Hall, 2009-11-05 Enslaved peoples were brought to the Americas from many places in Africa but a large majority came from

relatively few ethnic groups Drawing on a wide range of materials in four languages as well as on her lifetime study of slave groups in the New World Gwendolyn Midlo Hall explores the persistence of African ethnic identities among the enslaved over four hundred years of the Atlantic slave trade Hall traces the linguistic economic and cultural ties shared by large numbers of enslaved Africans showing that despite the fragmentation of the diaspora many ethnic groups retained enough cohesion to communicate and to transmit elements of their shared culture Hall concludes that recognition of the survival and persistence of African ethnic identities can fundamentally reshape how people think about the emergence of identities among enslaved Africans and their descendants in the Americas about the ways shared identity gave rise to resistance movements and about the elements of common African ethnic traditions that influenced regional creole cultures throughout the Americas

**Current Perspectives on the Archaeology of African Slavery in Latin America** Pedro Paulo A. Funari, Charles E. Orser Jr., 2014-11-10 This edited volume aims at exploring a most relevant but somewhat neglected subject in archaeological studies especially within Latin America maroons and runaway settlements Scholarship on runaways is well established and prolific in ethnology anthropology and history but it is still in its infancy in archaeology A small body of archaeological literature on maroons exists for other regions but no single volume discusses the subject in depth including diverse eras and geographical areas within Latin American contexts Thus a central aim of the volume is to gather together some of the most active Latin American maroon archaeologists in a single volume This volume will thus become an important reference book on the subject and will also foster further archaeology research on maroon settlements The introduction and comments by senior scholars provide a wide ranging and comprehensive analysis of runaway archaeology that will help to indicate the global importance of this research

**Born in Blackness: Africa, Africans, and the Making of the Modern World, 1471 to the Second World War** Howard W. French, 2021-10-12 Revealing the central yet intentionally obliterated role of Africa in the creation of modernity Born in Blackness vitally reframes our understanding of world history Traditional accounts of the making of the modern world afford a place of primacy to European history Some credit the fifteenth century Age of Discovery and the maritime connection it established between West and East others the accidental unearthing of the New World Still others point to the development of the scientific method or the spread of Judeo Christian beliefs and so on ad infinitum The history of Africa by contrast has long been relegated to the remote outskirts of our global story What if instead we put Africa and Africans at the very center of our thinking about the origins of modernity In a sweeping narrative spanning more than six centuries Howard W French does just that for Born in Blackness vitally reframes the story of medieval and emerging Africa demonstrating how the economic ascendancy of Europe the anchoring of democracy in the West and the fulfillment of so called Enlightenment ideals all grew out of Europe's dehumanizing engagement with the dark continent In fact French reveals the first impetus for the Age of Discovery was not as we are so often told even today Europe's yearning for ties with Asia but rather its centuries old desire to forge a trade in gold with legendarily rich Black societies sequestered

away in the heart of West Africa Creating a historical narrative that begins with the commencement of commercial relations between Portugal and Africa in the fifteenth century and ends with the onset of World War II Born in Blackness interweaves precise historical detail with poignant personal reportage In so doing it dramatically retrieves the lives of major African historical figures from the unimaginably rich medieval emperors who traded with the Near East and beyond to the Kongo sovereigns who heroically battled seventeenth century European powers to the ex slaves who liberated Haitians from bondage and profoundly altered the course of American history While French cogently demonstrates the centrality of Africa to the rise of the modern world Born in Blackness becomes at the same time a far more significant narrative one that reveals a long concealed history of trivialization and more often elision in depictions of African history throughout the last five hundred years As French shows the achievements of sovereign African nations and their now far flung peoples have time and again been etiolated and deliberately erased from modern history As the West ascended their stories siloed and piecemeal were swept into secluded corners thus setting the stage for the hagiographic rise of the West theories that have endured to this day Capacious and compelling Laurent Dubois Born in Blackness is epic history on the grand scale In the lofty tradition of bold revisionist narratives it reframes the story of gold and tobacco sugar and cotton and of the greatest commodity of them all the twelve million people who were brought in chains from Africa to the New World whose reclaimed lives shed a harsh light on our present world

*Caribbean New Orleans* Cécile Vidal, 2019-04-23 Combining Atlantic and imperial perspectives Caribbean New Orleans offers a lively portrait of the city and a probing investigation of the French colonists who established racial slavery there as well as the African slaves who were forced to toil for them Casting early New Orleans as a Caribbean outpost of the French Empire rather than as a North American frontier town Cécile Vidal reveals the persistent influence of the Antilles especially Saint Domingue which shaped the city's development through the eighteenth century In so doing she urges us to rethink our usual divisions of racial systems into mainland and Caribbean categories Drawing on New Orleans's rich court records as a way to capture the words and actions of its inhabitants Vidal takes us into the city's streets market taverns church hospitals barracks and households She explores the challenges that slow economic development Native American proximity imperial rivalry and the urban environment posed to a social order that was predicated on slave labor and racial hierarchy White domination Vidal demonstrates was woven into the fabric of New Orleans from its founding This

**The Akan Diaspora in the Americas** Kwasi Konadu, 2010-05-12 In his groundbreaking study of the Akan diaspora Konadu demonstrates how this cultural group originating in West Africa both engaged in and went beyond the familiar diasporic themes of maroonage resistance and freedom Between the sixteenth and nineteenth centuries the Akan never formed a majority among other Africans in the Americas But their leadership skills in war and political organization efficacy in medicinal plant use and spiritual practice and culture archived in the musical traditions language and patterns of African diasporic life far outweighed their sheer numbers Konadu argues that a composite Akan culture calibrated between the Gold Coast and forest fringe made the contributions of the Akan diaspora possible The book examines the Akan experience in Guyana Jamaica Antigua Barbados former Danish and Dutch colonies and North America and how those early experiences foreground the modern engagement and movement of diasporic Africans and Akan people between Ghana and North America Locating the Akan variable in the African diasporic equation allows scholars and students of the Americas to better understand how the diasporic quilt came to be and is still evolving
