There Is Hope of Doing Perfect Research

Although most scholars strongly subscribe to the position that "There is no hope of doing perfect research" (Griffith, 1998, p97), I believe there is hope of doing perfect research. After reading his argument carefully, I cannot find so much difference between Griffith's position and the traditional perspective of science; that scientific knowledge is cumulative. Griffith argues that an abacus, which preceded what we call computers today, was a product of imperfect research. This paper argues

To Speak Beyond the Pain Farah Anwar, 2012-09-07 You feel pain in this world in every word people say in every act they make Surprisingly you see spots of tears on every face you meet then who is the Cruel Man You do not focus on the feelings behind the feelings but it pains when soreness is the only thing in your heart Might be you have compromised all you had Or you missed the one you loved for most Or you have lost dreams You could be victim of society's double standards You are broad minded but these so called practical people name you as narrow minded When being human pains the worst and proud is the only reason to die when life means nothing to you and death is the only priority to live You look at yourself for the world you might be a very prominent and successful person but at night

you cry for ruined of you The catastrophic waves unifying inside keeping wet eye you moves on deliberately ignoring what is killing inside Absorbing all standing with arrogance you lie about happy life But mind it you have goodness inside you no one is devil You are beautiful because you are born as human who does not eat other humans Your integrity is hidden you might be starving for pleasure but it s completely missing Do not hide yourself behind the world come in front accept the true face and heed what you have never heard Understand what was misunderstood the unspoken sentiments Seek what your soul had been complaining you In last face it accept and alter you because it s beyond five senses Too Weird to Believe, Too Plausible to Deny Cliff Sosis,2025-10-15 Anyone new to philosophy soon encounters new ideas that challenge their hidden biases and cherished beliefs or are at odds with common sense and tradition Yet these philosophical ideas are backed by strong arguments arguments so strong that it s difficult to identify what is wrong with them Too Weird to Believe Too Plausible to Deny Mind Blowing Philosophical Ideas explores these strange yet cogent ideas in 29 short clear chapters written by some of the best philosophers alive today Some of these ideas include Nobody should reproduce You are not responsible for your actions Consciousness is in everything everywhere Your property doesn t really belong to you Absolutely anything can be art Biases are morally good and help us understand reality We can t know what scientific facts are correct Having a disability can be good for you You should never ever lie even to save a life You have no moral duty to obey the law You don t exist because there is no self Each chapter starts with a seemingly counterintuitive philosophical conclusion and a simple accurate description of the underlying argument supporting the conclusion including historical and cultural context This is followed by an outline of objections for the purposes of conversation and debate and a discussion of the implications of the idea or how it may relate to the reader s interests and attitudes Each chapter closes with suggested readings and a list of references for readers who want to learn more about the idea *Journal of Industrial and Engineering Chemistry* ,1918
