The Benefits of the Cold and Domestication Florian Stammler,Hiroki Takakura,2025-04-28 This book explores cooperation between humans and animals in extreme environments and contends that understanding domestication is crucial to explaining how life is possible in such conditions The chapters draw on work from anthropology genetics law and geography with a range of ethnographic case studies from cold environments The contributors offer new evidence for rethinking the dichotomy of trust vs domination previously used to characterize human animal relations They show how humans and animals partner for survival and how a cold environment does not merely threaten existence but rather creates opportunities Domestication is presented as a continuous mutually beneficial human animal relationship of becoming familiar with each other and the surrounding environment which can lead to a symbiotic partnership of multiple agents for adapting to changes including a warming climate This volume will be relevant to scholars from anthropology geography and related disciplines interested in human animal relations ecology and the environment particularly in the North **Beastly**

Questions Naomi Sykes,2014-08-28 Zooarchaeology or the study of ancient animals is a frequently side lined subject in archaeology This is bizarre given that the archaeological record is composed largely of debris from human animal relationships be they in the form of animal bones individual artifacts or entire landscapes and that many disciplines including anthropology sociology and geography recognise human animal interactions as a key source of information for understanding cultural ideology By integrating knowledge from archaeological remains with evidence from texts iconography social anthropology and cultural geography **Beastly Questions Animal Answers to Archaeological Issues** seeks to encourage archaeological students researchers and those working in the commercial sector to offer more engaging interpretations of the evidence at their disposal Going beyond the simple confines of what people ate this accessible but in depth study covers a variety of high profile topics in European archaeology and provides novel interpretations of mainstream archaeological questions This includes cultural responses to wild animals the domestication of animals and its implications on human daily practice experience and ideology the transportation of species and the value of incorporating animals into landscape research the importance of the study of foodways for understanding past societies and how animal studies can help us to comprehend issues of human identity and ideology past present and future *Routledge Handbook of Indigenous Peoples in the Arctic* Timo Koivurova,Else Grete Broderstad,Dorothée Cambou,Dalee Dorough,Florian Stammler,2020-12-03 This handbook brings together the expertise of Indigenous and non Indigenous scholars to offer a comprehensive overview of issues surrounding the well being self determination and sustainability of Indigenous peoples in the Arctic Offering multidisciplinary insights from leading figures this handbook highlights Indigenous challenges approaches and solutions to

pressing issues in Arctic regions such as a warming climate and the loss of biodiversity. It furthers our understanding of the Arctic experience by analyzing how people not only survive but thrive in the planet's harshest climate through their innovation, ingenuity, and agency to tackle rapidly changing environments and evolving political, social, economic, and cultural conditions. The book is structured into three distinct parts that cover key topics in recent and future research with Indigenous Peoples in the Arctic. The first part examines the diversity of Indigenous peoples and their cultural expressions in the different Arctic states. It also focuses on the well-being of Indigenous peoples in the Arctic regions. The second part relates to the identities and livelihoods that Indigenous peoples in Arctic regions derive from the resources in their environments. This interconnection between resources and people's identities underscores their entitlements to use their lands and resources. The third and final part provides insights into the political involvement of Indigenous peoples from local all the way to the international level and their right to self-determination and some of the recent related topics in this field. This book offers a novel contribution to Arctic studies, empowering Indigenous research for the future and rebuilding the image of Indigenous peoples as proactive participants signaling their pivotal role in the co-production of knowledge. It will appeal to scholars and students of law, political sciences, geography, anthropology, Arctic studies, and environmental studies, as well as policy makers and professionals.

Not Quite Shamans Morten Axel Pedersen, 2011-04-15 The forms of contemporary society and politics are often understood to be diametrically opposed to any expression of the supernatural. What happens when those forms are themselves regarded as manifestations of spirits and other occult phenomena? In *Not Quite Shamans*, Morten Axel Pedersen explores how the Darhad people of Northern Mongolia's remote Shishged Valley have understood and responded to the disruptive transition to postsocialism by engaging with shamanic beliefs and practices associated with the past. For much of the twentieth century, Mongolia's communist rulers attempted to eradicate shamanism, and the shamans who once served as spiritual guides and community leaders. With the transition from a collectivized economy and a one-party state to a global capitalist market and liberal democracy in the 1990s, the people of the Shishged were plunged into a new and harsh world that seemed beyond their control. Not quite shamans, young unemployed men whose undirected energies erupted in unpredictable, frightening bouts of violence and drunkenness that seemed occult in their excess, became a serious threat to the fabric of community life. Drawing on long-term fieldwork in Northern Mongolia, Pedersen details how, for many Darhads, the postsocialist state itself has become shamanic in nature. In the ideal version of traditional Darhad shamanism, shamans can control when and for what purpose their souls travel, whether to other bodies, landscapes, or worlds. Conversely, caught between uncontrollable spiritual powers and an excessive display of physical force, the not quite shamans embody the chaotic forms of the free market, neoliberal reform, and government corruption that have created such upheaval in people's lives. As an experimental ethnography of recent political and economic transformations in Mongolia through the defamiliarizing prism of shamans and their lack, *Not Quite Shamans* is an attempt to write about as well as theorize postsocialism and shamanism in a

new way **The Horse in My Blood** Victoria Soyan Peemot,2024-03-15 A fascinating interspecies relationship can be seen among the horse breeding pastoralists in the Altai and Saian Mountains of Inner Asia Victoria Soyan Peemot herself grew up in a community with close human horse relationships and uses her knowledge of the local language and horsemanship practices Building upon Indigenous research epistemologies she engages with the study of how the human horse relationships interact with each other experience injustices and develop resilience strategies as multispecies unions

Redefining Shamanisms David Gordon Wilson,2013-01-31 Spiritualism and mediumship are often regarded as the product of lingering superstition in the Victorian era and as having limited relevance in modern Anglo American society Scholarship to date which has considered Spiritualism as a distinct religious tradition has focussed on analysing the phenomenon in terms of spirit possession only This volume analyses the development of shamanism communication with the spiritual world as a concept within North American English speaking scholarship with particular focus on Mircea Eliade s influential cross cultural presentation of shamanism By re examining the work of Sergei Shirokogoroff one of Eliade s principal sources the traditional Evenki shamanic apprenticeship is compared and identified with the new Spiritualist apprenticeship The author demonstrates that Spiritualism is best understood as a traditional shamanism as distinct from contemporary appropriations or neo shamanisms He argues that shamanism is the outcome of an apprenticeship in the management of psychic experiences and which follows the same pattern as that of the apprentice medium In doing so the author offers fresh insights into the mechanisms that are key to sustaining mediumship as a social institution **The House of the Dead** Daniel Beer,2017 The House of the Dead is a history of Siberia with a focus on the last four tsars 1801 1917 Daniel Beer explores the massive penal colony that became an incubator for the radicalism of revolutionaries who would one day rule Russia Provided by publisher

Pastures of Change Gillian G. Tan,2018-04-26 This book offers a novel examination of socio environmental change in a nomadic pastoralist area of the eastern Tibetan plateau Drawing on long term fieldwork that underscores an ethnography of local nomadic pastoralists international development organisations and Chinese government policies the book argues that careful analysis and comparison of the different epistemologies and norms about change are vital to any critical appraisal of developments often contested on the grasslands of Eastern Tibet Tibetan nomads have developed a way of life that is dependent in multiple ways on their animals and shaped by the phenomenological experience of mobility These pastoralists have adapted to many changes in their social political and environmental contexts over time From the earliest historically recorded systems of segmentary lineage to the incorporation first into local fiefdoms and then into the Chinese state of both Nationalist and Communist governments Tibetan pastoralists have maintained their way of life complemented by interactions with the outside world Rapid changes brought about by an intensification of interactions with the outside world call into question the sustained viability of a nomadic way of life particularly as pastoralists themselves sell their herds and settle into towns This book probes how we can more clearly

understand these changes by looking specifically at one particular area of high altitude grasslands in the Tibetan Plateau

The Conquest of the Russian Arctic Paul R. Josephson, 2014-06-09 Spanning nine time zones the Russian Arctic was mostly unexplored before the twentieth century Paul Josephson describes the massive effort under Stalin to assimilate the Arctic into the Soviet empire effects still being felt today as Putin redoubles efforts to secure the Arctic which he sees as key to Russia's economic and military status
