The Rape Of Troy Evolution Violence And The World Of Homer:

The Rape of Troy Jonathan Gottschall, 2008-03-20 Homer's epics reflect an eighth century BCE world of warrior tribes that were fractured by constant strife aside from its fantastic scale nothing is exceptional about Troy's conquest by the Greeks Using a fascinating and innovative approach Professor Gottschall analyses Homeric conflict from the perspective of modern evolutionary biology attributing its intensity to a shortage of available young women The warrior practice of taking enemy women as slaves and concubines meant that women were concentrated in the households of powerful men In turn this shortage drove men to compete fiercely over women almost all the main conflicts of the Iliad and Odyssey can be traced back to disputes over women The Rape of Troy integrates biological and humanistic understanding biological theory is used to explore the ultimate sources of pitched Homeric conflict and Homeric society is the subject of a bio anthropological case study of why men fight Darwin's Bridge Joseph Carroll, Dan P. McAdams, Edward O. Wilson, 2016-06-01 In its modern usage the term consilience was first established by Edward O Wilson in his 1998 book Consilience The Unity of Knowledge Wilson's original thesis contained two parts that nature forms a unitary order of causal forces hierarchically organized and that scientific knowledge because it delineates nature also forms a unitary order promising consensus among diverse fields Bringing together cutting edge scientists and scholars across this range Darwin's Bridge gives an expert account of consilience and makes it possible to see how far we have come toward unifying knowledge about the human species what major issues are still in contention and which areas of research are likely to produce further progress Readers will be delighted as they along with the work's contributing authors explore the deeper meaning of consilience and consider the harmony of human evolution human nature social dynamics art and narrative Reading Human Nature Joseph Carroll, 2011-03-01 As the founder and leading practitioner of literary Darwinism Joseph Carroll remains at the forefront of a major movement in literary studies Signaling key new developments in this approach Reading Human Nature contains trenchant theoretical essays innovative empirical research sweeping surveys of intellectual history and sophisticated interpretations of specific literary works including The Picture of Dorian Gray Wuthering Heights The Mayor of Casterbridge and Hamlet Evolutionists in the social sciences have succeeded in delineating basic motives but have given far too little attention to the imagination Carroll makes a compelling case that literary Darwinism is not just another school or movement in literary theory It is the moving force in a fundamental paradigm change in the humanities a revolution Psychologists and anthropologists have provided massive evidence that human motives and emotions are rooted in human biology Since motives and emotions enter into all the products of a human imagination humanists now urgently need to assimilate a modern scientific understanding of human nature Integrating evolutionary social science with literary humanism Carroll offers a more complete and adequate understanding of human nature **Enraged** Emily Katz Anhalt, 2017-08-22 Anhalt's contribution is building an overarching narrative of how the Greeks engaged problems of anger problems that continue to

provoke Choice Millennia ago Greek myths exposed the dangers of violent rage and the need for empathy and self restraint Homer's Iliad Euripides Hecuba and Sophocles Ajax show that anger and vengeance destroy perpetrators and victims alike Composed before and during the ancient Greeks groundbreaking movement away from autocracy toward more inclusive political participation these stories offer guidelines for modern efforts to create and maintain civil societies Emily Katz Anhalt reveals how these three masterworks of classical Greek literature can teach us as they taught the ancient Greeks to recognize violent revenge as a marker of illogical thinking and poor leadership These time honored texts emphasize the costs of our dangerous penchant for glorifying violent rage and those who would indulge in it By promoting compassion rational thought and debate Greek myths help to arm us against the tyrants we might serve and the tyrants we might become An engaging and sometimes inspiring guide to the rich complexities of the Iliad Her underlying point is that from its earliest origins Western literature questioned the values of the society that produced it The New York Times Book Review Anhalt has taken on three of history's most important works of literature and applied their lessons to the present day Enraged is an important reminder that reflection dialogue and empathy have no boundaries or time limits Amanda Foreman Whitbread Prize winning author of Georgiana Duchess of Devonshire Anhalt's study is rewarding and unnerving A call to arms Bryn Mawr Classical Review

The ^ADynamics of Ancient Empires Ian Morris, Walter Scheidel, 2009-01-13 The Dynamics of Ancient Empires is designed to address the deficit in the comparative study of ancient empires in the western Old World and to encourage dialogue across disciplinary boundaries by examining the fundamental features of the successive and partly overlapping imperial states that dominated much of the Near East and the Mediterranean in the first millennia BCE and CE

Narrative Complexity Marina Grishakova, Maria Poulaki, 2019-08-01 The variety in contemporary philosophical and aesthetic thinking as well as in scientific and experimental research on complexity has not yet been fully adopted by narratology By integrating cutting edge approaches this volume takes a step toward filling this gap and establishing interdisciplinary narrative research on complexity Narrative Complexity provides a framework for a more complex and nuanced study of narrative and explores the experience of narrative complexity in terms of cognitive processing affect and mind and body engagement Bringing together

leading international scholars from a range of disciplines this volume combines analytical effort and conceptual insight in order to relate more effectively our theories of narrative representation and complexities of intelligent behavior This collection engages important questions on how narrative complexity functions as an agent of cultural evolution how our understanding of narrative complexity can be extended in light of new research in the social sciences and humanities how interactive media produce new types of narrative complexity and how the role of embodiment as a factor of narrative complexity acquires prominence in cognitive science and media studies The contributors explore narrative complexity transmitted through various semiotic channels embedded in multiple contexts and experienced across different media including film comics music interactive apps audiowalks and ambient literature

The Meaning of Meat and the Structure of the Odyssey Egbert J. Bakker, 2013-04-18 This comprehensive study of the *Odyssey* sees in meat and meat consumption a centre of gravitation for the interpretation of the poem It aims to place the cultural practices represented in the poem against the background of the agricultural lived reality of the poem's audiences in the archaic age and to align the themes of the adventures in Odysseus' wanderings with the events that transpire at Ithaca in the hero's absence The criminal meat consumption of the suitors of Penelope in the civilised space of Ithaca is shown to resonate with the adventures of Odysseus and his companions in the pre-cultural worlds they are forced to visit The book draws on folklore studies the anthropology of hunting cultures the comparative study of oral traditions and the agricultural history of archaic and classical Greece It will also be of interest to narratologists and students of folklore and Homeric poetics

Stories of Love from Vikings to Tinder Mads Larsen, 2024-09-30 Increasing levels of singledom dating dysfunction and sexual inactivity contribute to plummeting fertility rates This book investigates the perhaps most foundational factor behind this uncoupling our present era's ideology of love Throughout human history communities have shared fictional stories infused with various mating moralities that compel people to pair bond and reproduce After taking readers on a 6 million year journey through hominin mating regimes with various extents of promiscuity polygyny and monogamy *Stories of Love from Vikings to Tinder* investigates the past millennium's radical evolution of Western mating beliefs Nordic literary works illuminate the pivotal transitions between the West's First Second and Third Sexual Revolutions which occurred around the years 1200 1750 and 1968 The conclusion chapter points to the Fourth Sexual Revolution symbolically placed in 2029 Artificial intelligence and other technologies seem likely to transform our mating practices more radically than any of the previous revolutions

Science Meets Literature Dario Maestripieri, 2019-06-28 Elias Canetti's 1935 novel *Auto da F* original German title *Die Blendung* has traditionally been difficult to interpret and the author's intentions in writing it have remained unclear *Science Meets Literature* argues that *Auto da F* is a novel about human nature that illustrates the workings of the human mind and some universal aspects of human behavior and human social relationships Canetti's insights anticipated later scientific discoveries made by cognitive social and evolutionary psychology including the existence of irrational biases in human cognition e.g. in perception beliefs and decision making the strengths and limitations of human theory of mind skills i.e. our ability to think about other people's minds and read them the establishment maintenance and reversal of dominance in social relationships between two individuals and the role of dehumanization in harmful behavior Canetti intended to warn against the conviction held by some intellectuals that human nature can be denied controlled ignored or dismissed His approach in *Auto da F* was an original attempt at the integration of knowledge formation in sciences and humanities He pointed the way for future successful attempts at the integration of evolution cognitive science and literature as well as for the broader integration of sciences and humanities

The Evolutions of Modernist Epic Václav Paris, 2021-01-07 Modernist epic is more interesting and more diverse than we have supposed As a radical form of national fiction it appeared in many parts of the world in the early twentieth century Reading a selection of works from the United States England Ireland Czechoslovakia and Brazil *The Evolutions of Modernist Epic* develops a comparative theory of this genre and its global development That development was it argues bound up with new ideas about biological evolution During the first decades of the twentieth century a period known in the history of evolutionary science as the eclipse of Darwinism evolution's significance was questioned rethought and ultimately confined to the Neo Darwinist discourse with which we are familiar today Epic fiction participated in and was shaped by this shift Drawing on queer forms of sexuality to cultivate anti heroic and non progressive modes of telling national stories the genre contested reductive and reactionary forms of social Darwinism The book describes how in doing so the genre asks us to revisit our assumptions about ethnolinguistics and organic nationalism It also models how the history of evolutionary thought can provide a new basis for comparing diverse modernisms and their peculiar nativisms

Can War be Eliminated? Christopher Coker, 2014-01-14 Throughout history war seems to have had an iron grip on humanity In this short book internationally renowned philosopher of war Christopher Coker challenges the view that war is an idea that we can cash in for an even better one peace War he argues is central to the human condition it is part of the evolutionary inheritance which has allowed us to survive and thrive New technologies and new geopolitical battles may transform the face and

purpose of war in the 21st century but our capacity for war remains undiminished The inconvenient truth is that we will not see the end of war until it exhausts its own evolutionary possibilities **Text and Intertext in Greek Epic and Drama**

Consilience Edward Slingerland, Mark Collard, 2012-01-19 Calls for a consilient or vertically integrated approach to the study of human mind and culture have for the most part been received by scholars in the humanities with either indifference or hostility One reason for this is that consilience has often been framed as bringing the study of humanistic issues into line with the study of non human phenomena rather than as something to which humanists and scientists contribute equally The other major reason that consilience has yet to catch on in the humanities is a dearth of compelling examples of the benefits of adopting a consilient approach Creating Consilience is the product of a workshop that brought together internationally renowned scholars from a variety of fields to address both of these issues It includes representative pieces from workshop speakers and participants that examine how adopting such a consilient stance informed by cognitive science and grounded in evolutionary theory would concretely impact specific topics in the humanities examining each topic in a manner that not only cuts across the humanities natural science divide but also across individual humanistic disciplines By taking seriously the fact that science humanities integration is a two way exchange this volume takes a new approach to bridging the cultures of science and the humanities The editors and contributors formulate how to develop a new shared framework of consilience beyond mere interdisciplinarity in a way that both sides can accept **Telling Stories / Geschichten erzählen** Carsten Gansel, Dirk Vanderbeke, 2012-02-22 The essays collected in this volume highlight the narrative as a phenomenon inherent in human nature They examine the likely purpose of artistic and literary expression and its contribution to survival in an early human environment They also consider the developing interest in shaping experience through the narrative and investigate the consequent significance of traits acquired throughout the ages for the production and reception of texts In doing so the book provides a highly diverse overview of the latest research and debates in this innovative field of research **On the**

Origin of Stories Brian Boyd, 2010-11-15 A century and a half after the publication of Origin of Species evolutionary

thinking has expanded beyond the field of biology to include virtually all human related subjects anthropology archeology psychology economics religion morality politics culture and art Now a distinguished scholar offers the first comprehensive account of the evolutionary origins of art and storytelling Brian Boyd explains why we tell stories how our minds are shaped to understand them and what difference an evolutionary understanding of human nature makes to stories we love Art is a specifically human adaptation Boyd argues It offers tangible advantages for human survival and it derives from play itself an adaptation widespread among more intelligent animals More particularly our fondness for storytelling has sharpened social cognition encouraged cooperation and fostered creativity After considering art as adaptation Boyd examines Homer s Odyssey and Dr Seuss s Horton Hears a Who demonstrating how an evolutionary lens can offer new understanding and appreciation of specific works What triggers our emotional engagement with these works What patterns facilitate our responses The need to hold an audience s attention Boyd underscores is the fundamental problem facing all storytellers Enduring artists arrive at solutions that appeal to cognitive universals an insight out of step with contemporary criticism which obscures both the individual and universal Published for the bicentenary of Darwin s birth and the 150th anniversary of the publication of Origin of Species Boyd s study embraces a Darwinian view of human nature and art and offers a credo for a new humanism
