Drawing on his decades of experience training marriage and family therapists, professional counselors and pastoral counselors, he answers that question in the updated edition of his landmark book *Basic Counseling Techniques*. He provides practical suggestions for setting up the therapy room, using audiovisual recording equipment and conducting those first critical interviews. For adults, socialization and interpersonal issues are addressed, including separate chapters for male and female groups. Finally, a chapter on the elderly deals with cognitive health and life review issues. Special Topics Groups presents a continuum of different types of groups used to treat people with interpersonal and developmental issues such as grief, substance abuse, depression, and others. Each chapter in this section provides definitions and descriptions of the issues along with theoretical and empirical support.
