**Monoclonal Antibodies: From Lot Release to Stability Testing** Harleen Kaur,2024-06-04 Therapeutic Monoclonal Antibodies From Lot Release to Stability Testing is a highly topical resource on a subject of interest for scientists and researchers working on monoclonal antibodies characterization release testing stability testing and similarity assessments of monoclonal antibodies in the biopharmaceutical industry Monoclonal antibodies mAbs are large extremely complex and dynamic biomolecules so it can be challenging to develop well characterized therapeutic antibodies that meet regulatory expectations that are also in line with commercialized standards for different drug markets Lot release testing and

understanding the stability of the mAb over a period of time and in different environmental conditions is an indispensable aspect of mAb physicochemical characterization. This book covers the process including extensive analysis that starts with quantifying the purity attribute to glycan profiling and identifying the mAb primary structure. The book has a primary purpose of focusing on both Lot release testing and stability testing of monoclonal antibodies, subjects not covered in any great detail in other books. It discusses in detail the Lot release methods for both drug substance and drug product along with their importance in process sample analysis. It gives specific attention to general characteristics tests such as pH determination, osmolality, sub-visible particle count, appearance, and visible tests, and regulatory pharmacopeial guidelines. It includes different kinds of stability testing: real time, accelerated, and stressed, and their importance and determinations on product shelf life. It presents regulatory guidelines on ICH Q2R1, ICHQ6B, and ICHQ5C, which are discussed along with analytical method validation, monoclonal antibodies physicochemical characterization and stability testing. It provides different characterization methods and validation and development case studies of monoclonal antibodies, including biosimilars and innovators.
