The Radio Station details all departments within a radio station, be it a terrestrial, satellite, or Internet operation, from the inside out, covering technology, operations, and sales to syndication. It also offers an overview of how government regulations affect radio stations today and how radio stations have adapted to new communications technologies. Drawing on the insights and observations of those who make their daily living by working in the industry, this edition continues its tradition of presenting the real world perspective of where radio comes from and where it is heading. The Eighth Edition of this classic text includes expanded sections on digital satellite and Internet radio, integration of new technologies, new and evolving formats, the uses and applications of podcasts and blogs, mobile multimedia devices, programming for the new radio formats, new contributions by key industry executives, digital studios, station clustering and consolidation, industry economics and statistics, and updated rules and regulations.
