The Rise And Fall Of Gunns Ltd:

The Rise and Fall of Gunns Ltd Quentin Beresford, 2015-02-01 At its peak Gunns Ltd had a market value of 1 billion was listed on the ASX 200 was the largest employer in the state of Tasmania and its largest private landowner Most of its profits came from woodchipping mainly from clear felled old growth forests A pulp mill was central to its expansion plans Its collapse in 2012 was a major national news story as was the arrest of its CEO for insider trading Quentin Beresford illuminates for the first time the dark corners of the Gunns empire He shows it was built on close relationships with state and federal governments political donations and use of the law to intimidate and silence its critics Gunns may have been single minded in its pursuit of a pulp mill in Tasmania s Tamar Valley but it was embedded in an anti democratic and corrupt system of power supported by both main parties business and unions Simmering opposition to Gunns and all it stood for ramped up into an environmental campaign not seen since the Franklin Dam protests Fearless and forensic in its analysis the book shows that Tasmania s decades long quest to industrialise nature fails every time But the collapse of Gunns is the most telling of them all This is a tale that needed telling It is an important case history in environmental campaigning and a must read for anyone interested in fairness and transparency in government Geoffrey Cousins AM businessman and president of the Australian Conservation Foundation

Losing Streak James Boyce, 2017-03-14 A jaw dropping account of how one company came to own every poker machine in the state of Tasmania and the cost to democracy the public purse and problem gamblers and their families The story begins with the toppling of a premier and ends with David Walsh the man behind MONA taking an eccentric stand against pokie machines and the

political status quo It is a story of broken politics and back room deals It shows how giving one company the licence to all the poker machines in Tasmania has led to several hundred million dollars of profits mainly from problem gamblers being diverted from public use through a series of questionable and poorly understood deals Losing Streak is a meticulous compelling case study in governance failure which has implications for pokies reform throughout Australia *Born to Rule?* Paddy Manning,2018-12-03 After wresting the prime ministership from long term adversary Tony Abbott Malcolm Turnbull's term at the Lodge was brutally short It traversed a soaring electoral honeymoon to the marathon 2016 election to the compromises of a government with the slimmest of majorities and finally death by political sword Why Was it collateral damage for a Liberal Party tearing itself apart or a consequence of the man himself Born to Rule by esteemed journalist Paddy Manning is the updated bestselling biography of one of Australia's most celebrated overachievers charting his very public highs and lows in technicolour detail Based on countless interviews and painstaking research Born to Rule charts Turnbull's relentless progression from exclusive Point Piper to Oxford University from beating the Thatcher government in the Spycatcher trial to losing the referendum on the republic from defending the late Kerry Packer in a Royal Commission to defending his own role in Australia's biggest corporate collapse It gives forensic accounts of him striking it rich as co founder of OzEmail his spectacular misstep with the UteGate affair and the hotly contested battle for Wentworth on his grand march towards become prime minister Turnbull may be out of parliament but will he ever be out of politics **Lucky Country?** Ian Lowe,2016-03-23 Can we reinvent the Lucky Country Fifty years ago author Donald Horne described Australia as a lucky country run by second rate people adding that our leaders are mostly unaware of events that surround them The good fortune continued when our wide brown land proved to contain bountiful resources of saleable minerals allowing successive generations of second rate leaders to create an illusion of economic progress by liquidating those assets But a crisis is approaching driven by irresponsible encouragement of population growth rates typical of poor developing countries In this polemic work Ian Lowe will assess the state of Australia and whether we can retain our status of the Lucky Country *Time and Environmental Law* Benjamin J. Richardson,2017-08-03 Through the lens of time the book critiques environmental law and recommends ways to enable it to respond to nature's time scales **The Routledge Handbook of Environment and Communication** Anders Hansen,Robert Cox,2022-12-26 This revised and fully updated second edition of the Routledge Handbook of Environment and Communication provides a state of the art overview of environmental communication theory practice and research The momentous changes witnessed in the politics of the environment as well as in the nature of media and public communication in recent years have made the study and understanding of environmental communication ever more pertinent This is reflected in this second edition including a number of exciting new chapters concerned with environmental communication in an age of misinformation and fake news environmental communication community and social transformation environmental justice and advances in methods for the analysis of mediated environmental

Journalism Bill Dodd, 2021-02-15 As audiences avoid negative news and public risk perceptions fracture across polarized media ecologies journalists are being called upon to tell engaging and optimistic stories about the future Consequently solutions journalism has moved from the margins to the global mainstream resulting in a plurality of new solutions focused practices Solutions Journalism News at the Intersection of Hope Leadership and Expertise explores the professional dynamics and tensions concerning solutions journalism clarifies these related practices and in so doing provides scholars and journalists with a nuanced appreciation of the opportunities and liabilities of reporting solutions Drawing upon a year long study of journalism in Tasmania Bill Dodd develops a tripartite theory of solutions journalism at the intersection of three core concepts hope leadership and expertise In Australia's lagging southernmost province where development propositions have sparked global protest movements New Tasmania represented a newly optimistic spirit of bipartisanship Yet in this book a close reading of solutions focused discourse reveals deeper asymmetries regarding whose voices are routinely privileged in framing the future On this basis the book argues for a solutions journalism founded on a nuanced understanding of hope and a plurality of community leaders and practical expertise Rescuing Democracy Paul E. Smith, 2016 This book proposes a new institution the People's Forum to enable democratic governments to effectively address long running issues like global warming and inequality It would help citizens decide what strategic problems their government must fix especially where this requires them to suffer some inconvenience or cost The People's Forum is first based on a new diagnosis of government failure in democracies The book tests its own analyses of government failure by seeing whether these might help us to explain the failures of particular democracies to address and in some cases to even recognize several crucial environmental problems The essential features of a new design for democracy are described and then compared with those of previous institutional designs that were also intended to improve the quality of democratic government In that comparison the People's Forum turns out to be not only the most effective design for developing and implementing competent policy but also the easiest to establish and run The latter advantage is crucial as there has been no success in getting previous designs into actual trial practice It is hoped that this book may inspire a small group to raise the money to set up and run the People's Forum Then as citizens see it operating and engage with it they may come to regard the new Forum as essential in helping

them to deliberate long running issues and to get their resulting initiatives implemented by government Smith also discusses how the People s Forum must be managed and how groups with different political ideologies may react to it An Afterword sets out the method by which this design was produced to help those who might want to devise an institution themselves The new concepts in environmental science that the book develops to test its diagnosis are applied in an Appendix to outline crucial options for the future of Tasmania Similar options apply to many countries states and provinces As indicated above those choices are currently beyond the capacity of democratic governments to address and in some cases even to recognize But the People s Forum may lift them out of that morass Global Trade and Mediatized Environmental Protest Libby

Inside the Greens Paddy Manning, 2019-08-19
 A penetrating examination of the history and future of the Australian Greens The re election of a Coalition government after a lost decade of policy backflips and leadership volatility has redrawn the political landscape With a record quarter of voters abandoning the major parties at the last election what lies ahead for the Greens the third force in Australian politics In a nation divided over global warming rising inequality and national security can they agitate for forward thinking policy or will a refusal to compromise prove a stumbling block Inside the Greens investigates the personalities policies and turning points that have formed the party from the fight to save Lake Pedder to the Stop Adani convoy from heckling George W Bush to the fateful decision to vote down the carbon tax from party of protest to the balance of power in minority governments at state and federal level It also exposes the Greens as they are today a divided organisation reckoning with structural and strategic challenges Beset by factional showdowns and suggestions of internal sabotage can the party hang together Has it strayed too far from grassroots activism Can the Greens do politics differently and still succeed Journalist Paddy Manning draws on previously unrevealed archival material and interviews with party friends foes and key figures including Bob Brown Christine Milne Lee Rhiannon Adam Bandt and Richard Di Natale to weave a compulsively readable account of where the Greens are heading and what that means for Australia A monumental effort Inside the Greens manages to be not just a fine resource on a single party but of the times that produced them Crikey
