The Rise Of The Fiscal State In Europe C 1200 1815:

The Rise of the Fiscal State in Europe, C.1200-1815 Richard Bonney, 1999 This volume builds up an analysis of the fiscal history of Europe over six centuries It forms a starting point for an understanding of the distinctiveness of the emerging European states and highlights the issue of fiscal power

State, Economy and the Great Divergence Peer Vries, 2015-02-26 *State Economy and the Great Divergence* provides a new analysis of what has become the central debate in global economic history the great divergence between European and Asian growth Focusing on early modern China and Western Europe in particular Great Britain this book offers a new level of detail on comparative state formation that has wide reaching implications for European Eurasian and global history Beginning with an overview of the historiography Peer Vries goes on to extend and develop the debate critically engaging with the huge volume of literature published on the topic to date Incorporating recent insights he offers a compelling alternative to the claims to East West equivalence or Asian superiority which have come to dominate discourse surrounding this issue This is a vital update to a key issue in global economic history and as such is essential reading for students and scholars interested in keeping up to speed with the on going debates

A History of States and Economic Policies in Early Modern Europe Silvia A. Conca Messina, 2019-04-24 Why was early modern Europe the starting point of the economic expansion which led to the Industrial Revolution What was the state's role in this momentous transformation *A History of States and Economic Policies in Early Modern Europe* takes a comparative approach to answer these questions demonstrating that wars public finance and state intervention in the economy were the key elements underlying European economic dynamics of the era Structured in two parts the book begins by examining the central issues of the state economy relationship including military revolution the fiscal state and public finance mercantilism the formation of commercial empires and the economic war between Britain and France in the 1700s The second part presents a detailed comparison between the different economic policies of the most important European states looking at their unique demographic economic military and institutional contexts Taken as a whole this work provides a valuable analysis of early modern economic history and a picture of Europe's global position on the eve of the Industrial Revolution This book will be useful to students and researchers of economic history early modern history and European history

The Hundred Years War Revisited Anne Curry, 2019-08-24 The conflict between England and France in the 14th and 15th centuries never ceases to fascinate This stimulating edited collection inspired by the *Problems in Focus* volume originally published in 1971 provides a fresh and accessible insight into the key aspects of The Hundred Years War With chapters written by leading experts in the field based on new methodologies and recent advances in scholarship this book places the Anglo French wars into a range of wider contexts such as politics the home front the church and chivalry Adopting a sustained comparative approach with attention paid to both England and France *The Hundred Years War Revisited* provides a clear and comprehensive synthesis of the major trends in research on the Hundred Years War

Concise and thought provoking this is essential reading for undergraduate and postgraduate students of medieval history

The Oxford Handbook of Early Modern European History, 1350-1750 Hamish Scott, 2015-07-23 This Handbook re-examines the concept of early modern history in a European and global context The term early modern has been familiar especially in Anglophone scholarship for four decades and is securely established in teaching research and scholarly publishing More recently however the unity implied in the notion has fragmented while the usefulness and even the validity of the term and the historical periodisation which it incorporates have been questioned The Oxford Handbook of Early Modern European History 1350 1750 provides an account of the development of the subject during the past half century but primarily offers an integrated and comprehensive survey of present knowledge together with some suggestions as to how the field is developing It aims both to interrogate the notion of early modernity itself and to survey early modern Europe as an established field of study The overriding aim will be to establish that early modern is not simply a chronological label but possesses a substantive integrity Volume II is devoted to Cultures and Power opening with chapters on philosophy science art and architecture music and the Enlightenment Subsequent sections examine Europe beyond Europe with the transformation of contact with other continents during the first global age and military and political developments notably the expansion of state power

Land and Labor Tax in Imperial Qing China (1644-1912) Yongqin Guo, 2022-07-18 In this volume Guo Yongqin provides an overview of the most important taxes land and labor tax in Imperial Qing China 1644 1912 The previously unpublished fiscal sources presented in this volume give a tremendous amount of information about Qing society and economy like the bureaucratic system political institutions economic inequality and environmental conditions The data is accompanied by a detailed introduction offering a valuable resource for further research on how the standardized tax system performed and affected the Qing regime

War, Trade and the State David Ormrod, Gijs Rommelse, 2020 A reassessment of the Anglo Dutch wars of the second half of the seventeenth century demonstrating that the conflict was primarily about trade

War, Revenue, and State Building Sheldon Pollack, 2011-03-15 In a relatively short time the American state developed from a weak highly decentralized confederation composed of thirteen former English colonies into the foremost global superpower This remarkable institutional transformation would not have been possible without the revenue raised by a particularly efficient system of public finance first crafted during the Civil War and then resurrected and perfected in the early twentieth century That revenue financed America's participation in two global wars as well as the building of a modern system of social welfare programs Sheldon D Pollack shows how war revenue and institutional development are inextricably linked no less in the United States than in Europe and in the developing states of the Third World He delineates the mechanisms of political development and reveals to us the ways in which the United States too once was and still may be a developing nation Without revenue states cannot maintain political institutions undergo development or exert sovereignty over their territory Rulers and their functionaries wield the coercive powers of the state to extract that revenue from the

population under their control From this perspective the state is seen as a highly efficient machine for extracting societal revenue that is used by the state to sustain itself War Revenue and State Building traces the sources of public revenue available to the American state at specific junctures of its history in particular during times of war the revenue strategies pursued by its political leaders in response to these factors and the consequential impact of those strategies on the development of the American state

A Big History of Globalization Julia Zinkina,David Christian,Leonid Grinin,Ilya Ilyin,Alexey Andreev,Ivan Aleshkovski,Sergey Shulgin,Andrey Korotayev,2019-04-12 This book presents the history of globalization as a network based story in the context of Big History Departing from the traditional historic discourse in which communities cities and states serve as the main units of analysis the authors instead trace the historical emergence growth interconnection and merging of various types of networks that have gradually encompassed the globe They also focus on the development of certain ideas processes institutions and phenomena that spread through those networks to become truly global The book specifies five macro periods in the history of globalization and comprehensively covers the first four from roughly the 9th 7th millennia BC to World War I For each period it identifies the most important network related developments that facilitated or even spurred on such transitions and had the greatest impacts on the history of globalization By analyzing the world system s transition to new levels of complexityand connectivity the book provides valuable insights into the course of Big History and the evolution of human societies

Tax Law, State-Building and the Constitution Dominic de Cogan,2020-08-06 This monograph looks at how tax is intertwined with constitutional law and the state in the UK It looks at a variety of topics including tax devolution scrutiny and reform of tax legislation the protection of taxpayers and the domestic legal processing of international rules and problems Tax Law State Building and the Constitution presents and interrogates five key claims First there is a clear overlap between the concerns of tax and constitutional lawyers Secondly the tax system is being deeply affected by the fast pace of constitutional change Thirdly decisions taken in the tax field are likely to have a reverse influence on the evolution of the constitution Fourthly these relationships are heavily context dependent with tax making all the difference to some ongoing constitutional controversies whilst having very little to do with others Fifthly by acknowledging tax as an important moving part within the contemporary constitution we might understand both tax and constitutional law a little better The book therefore contributes to deeper theoretical debates on the identity of tax law as a discipline the relevance of tax to public lawyers the meaning of state building in the recent history of a developed country and the importance of public finances to a wider sense of what is going on These are questions that ought to command the attention of tax and constitutional law academics as well as policy makers and reformers Runner up of the 2022 SLS Peter Birks Prize for Outstanding Legal Scholarship

Sacred Foundations Anna M. Grzymała-Busse,2023-01-31 How the medieval church drove state formation in Europe Sacred Foundations argues that the medieval church was a fundamental force in European state formation Existing accounts focus on early modern warfare or contracts between the

rulers and the ruled In contrast this major study shows that the Catholic Church both competed with medieval monarchs and provided critical templates for governing institutions the rule of law and parliaments The Catholic Church was the most powerful wealthiest and best organized political actor in the Middle Ages Starting in the eleventh century the papacy fought for the autonomy of the church challenging European rulers and then claiming authority over people territory and monarchs alike Anna Grzyma a Busse demonstrates how the church shaped distinct aspects of the European state Conflicts with the papacy fragmented territorial authority in Europe for centuries to come propagating urban autonomy and ideas of sovereignty Thanks to its organizational advantages and human capital the church also developed the institutional precedents adopted by rulers across Europe from chanceries and taxation to courts and councils Church innovations made possible both the rule of law and parliamentary representation Bringing to light a wealth of historical evidence about papal conflict excommunications and ecclesiastical institutions Sacred Foundations reveals how the challenge and example of powerful religious authorities gave rise to secular state institutions and galvanized state capacity

Parliamentarism in Northern and East-Central Europe in the Long Eighteenth Century István M. Szijártó, Wim Blockmans, László Kontler, 2022-09-30 This volume investigates the history of the representative assemblies of Sweden the riksdag Poland the sejm and Hungary the diaeta in the final period of the ancien régime It concentrates on the practices and ideas of parliamentarism and constitutionalism and examines the ideologies that motivated the members of these parliaments Attempts at the suppression as well as the restoration of the estates power in all these three countries are examined as well as in the case of Hungary the establishment of popular representation that eventually replaced the estates These three early modern representative assemblies have never before been explored systematically in a comparative framework

Subsidies, diplomacy, and state formation in Europe, 1494-1789 Svante Norrhem, Erik Thomson, 2020-03-18 This electronic version has been made available under a Creative Commons BY NC ND open access license This book examines early modern politics diplomacy and finance by looking at the transfer of money and other resources between sovereigns in return for military or political service often known as the payment of subsidies Focusing on payments made by the French

crown the contributors explore how subsidies provided opportunities for princes statesmen generals and merchant bankers to pursue their political goals By highlighting the ways in which the payment and acceptance of subsidies shaped concepts of honour and reputation the book shows how material interests and questions of identity coalesced The construction of states and the political debates within polities are seen to have been influenced by the movement of money and resources across borders Consequently the interaction between financial and mercantile hubs and networks was vital to state formation in early modern Europe

The Nature and Development of the Modern State Graeme Gill,2017-09-16 Despite the increasing globalization of many aspects of social economic and political life the state remains the fundamental element of contemporary governance This fully revised and extended new edition provides a broad ranging introduction to the origins role and future of the modern state tracing out how significant shifts in state capacity came about in relation to developments in economic political and ideological power

First-Class Passengers on a Sinking Ship Richard Lachmann,2020-01-14 The extent and irreversibility of US decline is becoming ever more obvious as America loses war after war and as one industry after another loses its technological edge Lachmann explains why the United States will not be able to sustain its global dominance He contrasts America s relatively brief period of hegemony with the Netherlands similarly short primacy and Britain s far longer era of leadership Decline in all those cases was not inevitable and did not respond to global capitalist cycles Rather decline is the product of elites success in grabbing control of resources and governmental powers Not only are ordinary people harmed but also capitalists become increasingly unable to coordinate their interests and adopt policies and make investments necessary to counter economic and geopolitical competitors elsewhere in the world Conflicts among elites and challenges by non elites determine the timing and mould the contours of decline Lachmann traces the transformation of US politics from an era of elite consensus to present day paralysis combined with neoliberal plunder explains the paradox of an American military with an unprecedented technological edge unable to subdue even the weakest enemies and the consequences of finance s cannibalisation of the US economy

Taxes and Authority in the Late Antique Countryside Matthias Stern,2025-01-27 How did the late Roman Empire operate in rural areas where most of its subjects lived The papyri from Egypt provide glimpses of state activity at the local level how the countryside responded to it and thus how empire looked on the ground Since a major motivator for state activity at the local level was tax collection Taxes and Authority in the Late Antique Countryside homes in on the pagarchs key fiscal actors at the intersection between provincial city and village institutions from the fourth through the seventh centuries CE The book contextualizes the pagarchs dealings backgrounds and networks from the imperial sphere to the village level exploring topics such as tax collection procedures in the villages central accounting and staffing in the cities the competition of local aristocrats over the countryside official careers and local agency versus imperial policy The result is an analysis of the social mechanics of the fiscal regime in a region of the imperial periphery Exploring the abundant and diverse papyrological source material this book offers a uniquely detailed insight into

the dynamic relationship between the Roman Empire and local communities in late antiquity

The Ideological

Foundations of Qing Taxation Taisu Zhang, 2023-02-09 This survey of the fiscal history of China's last imperial dynasty explains why its ability to tax was unusually weak. It argues that the answer lies in the internal ideological worldviews of the political elite rather than in external political or economic constraints.

Modernizing Europe's Imperial Monarchies Heidi Hein-Kircher, Frederik Frank Sterkenburgh, 2025-05-28 Up until recently Europe's three imperial monarchies—the German, Austrian, and Russian Empires—were seen as moribund political entities unable to accommodate the forces of political, social, economic, and cultural modernization and as a result collapsed collectively during or shortly after the First World War. More recently, scholars have underlined the viability of these polities including as frameworks for democratic experiments and fixed points for supra-national identification notwithstanding the suppression of minorities and colonial undertakings of these empires. This book takes a different approach; it demonstrates that these three imperial monarchies were capable of and willing to initiate and steer the modernization of their institutions and polities. Rather than understanding modernization as a linear and teleological process, this contributed volume draws instead on Samuel Eisenstadt's notion of multiple modernities to demonstrate how these empires sought to modernize on their own terms. By drawing on this concept, it becomes possible to challenge notions of inevitable decline and instead demonstrate how these imperial monarchies sought to forge modernization on their own terms in the nineteenth and early twentieth century.

British Imperialism P.J. Cain, A. G. Hopkins, 2016-03-02 A milestone in the understanding of British history and imperialism, this ground-breaking book radically reinterprets the course of modern economic development and the causes of overseas expansion during the past three centuries. Employing their concept of gentlemanly capitalism, the authors draw imperial and domestic British history together to show how the shape of the nation and its economy depended on international and imperial ties and how these ties were undone to produce the post-colonial world of today. Containing a significantly expanded and updated Foreword and Afterword, this third edition assesses the development of the debate since the book's original publication, discusses the imperial era in the context of the controversy over globalization, and shows how the study of the age of empires remains relevant to understanding the post-colonial world. Covering the full extent of the British empire from China to South America and taking a broad chronological view from the seventeenth century to post-imperial Britain today, *British Imperialism 1688–2015* is the perfect read for all students of imperial and global history.
