for the methodology of religious studies Leading practitioners of psychological theological sociological anthropological phenomenological historical and hermeneutic approaches examine the mutually enriching interface between religious studies and women s studies as they explore the broader issue of the interaction between method and the nature of the subject itself

Religious Studies, Theology, and the University Linell E. Cady,Delwin Brown,2002-10-10 Explores the relationship between religious studies and theology and the place of each in the modern secular university *Failure and Nerve in the Academic Study of Religion* William E. Arnal,Willi Braun,Russell T. McCutcheon,2014-09-11 Failure and Nerve in the Academic Study of Religion presents a provocative critique of the unwillingness of modern scholars to publically distinguish research into comparative religion from confessional studies written within denominationally affiliated institutions The book offers the 19th Century founders of the study of religion as a bracing corrective to contemporary timidity The issue was analysed and documented by Wiebe a quarter of a century ago Here marking Wiebe s work a wide range of contributors reassess the methodology and ambition of contemporary religious research The book argues that conceptualizing religion as part of the world of human action and experience is the first requirement of the study of religion **The Oxford Handbook of the Sociology of Religion** Peter Clarke,2011-02-04 The Oxford Handbook of the Sociology of Religion draws on the expertise of an international team of scholars providing both an entry point into the sociological study and understanding of religion and an in depth survey into its changing forms and content in the contemporary world The role and impact of religion and spirituality on the politics culture education and health in the modern world is rigorously discussed and debated The study of the sociology of religion forges interdisciplinary links to explore aspects of continuity and change in the contemporary interface between society and religion Using a combination of theoretical methodological and content led approaches the fifty seven contributors collectively emphasise the complex relationships between religion and aspects of life from scientific research to law ecology to art music to cognitive science crime to institutional health care and more The developing character of religion irreligion and atheism and the impact of religious diversity on social cohesion are explored

An overview of current scholarship in the field is provided in each themed chapter with an emphasis on encouraging new thinking and reflection on familiar and emergent themes to stimulate further debate and scholarship The resulting essay collection provides an invaluable resource for research and teaching in this diverse discipline [The Humanities](#) Frank Whaling,2019-10-08 No detailed description available for The Humanities

Religious Studies and the Goal of Interdisciplinarity Brent Smith,2019-08-19 This book offers a survey of the development of interdisciplinarity in religious studies within academia and offers ways for it to continue to progress in contemporary universities It examines the use of the term interdisciplinary in the context of the academic study of religion and how it shapes the way scholarly work in this field has developed The text uses two main elements to discuss religious studies as a field Firstly it looks at the history of the development of religious studies in academia as seen through an interdisciplinary critique of the university as an epistemological project It then uses the same interdisciplinary critique to develop a foundation for a 21st century hermeneutic one which uses the classical concepts reprised by that interdisciplinary critique and retools the field for the 21st century Setting out both the objects of religious studies as a subject and the techniques used to employ the study of those objects this book offers an invaluable perspective on the progress of the field It will therefore be of great use to scholars of research methods within religious studies *Jesus Imandars and Christ Bhaktas* Jonas Adelin Jørgensen,2008 The massive changes of Christianity during the 20th century raise the perennial question about its identity in a new radical form The author addresses the question of identity and asks how globalisation religious pluralism and the polycentric nature of Christianity affect Christian self identification and theological reflection First religious life and theological reflection among believers in Jesus from Muslim and Hindu background in South Asia is presented in two empirical studies Secondly the findings are analysed and interpreted within a broad theoretical framework drawing on models for syncretistic processes from history of religions cultural anthropology and Christian theology Finally the study concludes with a systematic theological perspective on the interreligious hermeneutics underlying the changes of Christianity and discusses how interreligious hermeneutics might inform missiology as well as Christian theologies of religions and how this might challenge our understanding of the church s nature and mission In conclusion it is argued that a global polycentric Christianity can be interpreted as fellowship created by the Spirit and centred on Christ **The Learned Practice of Religion in the Modern University** Donald Wiebe,2019-11-14 In these essays Donald Wiebe unveils a significant problem in the academic study of religion in colleges and universities in North America and Europe that studies almost always exhibit a religious bias To explore this issue Wiebe looks at the religious and moral agendas behind the study of religion showing that the boundaries between the objective study of religion and religious education as a tool for bettering society have become blurred As a result he argues religious studies departments have fostered an environment where religion has become a learned or scholarly practice rather than the object of academic scrutiny This book provides a critical history of the failure of 20th and 21st

century scholars to follow through on the 19th century ideal of an objective scientific study of religious thought and behaviour Although emancipated from direct ecclesiastical control and to some extent from sectarian theologizing Wiebe argues that research and scholarship in the academic department of religious studies has failed to break free from religious constraints He shows that an objective scientific study of religious thought and practice is not only possible but the only appropriate approach to the study of religious phenomena

The Question of Methodological Naturalism Jason N. Blum,2018-09-11 The traditions and institutions that we call religions abound with references to the supernatural ancestral spirits karma the afterlife miracles revelation deities etc How are students of religion to approach the behaviors doctrines and beliefs that refer to such phenomena which by their very nature are supposed to defy the methods of empirical research and the theories of historical scholarship That is the question of methodological naturalism The Question of Methodological Naturalism offers ten thoughtful engagements with that perennial question for the academic study of religion Contributors include established senior scholars and newer voices propounding a range of perspectives resulting in both surprising points of convergence and irreconcilable differences in how our shared discipline should be conceptualized and practiced

International Handbook of Inter-religious Education Kath Engebretson,Marian de Souza,Gloria Durka,Liam Gearon,2010-08-17 This Handbook is based on the conviction of its editors and contributing authors that understanding and acceptance of as well as collaboration between religions has essential educational value The development of this Handbook rests on the further assumption that interreligious education has an important role in elucidating the global demand for human rights justice and peace Interreligious education reveals that the creeds and holy books of the world's religions teach about spiritual systems that reject violence and the individualistic pursuit of economic and political gain and call their followers to compassion for every human being It also seeks to lead students to an awareness that the followers of religions across the world need to be and to grow in dialogical relationships of respect and understanding An essential aim of interreligious education is the promotion of understanding and engagement between people of different religions and therefore it has great potential to contribute to the common good of the global community Interreligious education has grown from the interfaith movement whose beginning is usually identified with the World Parliament of Religions held in Chicago in 1893 This was the first time in history that leaders of the eastern and western religions had come together for dialogue and to consider working together for global unity

Discourse on Civility and Barbarity

Timothy Fitzgerald,2010-12-31 This book analyses the development of different meanings of the term religion in different contexts and in relation to other categories with shifting and unstable nuances such as the state politics economics and the secular It traces a major transformation of the category as a function of Euro American colonialism and capitalism from its traditional meaning of Christian Truth to the modern generic and pluralised category of religions and world religions Throughout the period under consideration discourses on religion have overlapped significantly with discourses on our civility as opposed to their barbarity underpinning the superior rationality of the literate male elite of western societies

Reasons for Living

Marisa L. Crawford,Graham Rossiter,2006 Reasons for Living begins by exploring the development and psychological function of meaning identity and spirituality in the lives of young people This exploration can contribute significantly to the professional background of those engaged in the education and care of youth in various contexts The book then focuses on what it means to educate young people in meaning identity and spirituality Implications are considered for three school contexts the spiritual and moral dimension to the general curriculum in public and independent schools religious education in religious schools and state based Religion Studies courses Reasons for Living makes a much needed contribution to the philosophy of education by discussing the links between education and young people s spiritual and moral development It also provides new insights and approaches to values education and religious education Areas of fundamental importance in Australian education have long been held back not only by the gap between theory and practice but also by the very complexities of young people s personal development in contemporary Western Culture Reasons for Living offers a constructive and practical way forward

Philosophy and the Study of Religions Kevin Schilbrack,2014-03-03 Philosophy and the Study of Religions A Manifesto advocates a radical transformation of the discipline from its current narrow focus on questions of God to a fully global form of critical reflection on religions in all their variety and dimensions Opens the discipline of philosophy of religion to the religious diversity that characterizes the world today Builds bridges between philosophy of religion and the other interpretative and explanatory approaches in the field of religious studies Provides a

manifesto for a global approach to the subject that is a practice centred rather than a belief centred activity Gives attention to reflexive critical studies of religion as socially constructed and historically located Pragmatism and the Philosophy of Religion Michael R. Slater, 2014-08-14 In this book Michael R Slater provides a new assessment of pragmatist views in the philosophy of religion Focusing on the tension between naturalist and anti naturalist versions of pragmatism he argues that the anti naturalist religious views of philosophers such as William James and Charles Peirce provide a powerful alternative to the naturalism and secularism of later pragmatists such as John Dewey and Richard Rorty Slater first examines the writings of the classical pragmatists James Peirce and Dewey and argues for the relevance of their views for thinking about such topics as the nature of religion and the viability of natural theology His final three chapters engage with the religious views of later pragmatists such as Rorty and Philip Kitcher and with current philosophical debates over metaphysical realism naturalism and evidentialism His book will be of particular interest to philosophers of religion theologians and specialists in American philosophy
