*Mass Authorship and the Rise of Self-Publishing* Timothy Laquintano, 2016-10-01 In the last two decades digital technologies have made it possible for anyone with a computer and an Internet connection to rapidly and inexpensively self publish a book Once a stigmatized niche activity self publishing has grown explosively Hobbyists and professionals alike have produced millions of books circulating them through e readers and the web What does this new flood of books mean for publishing authors and readers Some lament the rise of self publishing because it tramples the gates and gatekeepers who once reserved publication for those who met professional standards Others tout authors new freedom from the narrow minded exclusivity of traditional publishing Critics mourn the death of the author fans celebrate the democratization of authorship Drawing on eight years of research and interviews with more than eighty self published writers *Mass Authorship* avoids the polemics instead showing how writers are actually thinking about and dealing with this brave new world Timothy Laquintano compares the experiences of self publishing authors in three distinct genres poker strategy guides memoirs and romance novels as well as those of writers whose self published works hit major bestseller lists He finds that the significance of self publishing and the challenge it presents to traditional publishing depend on the aims of authors the desires of their readers the affordances of their platforms and the business plans of the companies that provide those platforms In drawing a nuanced portrait of self publishing authors today Laquintano answers some of the most pressing questions about what it means to publish in the twenty first century How do writers establish credibility in an environment with no editors to judge quality How do authors police their copyrights online without recourse to the law How do they experience Amazon as a publishing platform And how do they find an audience when it sometimes seems there are more writers than readers

**Writing Changes:**

**Alphabetic Text and Multimodal Composition** Pegeen Reichert Powell, 2020-04-01 Writing Changes moves beyond restrictive thinking about composition to examine writing as a material and social practice rich with contradictions It analyzes the assumed dichotomy between writing and multimodal composition which incorporates sounds images and gestures as well as the truism that all texts are multimodal Organized in four sections the essays explore alphabetic text and multimodal composition in writing studies specific pedagogies that place writing in productive conversation with multimodal forms current representations of writing and multimodality in textbooks of instructors attitudes toward social media and of writing programs ideas about writing studies as a discipline in the light of new communication practices Bookending the essays are an introduction that frames the collection and establishes key terms and concepts and an epilogue that both sums up and complicates the ideas in the essays

**What It Means to Be Literate** Elisabeth L. Miller, 2022-11-01 Disability and literacy are often understood as incompatible Disability is taken to be a sign of illiteracy and illiteracy to be a sign of disability These oppositions generate damaging consequences for disabled students and those labeled as such who are denied full literacy education and for nonliterate adults who are perceived as lacking intelligence knowledge and ability *What It Means to Be Literate* turns attention to disabled writers themselves exposing how the cultural oppositions between disability and literacy affect how people understand themselves as literate and even as fully human Drawing on interviews with individuals who have experienced strokes and brain injuries causing the language disability aphasia Elisabeth L Miller argues for the importance of taking a disability materiality approach to literacy that accounts for the embodied material experiences of disabled people writing and reading This approach reveals how aphasic writers literate practices may reinscribe challenge or even exceed scripts around the body in literacy how brains hands eyes mouths voice boxes and more operate to make reading and writing happen as well as what and how spaces activities tools and materials matter in literate practice Miller pushes for a deeper understanding of how individuals specific bodies always matter for literate practice and identity enabling researchers to better account for and counter ableist literate norms

**Understanding and Supporting Young Writers from Birth to 8** Noella M. Mackenzie, Janet Scull, 2017-12-14 As the world comes to grips with what it means to be literate in the twenty first century Understanding and Supporting Young Writers from Birth to 8 provides practitioners with the skills and knowledge they need to support young children effectively as they learn to write Interweaving theory and research with everyday practice the book offers guidance on all aspects of writing from creating multimodal texts and building children s vocabulary to providing support for children who find writing particularly challenging With appropriate strategies to develop young children s writing from an early age included throughout the book discusses the role of oral language in early writing in detail and explores the key relationships between drawing and talking drawing and writing and drawing talking and writing Each chapter also features samples of writing and drawing to illustrate key points as well as reflective questions to help the reader apply ideas in their own settings Further topics covered include progressions in children s writing writing in the pre school years developing authorial skills developing editorial skills teaching writing to EAL learners Understanding and Supporting Young Writers from Birth to 8 is a unique resource that will help early childhood educators early years school teachers specialist practitioners working with very young children and students enrolled in Early Childhood or Primary Studies courses to boost their confidence in teaching young learners as they become writers **Beyond Productivity** Kim Hensley Owens, Derek Van Ittersum, 2023-11-15 In Beyond Productivity a wide range of contributors share honest narratives of the sometimes impossible conditions that scholars face when completing writing projects The essays provide backstage views of the authors varying approaches to moving forward when the desire to produce wanes when deciding a project is not working when working within and around and redefining academic productivity expectations and when writing with ever changing bodies that do not always function as expected This collection positions scholarly writers ways of writing as a form of flexible evolving knowledge By exhibiting

what is lost and gained through successive rounds of transformation and adaptation over time the contributors offer a sustainable understanding and practice of process one that looks beyond productivity as the primary measure of success Each presents a fluid understanding of the writing process illustrating its deeply personal nature and revealing how fragmented and disjointed methods and experiences can highlight what is precious about writing Beyond Productivity determines anew the use and value of scholarly writing and the processes that produce it both within and beyond the context of the losses constraints and adaptations associated with the COVID 19 pandemic Telling Stories Jenn Fishman, Amy C. Kimme Hea, 2023-07-23 In Telling Stories more than a dozen longitudinal writing researchers look beyond conventional project findings to story their work and in doing so offer otherwise unavailable glimpses into the logics and logistics of long range studies of writing The result is a volume that centers interrelations among people places and politics across two decades of praxis and an array of educational sites two year colleges a senior military college an adult literacy center a small liberal arts college and both public and private four year universities Contributors share direct knowledge of longitudinal writing research citing project data e g interview transcripts research notes and journals descriptions drawn from memory and extended personal reflections The resulting stories tempered by the research and scholarship of others convey a sense of longitudinal research as a lived activity as well as a prominent and consequential approach to inquiry Yet Telling Stories is not a how to guide nor is it written for longitudinal researchers alone Instead this volume addresses issues about writing research that are germane to all who conduct or count on it Such topics include building and sustaining good interpersonal research relations ethically negotiating the institutional power dynamics that undergird writing research effectively using knowledge from longitudinal studies to advocate for writers and writing educators and improving both conceptual and concrete resources for long range research in writing studies **Reading** Roger Beard, 2022-10-20 The field of reading is a compelling one characterised by many debates and discussions It is also amenable to investigations through a range of theories and research studies In this book eight leading authorities provide a state of the art overview of reading using perspectives that have informed their work There are overviews from linguistic psychological sociological and literary viewpoints as well as more hybrid ones from investigations of digital literacy and multi modality This book celebrates what has already been achieved by bridging research scholarship and practice it also suggests what still needs to be done to bring the positive rewards from reading to greater numbers of young people It also recognises that the benefits of reading extend beyond the personal Accomplished reading skills empower people to meet the challenges of everyday life making decisions solving problems and dealing with unexpected events The need to refresh and renew our knowledge of reading has gained further impetus in the information age New technologies for information and communication continually appear manifestations of fake news disinformation and conspiracy theories spread rapidly across the globe The book underlines the importance not only of reading but also the fact that reading between and beyond the lines is more important than ever in

print and across multiple media platforms The chapters in this book were originally published as a special issue of Education  
3 13 International Journal of Primary Elementary and Early Years Education      *Writing at the State U* Emily  
Isaacs, 2018-02-21 *Writing at the State U* presents a comprehensive empirical examination of writing programs at 106  
universities Rather than using open survey calls and self reporting Emily Isaacs uses statistical analysis to show the extent to  
which established principles of writing instruction and administration have been implemented at state comprehensive  
universities the ways in which writing at those institutions has differed from writing at other institutions over time and how  
state institutions have responded to major scholarly debates concerning first year composition and writing program  
administration Isaacs s findings are surprising state university writing programs give lip service to important principles of  
writing research but many still emphasize grammar instruction and a skills based approach classes continue to be outsized  
faculty development is optional and orientation toward basic writing is generally remedial As such she considers where a  
closer match between writing research and writing instruction might help to expose and remedy these difficulties and  
identifies strategies and areas where faculty or writing program administrators are empowered to enact change Unique in its  
wide scope and methodology *Writing at the State U* sheds much needed light on the true state of the writing discipline at  
state universities and demonstrates the advantages of more frequent and rigorous quantitative studies of the field

Assessing Writing to Support Learning Sandra Murphy, Peggy O'Neill, 2022-11-08 In this book authors Murphy and O  
Neill propose a new way forward moving away from high stakes test based writing assessment and the curriculum it  
generates and toward an approach to assessment that centers on student learning and success Reviewing the landscape of  
writing assessment and existing research based theories on writing the authors demonstrate how a test based approach to  
accountability and current practices have undermined effective teaching and learning of writing This book bridges the gap  
between real world writing that takes place in schools college and careers and the writing that students are asked to do in  
standardized writing assessments to offer a new ecological approach to writing assessment Murphy and O'Neill s new way  
forward turns accountability inside out to help teachers understand the role of formative assessments and assessment as  
inquiry It also brings the outside in by bridging the gap between authentic writing and writing assessment Through these two  
strands readers learn how assessment systems can be restructured to become better aligned with contemporary  
understandings of writing and with best practices in teaching With examples of assessments from elementary school through  
college chapters include guidance on designing assessments to address multiple kinds of writing integrate reading with  
writing and incorporate digital technology and multimodality Emphasizing the central role that teachers play in systemic  
reform the authors offer sample assessments developed with intensive teacher involvement that support learning and provide  
information for the evaluation of programs and schools This book is an essential resource for graduate students instructors  
scholars and policymakers in writing assessment composition and English education
