Hoffecker, 2017-10-31 Modern Humans is a vivid account of the most recent and perhaps the most important phase of human evolution the appearance of anatomically modern people Homo sapiens in Africa less than half a million years ago and their

later spread throughout the world Leaving no stone unturned John F Hoffecker demonstrates that Homo sapiens represents a major transition in the evolution of living systems in terms of fundamental changes in the role of non genetic information Modern Humans synthesizes recent findings from genetics including the rapidly growing body of ancient DNA the human fossil record and archaeology relating to the African origin and global dispersal of anatomically modern people Hoffecker places humans in the broad context of the evolution of life emphasizing the critical role of genetic and non genetic forms of information in living systems as well as how changes in the storage transmission and translation of information underlie major transitions in evolution He also draws on information and complexity theory to explain the emergence of Homo sapiens in Africa several hundred thousand years ago and the rapid and unprecedented spread of our species into a variety of environments in Australia and Eurasia including the Arctic and Beringia beginning between 75 000 and 60 000 years ago This magisterial work will appeal to all with an interest in the ever fascinating field of human evolution Bound Together Nayan Chanda,2008-10-01 Since humans migrated from Africa and dispersed throughout the world they have found countless ways and reasons to reconnect with each other In this entertaining book Nayan Chanda follows the exploits of traders preachers adventurers and warriors throughout history as they have shaped and reshaped the world For Chanda globalization is a process of ever growing interconnectedness and interdependence that began thousands of years ago and continues to this day with increasing speed and ease In the end globalization from the lone adventurer carving out a new trade route to the expanding ambitions of great empires is the product of myriad aspirations and apprehensions that define just about every aspect of our lives what we eat wear ride or possess is the product of thousands of years of human endeavor and suffering across the globe Chanda reviews and illustrates the economic and technological forces at play in globalization today and concludes with a thought provoking discussion of how we can and should embrace an inevitably global world
