Mio, 2014-08-01 Scholars in many of the disciplines surrounding politics explicitly utilize either a narrative perspective or a metaphor perspective though rarely the two in combination to analyze issues theoretical and practical domestic and international in the broad field of politics Among the topics they have studied are competing metaphors for the state or nation which have been coined over the centuries in diverse cultures the frequency with which communal and international conflicts are generated at least in part by the clashing religious and historical narratives held by opposing groups the cognitive shortcuts employing metaphor by which citizens make sense of politics the need for political candidates to project a convincing self narrative the extent to which the metaphors used to formulate social issues determine the policies which will be developed to resolve them the failure of narratives around the security of the nation to take account of the individual experiences of women and children This volume is the first in which eminent scholars from disciplines as diverse as social psychology anthropology political theory international relations feminist political science and media studies have sought to integrate the narrative and the metaphor perspectives on politics It will appeal to any scholar interested in the many ways in which narrative and metaphor function in combination as cognitive and rhetorical instruments in discourse around politics

Forgas, 2024-07-30 Tribalism is a key evolutionary feature of humans and the recent growth in tribal polarisation presents a serious challenge to our highly individualistic civilisation. This fascinating book examines the psychological origins and consequences of tribalism both in our private and in our public lives. The chapters explore how social evolutionary biological and cognitive factors shape our tribal habits featuring contributions from eminent international researchers. The chapters review the nature and origins of tribalism the psychological mechanisms promoting tribalism how tribal narratives can distort rationality and perceptions of reality and the role of tribalism in politics and public affairs. The contributions investigate how insecurity the search for meaning and attachment victimhood grievance and cognitive shortcomings can facilitate tribal bonding and how such groups once formed can foster conflict hatred and irrational behaviours. The book suggests that the survival of our extremely successful civilisation based on the enlightenment values of liberty and individualism may well depend on our ability to understand and manage the human evolutionary propensity for tribalism. **Politics of Social Psychology** Jarret T. Crawford, Lee Jussim, 2017-07-28 Social scientists have long known that political beliefs bias the way they think about understand and interpret the world around them. In this volume scholars from social psychology and related fields explore the ways in which social scientists themselves have allowed their own political biases to influence their research. These biases may influence the development of research hypotheses the design of studies and methods and materials chosen to test hypotheses decisions to publish or not publish results based on their consistency with one's prior political beliefs and how results are described and dissemination to the popular press. The fact that these processes occur within academic disciplines such as social psychology that strongly skew to the political left compounds the problem. Contributors to this volume not only identify and document the ways that social psychologists' political beliefs can and have influenced research but also offer solutions towards a more depoliticized social psychology that can become a model for discourse across the social sciences.
