## **The Railways The Market And The Government:**

*The Railways, the Market and the Government* John Hibbs, 2013 The debate on rail privatisation often seems to focus on very narrow issues Those on both sides of the argument seem to be able to employ a mass of statistics to prove their point Proponents of privatisation suggest with some credibility that all was reasonably well with the privatised railways until the Hatfield disaster Opponents point to spiralling costs since privatisation The authors of this monograph examine privatisation in the context of the long history of continual government intervention The government imposed upon the industry a particular structure separation of track and wheel It also wrapped it up in increasing amounts of regulation After examining the history of government intervention in the railways and the privatisation process the authors of this monograph then examine the future of railway policy Should the industry be allowed to evolve its own structure remerging the ownership of track and wheel if it wishes What aspects of a railway should be regulated Who should own the various parts of the infrastructure This monograph is essential reading for all with an interest in railway policy and the process of privatisation

Price, 2012-01-01 Economists owe a great debt to Ekelund and Price for making us aware of Edwin Chadwick's seminal contributions Chadwick lived in the middle of the 19th century but he anticipated many of the theoretical and practical advances that culminated in the law and economics revolution of the late 20th century These include Coase's analysis of social cost and Demsetz's proposal for franchise bidding in natural monopolies Read the summary of Chadwick's ideas about railroads and consider that Britain adopted many of them but only more than a century later while the US continues to wallow in ignorance The book is full of similar examples where Chadwick's prescience is extraordinary Economists legal scholars and practitioners especially those working at the intersection of law and economics will want to

read this book Sam Peltzman University of Chicago US Sir Edwin Chadwick 1800 1890 is hardly a household name among economists although he is a well known hero to sanitation engineers and utilitarian social reformers His brilliant and cunning ideas relating to contemporary economic policy are illuminated for the first time in this pioneering study The authors detail Chadwick s sophisticated conceptions of moral hazard common pool problems asymmetric information and theory of competition all of which differ starkly from those promulgated by Adam Smith and other classical economists Also examined are Chadwick s views on government versus market role in dealing with problems created by natural monopoly and whether some or all market problems justify government regulation or alterations of property rights The authors investigate Chadwick s utilitarian approach to labor business cycles and economic growth contrasting his modern view with those of his classical economic contemporaries Chadwick s enormous output and cutting edge methods undoubtedly establish him as an original and trenchant thinker in economic matters as well as a prophetic voice on contemporary issues in economics This unique look at his less familiar research will interest academic regulatory economists sociologists students and scholars of law and economics and all those interested in the fundamentals of social reform

examines the link between infrastructure and development and explores ways in which developing countries can improve both the provision and the quality of infrastructure services In recent decades developing countries have made substantial investments in infrastructure achieving dramatic gains for households and producers by expanding their access to services such as safe water sanitation electric power telecommunications and transport Even more infrastructure investment and expansion are needed in order to extend the reach of services especially to people living in rural areas and to the poor But as this report shows the quantity of investment cannot be the exclusive focus of policy Improving the quality of infrastructure service also is vital Both quantity and quality improvements are essential to modernize and diversify production help countries compete internationally and accommodate rapid urbanization The report identifies the basic cause of poor past performance as inadequate institutional incentives for improving the provision of infrastructure To promote more efficient and responsive service delivery incentives need to be changed through commercial management competition and user involvement Several trends are helping to improve the performance of infrastructure First innovation in technology and in the regulatory management of markets makes more diversity possible in the supply of services Second an evaluation of the role of government is leading to a shift from direct government provision of services to increasing private sector provision and recent experience in many countries with public private partnerships is highlighting new ways to increase efficiency and expand services Third increased concern about social and environmental sustainability has heightened public interest in infrastructure design and performance
