Kearns,1996-01-26 A challenging rethinking of traditional theories and redefinition of the genre of realism *Building the Human City* John F. Kane,2016-03-30 Building the Human City is a first overview of the award winning yet quite diverse works of Jesuit philosopher William F Lynch Writing from the 1950s to the mid 1980s Lynch was among the first to warn against the fierce polarizations prevalent in our culture wars and political life He called for a transformation of artistic and intellectual sensibilities and imaginations through the healing discernments and critical ironies of an Ignatian and Socratic spirituality Yet the breadth of his concerns from cinema and literature to mental health and hope to secularization and faith as well as the depth of his thought philosophical as much as theological led to little initial awareness of the overall vision uniting his writings This book while exploring that vision also argues that the spirituality Lynch proposes is more needed today than when he first wrote We Believe in the Holy Spirit Henco van der Westhuizen,2023-07-07 We Believe in the Holy Spirit is a collection of articles reflecting some of the most important ideas in pneumatology in recent years Although the articles were not written to fit the articles of the Nicene Creed 381 linking these articles to the articles of the creed sheds imaginative light on the development of ideas in theologies of the Spirit Children's Literature Barbara Stoodt,1996

The Realist Novel Dennis Walder,2005-08-18 This book guides the student through the fundamentals of this enduring literary form By using carefully selected novels the authors provide a lively examination of the particular themes and modes of realist novels of the period **Ghostly Paradoxes** Ilya Vinitsky,2018-11-05 The culture of nineteenth century Russia is often seen as dominated by realism in the arts as exemplified by the novels of Leo Tolstoy and Ivan Turgenev the paintings of the Wanderers and the historical operas of Modest Mussorgsky Paradoxically nineteenth century Russia was also consumed with a passion for spiritualist activities such as table rappings seances of spirit communication and materialization of the spirits Ghostly Paradoxes examines the surprising relationship between spiritualist beliefs and practices and the positivist mindset of the Russian Age of Realism 1850 80 to demonstrate the ways in which the two disparate movements influenced each other Foregrounding the important role that nineteenth century spiritualism played in the period s aesthetic ideological and epistemological debates Ilya Vinitsky challenges literary scholars who have considered spiritualism to be archaic and peripheral to other cultural issues of the time Ghostly Paradoxes is an innovative work of literary scholarship that traces the reactions of Russia s major realist authors to spiritualist events and doctrines and demonstrates that both movements can be understood only when examined together **Novel Politics** Isobel Armstrong,2016-12-22 Novel Politics aims to change the current consensus of thinking about the nineteenth century novel This assumes that the novel is structured by bourgeois ideology and morality so that its default position is conservative and hegemonic Such critique comes alike from Marxists readers of nineteenth century liberalism and critics making claims for the working class novel and systematically under reads democratic imaginations and social questioning in novels of the period To undo such readings means evolving a new praxis of critical writing Rather than addressing the explicitly political and deeply limited accounts of the machinery of franchise and

ballot in texts it is important to create a poetics of the novel that opens up its radical aspects This can be done partly by taking a new look at some classic nineteenth century political texts Mill De Tocqueville Hegel but centrally by exploring four claims the novel is an open Inquiry compare philosophical Inquiries of the Enlightenment contemporary with the novel s genesis a lived interrogation not a pre formed political document radical thinking requires radical formal experiment creating generic and ideological disruption simultaneously and putting the so called realist novel and its values under pressure the poetics of social and phenomenological space reveals an analysis of the dispossessed subject not the bildung of success or overcoming the presence of the aesthetic and art works in the novel is a constant source of social questioning Among texts discussed six novels of illegitimacy from Jane Austen to Scott to George Eliot and George Moore stand out because illegitimacy with its challenge to social norms is a test case for the novelist and a growing point of the democratic imagination **Anthology of Swedish Lyrics from 1750 to 1915** Charles Wharton Stork,1917 Balzac, James, and the Realistic Novel William W. Stowe,2014-07-14 This book has a double purpose to compare the literary projects theories and careers of Balzac and Henry James and to develop a theory of realism that can account for their unabashed mimetic intentions and for their novels sophisticated textuality Originally published in 1983 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Peers,Nandini Goopu,2017-02-09 South Asian History has enjoyed a remarkable renaissance over the past thirty years Its historians are not only producing new ways of thinking about the imperial impact and legacy on South Asia but also helping to reshape the study of imperial history in general The essays in this collection address a number of these important developments delineating not only the complicated interplay between imperial rulers and their subjects in India but also illuminating the

economic political environmental social cultural ideological and intellectual contexts which informed and were in turn informed by these interactions Particular attention is paid to a cluster of binary oppositions that have hitherto framed South Asian history namely colonizer colonized imperialism nationalism and modernity tradition and how new analytical frameworks are emerging which enable us to think beyond the constraints imposed by these binaries Closer attention to regional dynamics as well as to wider global forces has enriched our understanding of the history of South Asia within a wider imperial matrix Previous impressions of all powerful imperialism with the capacity to reshape all before it for good or ill are rejected in favour of a much more nuanced image of imperialism in India that acknowledges the impact as well as the intentions of colonialism but within a much more complicated historical landscape where other processes are at work
